The day, when the order has been placed.

?	October 2013							x
<<	<	Today	>	>>				
Week	Sun	Mon	Tue	Wed	Thu	Fri	Sat	
39			1	2	3	4	5	
40	6	7	8	9	10	11	12	
41	13	14	15	16	17	18	19	
42	20	21	22	23	24	25	26	
43	27	28	29	30	31			

Select date

You can set up the minimal interval for delivery. For example, we will set 3 as minimal delivery interval. In this case the delivery won't be available for the same day when the order was placed and the next 2 days. All days and years before the order also will be restricted.

All dates, before the order, are not available for delivery

According to the minimal interval (3), the next 2 days after the order has been placed also restricted.

1. Delivery Date – General Settings

The day, when the order was placed.

October, 20							
Week	Sun	Mon	Tue	Wed	Thu	Fri	Sat
39			1	2	3	4	5
40	6	7	8	9	10	11	12

Delivery Comment

You can set up maximal delivery interval, which will be available for customers. This interval will include the day of the order and N - 1 days after the order has been placed. For example, we have set maximal delivery interval as 5, in this case the delivery will be available for the same day when the order was placed and 4 next days.

You can specify how many orders a customer can make per established time interval.

3. Specify minimal delivery interval for particular products

To create custom attributes for Minimal Delivery Interval by Product, please go to admin panel -> Catalog -> Attributes -> Manage Attributes and click 'Add new attribute' button.

Attribute Properties	
Attribute Code *	<input type="text" value="min_deliv"/> <small>▲ For internal use. Must be unique with no spaces. Maximum length of attribute code must be less than 30 symbols</small>
Catalog Input Type for Store Owner	<input type="text" value="Price"/>
Default Value	<input type="text"/>
Unique Value	<input type="text" value="No"/> <small>▲ Not shared with other products</small>
Values Required	<input type="text" value="No"/>
Input Validation for Store Owner	<input type="text" value="None"/>
Apply To *	<input type="text" value="All Product Types"/>

Frontend Properties	
Use in Quick Search	<input type="text" value="No"/>
Use in Advanced Search	<input type="text" value="No"/>
Comparable on Front-end	<input type="text" value="No"/>
Use In Layered Navigation	<input type="text" value="No"/> <small>▲ Can be used only with catalog input type Dropdown, Multiple Select and Price</small>
Use In Search Results Layered Navigation	<input type="text" value="No"/> <small>▲ Can be used only with catalog input type Dropdown, Multiple Select and Price</small>

Select 'Price' for Catalog Input Type setting.

Specify any attribute code you like for the custom attribute. You will need to type this code in the extension configuration section.

3. Specify minimal delivery interval for particular products

Frontend Properties	
Use in Quick Search	<input type="text" value="No"/>
Use in Advanced Search	<input type="text" value="No"/>
Comparable on Front-end	<input type="text" value="No"/>
Use In Layered Navigation	<input type="text" value="Filterable (with results)"/> <small>▲ Can be used only with catalog input type Dropdown, Multiple Select and Price</small>
Use In Search Results Layered Navigation	<input type="text" value="No"/> <small>▲ Can be used only with catalog input type Dropdown, Multiple Select and Price</small>
Use for Promo Rule Conditions	<input type="text" value="No"/>
Position	<input type="text" value="0"/> <small>▲ Position of attribute in layered navigation block</small>
Visible on Product View Page on Front-end	<input type="text" value="No"/>
Used in Product Listing	<input type="text" value="Yes"/> <small>▲ Depends on design theme</small>
Used for Sorting in Product Listing	<input type="text" value="Yes"/> <small>▲ Depends on design theme</small>

Set this option to 'Yes' for the attribute specified in the 'Minimal Delivery by Product' field (see page 4).

3. Specify minimal delivery interval for particular products

 **New Product Attribute** Back Reset Save Attribute Save and Continue Edit

 If you do not specify an option value for a specific store view then the default (Admin) value will be used.

Manage Titles (Size, Color, etc.)

Admin	Default Store View	English	Spanish
<input type="text" value="Minimal Delivery I"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

 Failed

Specify the desired title and save the attribute.

3. Specify minimal delivery interval for particular products

The screenshot displays the Amasty CMS interface. On the left, a navigation menu is open, showing 'Attributes' with sub-options 'Manage Attributes' and 'Manage Attribute Sets'. The main content area is titled 'Groups' and contains a list of attribute groups. The 'General' group is expanded, showing a list of attributes including 'name', 'description', 'short_description', 'sku', 'weight', 'news_from_date', 'news_to_date', 'status', 'url_key', 'visibility', 'country_of_manufacture', and 'min_deliv'. The 'min_deliv' attribute is highlighted. To the right, the 'Unassigned Attributes' section lists 'color' and 'manufacturer'. A red arrow points from a callout box to the 'min_deliv' attribute. The callout box contains the text: 'Assign the created attribute to the attribute set you use for creation of your products in Catalog -> Attributes -> Manage Attribute.'

3. Specify minimal delivery interval for particular products

General Create New Attribute

English
Spanish

Set "Starting Time" for generator. It will be the start point for generator and also it will be the beginning time at the first interval

Starting Time

10 : 00 : 00

Set "Ending Time" when the generation of time intervals should be stopped.

Ending Time

14 : 00 : 00

It is possible to use a generate format, time intervals will be generated according to this format.

Minutes Interval *

20

It is the starting position for the first interval. Depending on these positions, time intervals will be sorted on the frontend.

Format

05:00 - 06:00 (24 Hour Format)

Starting Value for Position

1

Step for Position will influence on the difference among intervals positions. If you specify Starting Value for position is 1 and Step for Position is 1. Your time intervals will have the following view: 1, 2, 3, 4, 5, 6.

Step for Position

1

Template Information	
Used Currently For	System -> Configuration -> Sales Emails -> Order Comments -> Order Comment Email Template (GLOBAL)
Template Name *	Test Delivery Date
Template Subject *	{{var store.getFrontendName()}}: Order # {{var order.increment_id}} update
	Insert Variable...
Template Content *	<pre> <tr> <td valign="top"> <h1 style="font-size:22px; font-weight:normal; line-height:22px; margin:0 0 11px 0;">Dear {{htmlscape var=\$order.ge <p style="font-size:12px; line-height:16px; margin:0 0 10px 0;"> Your order # {{var order.increment_id}} has been
 {{var order.getStatusLabel()}}. </p> <p style="font-size:12px; line-height:16px; margin:0 0 10px 0;">Delivery Date: <u>{{var order.deliverydate('date')}}</p> <p style="font-size:12px; line-height:16px; margin:0 0 10px 0;">You can check the status of your order by <a href="{{stc <p style="font-size:12px; line-height:16px; margin:0 0 10px 0;">{{var comment}}</p> </u></pre>

You can use Delivery Date in the e-mail Templates
`{{var order.deliverydate('code')}}}`

Where 'code'

1. date
2. time
3. comment

```
$order = Mage::getModel('sales/order')->load($orderId);  
$value = $order->deliverydate('comment');
```

You can use Delivery Date in PHP code
`$value = $order->deliverydate('code');`

Where `$order` is the order object

Where 'code'

1. date
2. time
3. comment

API

Values of delivery date are available via Magento API with "sales_order.info" method. Works both via SOAP and XML-RPC.

You can find the values by
`salesOrderEntity = deliverydate`
