Duplicate Categories

Create the exact copy of the existing categories in a number of clicks. Dramatically save time on duplicating categories in multi-store configurations.

- Duplicate categories correctly
- Keep category levels when duplicating
- Save product assignments in the duplicated categories
- Replace the required content for duplicate categories
- Save tons of time on making category copies

Duplicating Categories

The module allows you to duplicate categories using the default Magento interface. Navigate to **Catalog → Manage Categories**. Then, select on of the existing categories and the **Duplicate category** button will appear.

Next, at the duplication page you can specify some details:

Copy Product Relations Yes ▼

Include Subcategories Yes ▼

Select Parent Category — choose which category will be a parent one for the category you duplicate. For example, you would like to copy category 'Chairs' to a different website within your Magento. You can choose which category will be parent for the duplicate in the new website.

Copy Product Relations — if *Yes*, all products from the existing category will be added to the duplicate automatically. If *No*, the items from the primary category will not appear in a duplicated one.

Include Subcategories — enable this option to duplicate subcategories together with the main category.

Then, navigate to the **Search and Replace** section.

Search and Replace

💡 **Leave empty if you do not need to search and replace.**

Search For:	Replace With:
Chair	Armchair
Pillow	Cushion

You can make replacements in the following fields of the duplicate category:

- name;
- description;
- meta keywords;
- meta description.

Words from the **Search For** fields will be replaced with content from the **Replace With** field.

If you don't need to make any replacements, please leave these fields empty.

Hit the **Duplicate** button to create the copy of the category.
