

Amasty

For more details see the [One Step Checkout](#) extension page.

One Step Checkout

The extension can significantly reduce cart abandonment, combining the entire purchase process on a single page. The whole checkout flow with various steps is simplified to a handy page with customizable sections and fields. Among its prominent features there are Google address suggest and freindly guest checkout.

General Settings

To configure the extension settings please go to **Admin panel** → **System** → **Configuration** → **One Step Checkout**.

General		
Enable	Yes	[STORE VIEW]
Heading	Checkout	[STORE VIEW]
Title	Express checkout lane	[STORE VIEW]
Description	Please enter your details below to complete your purchase	[STORE VIEW]

▲ HTML allowed

For better SEO rankings include main keywords in the **Title** and **Heading** of your checkout page.

In the **Description**, set an appropriate guidelines for your customers on various issues concerning taxes (e.g. VAT) or any other payment aspects, specific for your state. You can use **<html>** to highlight the important points.

Fields, Which Trigger Checkout Refresh

In the **Address Fields**, choose the fields after filling in which, the data in **Shipping Methods**, **Payment Methods** (if enabled) will be accordingly refreshed (without full checkout page reloading).

Fields, Which Trigger Checkout Refresh		
Address Fields	<div style="border: 1px solid #ccc; padding: 5px;"><p>Address</p><p>City</p><p>State/Province</p><p>Zip/Postal Code</p><p>Country</p></div>	[GLOBAL]
Shipping Methods	<div style="border: 1px solid #ccc; padding: 5px;"><p>Yes</p></div>	[GLOBAL]
Payment Methods	<div style="border: 1px solid #ccc; padding: 5px;"><p>Yes</p></div>	[GLOBAL]
Fast Page Load	<div style="border: 1px solid #ccc; padding: 5px;"><p>No</p></div>	[GLOBAL]

▲ Customers will see address sections right away, while other sections (shipping, payment) will be loaded a bit later with AJAX.

To boost checkout page loading, you can enable **Fast Page Load**. This way, the customers will see the **Billing** section loaded instantly, and other sections will load short after (without full page reloading). This AJAX plugin offers smoother page performance.

Shopping Cart Settings

Set the **Move checkout to cart page** option to *Yes*, if you want to couple shopping cart and checkout pages.

With **Merge Shopping cart with Order Review** option, you can simply make the review block editable and thus save space by combining the shopping cart block with review. This also means the customers will skip to checkout right after adding products to cart and will be able to complete it within minimum time period.

Default Fields Data

Set the default option for **Payment Method** and activate **Ship to same address** to hasten the checkout procedure.

- Auto-Select: First Available
- Credit Card (saved)
- Check/Money Order
- No Payment Information Required
- Purchase Order

- Cash On Delivery
- PayPal Mobile Express Checkout Library

You can also make newsletter subscription checkbox signed by default, set **Select “Sign Up for Newsletter” checkbox** to Yes. [See how to enable Newsletter Subscription in Visual options](#)

Shopping Cart Settings		
Move checkout to cart page	<input type="text" value="Yes"/>	[STORE VIEW]
Merge shopping cart with order review	<input type="text" value="Yes"/>	[STORE VIEW]

Default Fields Data		
Payment Method	<input type="text" value="First available"/>	[STORE VIEW]
Ship to same address	<input type="text" value="Yes"/>	[STORE VIEW]
Select "Sign Up for Newsletter" checkbox	<input type="text" value="No"/>	[STORE VIEW]

Sections		
Discount Codes	<input type="text" value="Yes"/>	[STORE VIEW]
Gift Card	<input type="text" value="No"/> <small>▲ Available only for magento enterprise version</small>	[STORE VIEW]
Amasty Gift Card	<input type="text" value="No"/> <small>▲ Available only for Amasty Gift Card Extension</small>	[STORE VIEW]

Sections

Add the **Sections** you want to be displayed on the checkout page.

Google Autocomplete

To significantly simplify the address fill, enable **Google Autocomplete**.

Google Autocomplete		
Enable	<input type="text" value="Yes"/>	[STORE VIEW]
API key	<input type="text" value="YOUR_API_KEY"/> <small>▲ Required for address autocomplete to work. Click here for more information.</small>	[STORE VIEW]

The feature will not be available without API key. The settings may appear somewhat complex, but once you all set, you have a convenient feature, that makes address fill procedure simplified to couple of clicks.

[Get API key here.](#)
[Check for more information on Google Autocomplete feature.](#)

Visual Options

These settings allow you to customize the checkout page as you want.

Visual Options		
Theme Color	<input type="text" value="48C27C"/>	[STORE VIEW]
Text Color	<input type="text" value="000001"/>	[STORE VIEW]
Button Color	<input type="text" value="F26222"/>	[STORE VIEW]
Font Family	<input type="text"/> <small>▲ for example: Georgia, 'Times New Roman', Times, serif</small>	[STORE VIEW]
Show Thumbnail On Review	<input type="text" value="Yes"/>	[STORE VIEW]
Show Newsletter Subscription	<input type="text" value="Yes"/>	[STORE VIEW]
Thumbnail Size	<input type="text" value="40"/>	[STORE VIEW]

- Enable **Show Thumbnail On Review** and set a size to display product thumbnails on the review step.
- Enable **Show Newsletter Subscription** to let customers subscribe to newsletter during checkout.

Geo IP Data

To configure Geo IP option, please, go to **Admin panel** → **System** → **Configuration** → **Geo Ip Data**.

At the **Geo IP** tab you can enable the Geo IP option. When the option is enabled, *Country* field will be filled in automatically during checkout.

Click *Download and Import*.

Download and Import [STORE VIEW]

Import Completed

Sometimes it happens that the import is stuck in the middle of the process. It's a common issue, and there is a solution for it. [Read our article and learn how to import Geo IP database properly.](#)

Credit Card Detector

Open the **Credit Card Detector** tab to configure card icons display. (**Admin panel** → **System** → **Configuration** → **Credit Card Detector**.)

Card Type		
Hide dropdown	<input type="text" value="Yes"/>	[STORE VIEW]
Show icons	<input type="text" value="Yes"/>	[STORE VIEW]
Icon width (px)	<input type="text" value="70"/>	[STORE VIEW]

Visa		
Icon	 <input type="button" value="Browse..."/> No file selected. <input type="checkbox"/> Delete Image	[STORE VIEW]
Title	<input type="text" value="Visa"/>	[STORE VIEW]
Order	<input type="text" value="10"/>	[STORE VIEW]

- Set the option to **Yes** if you don't want to display a **Dropdown** with card types on the checkout page.
- Specify icons' **Size** in pixels.
- It's possible to show a card types dropdown and icons either together or separately.

NOTE: When card icons are enabled a customer just needs to start typing a credit card number and the module will automatically select the necessary card type.

- You can upload a custom **Icon** for each card type.
- Specify a card's **Title** and display **Order**.

Auto Shipping

Open the **Auto Shipping** tab to manage settings for auto shipping. (**Admin panel** → **System** → **Configuration** → **Auto Shipping**.)

General		
Enable	<input type="text" value="Yes"/>	[STORE VIEW]
Default shipping method	<input type="text"/>	[STORE VIEW]
If default method is not available	<input type="text" value="Choose the cheapest"/>	[STORE VIEW]
Not Auto-fill Fields	State	[STORE VIEW]
	ZIP	[STORE VIEW]
	City	[STORE VIEW]
		[STORE VIEW]

Geolocation		
Use Geo IP	<input type="text" value="No"/>	[WEBSITE]

Default Address		
Country	<input type="text" value="--Please Select--"/>	[STORE VIEW]
State	<input type="text" value="Florida"/>	[STORE VIEW]
City	<input type="text" value="123 6th St. Melbourne"/>	[STORE VIEW]
ZIP	<input type="text"/>	[STORE VIEW]

General Tab:

- **Enable** field - Set the option to Yes if you want to display a default shipping method on the checkout page.
- **Default shipping method** - choose a shipping method you would like to set by default
- **If default method is not available** - choose the way shipping method will be selected if it hasn't been chosen by default
- **Not Auto-fill Fields** - choose the fields that you want to leave empty

Default Address Tab - fill in the fields with the text you would like to be displayed as an example.

Manage One Step Checkout

Labels and Layout

Please go to **Admin panel** → **System** → **Amasty One Step Checkout** to configure display of fields

in checkout blocks and other options.

At the **Labels and Layout** tab you can specify labels for checkout blocks and choose layout for the checkout page. It is possible to specify labels and all other extension settings for each store view.

Choose Store View: 

Specify checkout block names and choose layout

Billing	<input type="text" value="Billing"/>
Shipping	<input type="text" value="Shipping"/>
Shipping Method	<input type="text" value="Shipping Method"/>
Payment	<input type="text" value="Payment"/>
Review	<input type="text" value="Review"/>
Layout	<input type="text" value="Three Columns"/>

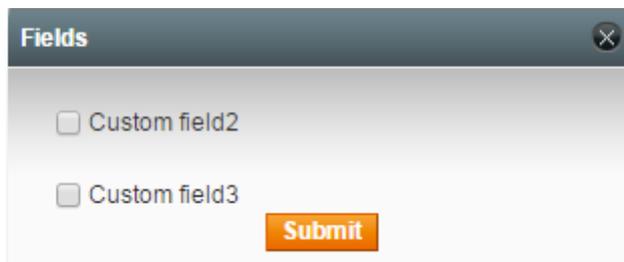

Fields

At the **Fields** tab you can configure the order and other parameters of fields in checkout blocks. Please choose for which block to edit the fields, *Billing* or *Shipping*.

Label	Placement	Required	
<input type="text" value="Gender"/>	 20	<input checked="" type="checkbox"/>	Delete
<input type="text" value="Prefix"/>	 20	<input type="checkbox"/>	Delete
<input type="text" value="First Name"/>	 50	<input checked="" type="checkbox"/>	Delete
<input type="text" value="Middle Name/Initial"/>	 50	<input type="checkbox"/>	Delete
<input type="text" value="Last Name"/>	 50	<input checked="" type="checkbox"/>	Delete
<input type="text" value="Suffix"/>	 20	<input type="checkbox"/>	Delete
<input type="text" value="Company"/>	 50	<input type="checkbox"/>	Delete
<input type="text" value="Address"/>	 100	<input checked="" type="checkbox"/>	Delete
<input type="text" value="VAT Number"/>	 50	<input type="checkbox"/>	Delete

 [Add Fields](#)

- To change display order for a field just drag the field to the right position.
- It is possible to edit label for each field.
- In **Placement** column you can specify in percent how much space each field will take in a line. E.g. **Last Name** field will take 50% of a line. If you specify 100, the field will occupy the whole line.

- **Add fields.** With *Add fields* button, either in *Shipping* and *Billing* sections, you can add up to three new fields. Set a label name, a placement, and length. E.g. Include additional fields, that in your view, can be appropriate like *e-mail* or *note to seller*.

Frontend

As you see, **checkout** is combined with **shopping cart** page and is very compact. Customers need to fill in just one page and the order is complete. To save additional space, you can remove shopping cart and enable editing of products in cart on order review step.

Customers can log in right on the checkout page.

- To login as a guest, customers need only an e-mail.
- To sign up, they should simply add a password.
- If a customer is already registered, there is a second tab *Login in your account*, with e-mail and password fields.
