

Amasty extensions updates – April 2017

[Ksenia Dobрева](#) May 22, 2017

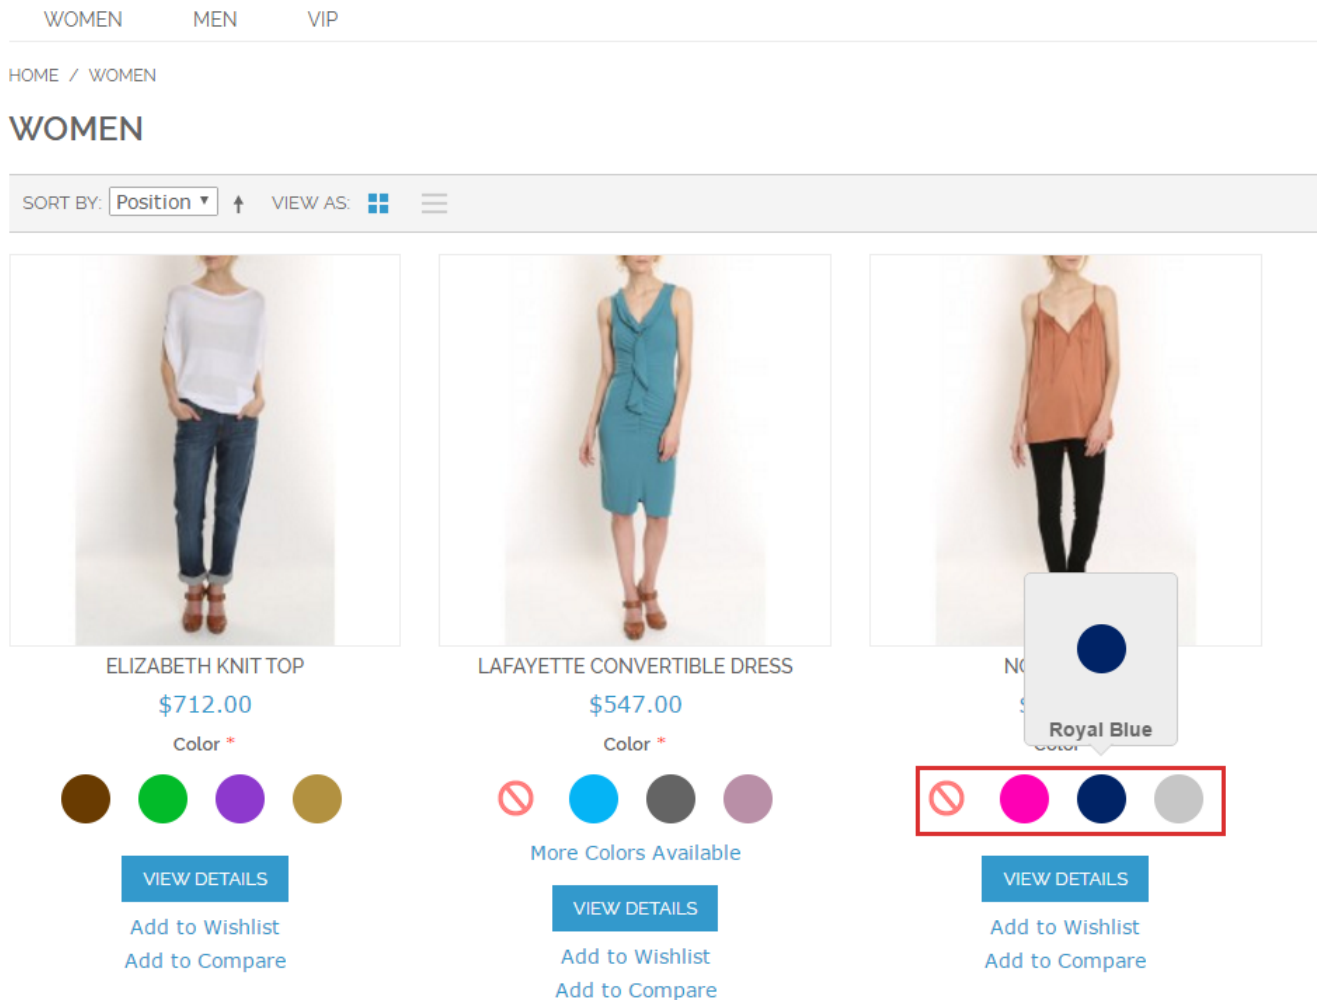

Hi there! Do you think that we forgot about the April updates? Nothing of the kind! We've been working too hard these months and here's what we've done to make Amasty extensions better.

Magento 1

[Color Swatches Pro 3.15.2](#)

- Possibility to display specified attributes on category pages was added.

- Compatibility with Magento custom options in case of using the price from simple products was added.
- Minor improvements for image zooming were implemented.

Special Promotions 1.11.4

- The field “Max Amount Discount” was deactivated for several rule types (with fixed price or fixed discount).
- Field renaming for a better understanding of rule’s setting. I.e. for some rules the setting “Discount Amount” is renamed to “Discount Amount” (in %) or “Final promo item price”;
- The extended definition was added for Conditions and Actions (in the corresponding tab when create/edit rule) for better understanding their differences and usage specifics;
- The “Apply to Shipping Amount” setting was added to several rules;

- Updated logic of the rule “Each M-th after X-th”. The first item from M-th sequence is discounted right after X-th. I.e. if X=1, M=2: Item1 (without discount), Item2 (with discount), item3 (without discount), item4 (with discount) and so on.
- A number of various fixes and improvements was added.

Admin Actions Log 1.6.4

- Possibility to send an email to many addresses were added.
- E-mail validation from configurations was removed.
- Now the module is enabled by default.
- Access control list was added. Now you can restrict access to “Clear Log” execution.
- Now you can set “0” for “Automatically Clear Action Logs After, Days” if you would like to store actions logs for the unlimited number of days.
- Minor issues were fixed. Check updated [magento access logs](#) extension.

One Step Checkout 3.1.0

- Now the extension allows adding three custom fields to the Billing and Shipping info.
- Guest checkout improvements were added.
- Password length validation was added.
- Now “Forgot an Item?” link is shown only if it’s necessary.
- A number of minor improvements and fixes were added.

Promo Banners 1.3.3

- Possibility to display banners for specific countries (using GeoIP, included) was added.
- Possibility to specify an exact column (position) where the banner will be displayed when set to be among products was added.

- A number of general improvements and fixes were added.
- Compatibility for older versions of Magento was improved.

XML Google® Sitemap 1.1.11

- Date and time display was fixed.
- Cron execution time was fixed.
- Brand pages with no products will be removed now.

Gift Card 1.2.3

- Multi-currency support was added.
- Translation (i18n) file was added.
- Compatibility with the 3rd party custom themes was improved.

Full Page Cache 1.7.0

- HTTP authentication support for cache crawler was added.
- Compatibility with Landing Pages extension was improved.

Extended Product Grid with Editor 4.12.20

- Now the fields on the grid are editable right after the extension is installed; you don't need to specify this option in the settings anymore.
- Minor improvements were added.

Magento Layered Navigation

- Compatibility with Amasty Promo Banners in AJAX mode was added.
- Compatibility with Amasty Shop by Brands with the cache enabled was added.
- Minor issues were fixed.

Multiple Coupons 1.4.2

- Coupons are case insensitive now.
- Minor fixes were added.

Custom Forms 1.1.4

- Permissions for blocks will be automatically created on Magento 1.9+.

Extended Order Grid 1.9.6

- The notification message is now displayed with the link to the configuration page, in case if no new fields were added with the extension.

Delivery Date 1.4.1

- New API methods were implemented (SOAP v1 and v2).

AJAX Scroll 1.0.13

- Performance optimization: our blocks and scripts are now loaded only on pages with products.

Order Flags 3.2.1

- ACL workflow was improved when it's installed as a part of Order Manager Toolkit.

Magento 2

Magento 2 Layered Navigation Multiple Select

- Now you can put the brand name at the beginning of the SEO URL.
- The issues that were fixed.

Magento 2 Order Attributes 2.1.4

- Possibility to use attributes in e-mails was added (ex. {{var

`order.getData('ATTRIBUTE_CODE'))` or `{{var order.getAttributeCode()}}`.

- Compatibility with PayPal payment methods was improved.
- A few general compatibility improvements were made.
- Code refactoring and some improvements were made.
- Minor improvements were made.

Magento 2 Gift Card 1.0.3

- Now you can allow payment for shipping by a gift card.
- Minor improvements were made.

Magento 2 Advanced Search 1.1.0

- Attribute relevance weight configuration was added.
- Minor improvements for ACL (Access Control List) were made.

Magento 2 Delivery Date 1.3.1

- Possibility to use translations for the calendar was implemented.

Magento 2 Efficient Order Export 1.1.7

- An option was made to start export by calling a special URL. The feature is useful for integrations.

Magento 2 Order Status 1.0.2

- Compatibility with Customer Attributes was added (use: `{{var customer.getSomeAttribute()}}`).

Magento 2 AJAX Scroll 1.0.4

- Compatibility with Shop by Brands on a search page was made.

Magento 2 Pre Order 1.0.9

- Possibility to use mass action to update pre-order fields was implemented.
