

Amasty Extensions Updates: August 2014

[Vera Rabkina](#) Aug 26, 2014

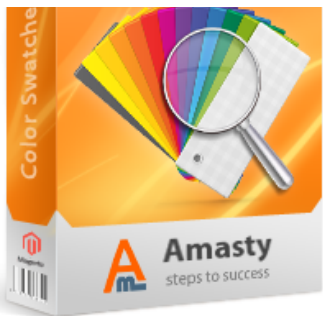

Have you already checked 14 great updates of Amasty Magento extensions that have been introduced in August? This month Amasty Team has added a number of useful features that are going to significantly improve user experience as well as let Magento stores owners make their marketing even more efficient. Get inside to learn all the details.

The main update of the month is devoted to Amasty well-known bestseller [Color Swatches Pro](#). With the help of the improvements introduced you will be able to mark unavailable products with white line, introduce helpful tooltips and what's more important zoom product image on mouse over. With such great features you can make your online store much more user-friendly in just a few clicks. Also don't forget to pay attention to [Full Page Cache](#) and [Customer Attributes](#) extensions that have come through some mild, but significant changes. Want to learn more? Check our Magento infographics.
