

Amasty extensions updates – February 2015

[Ksenia Dobрева](#) Feb 23, 2015

February updates have arrived! Here's what we've done to make existing Amasty extensions better.

Full Page Cache 1.3.0

- Cache Crawler (Warmer) added

Full Page Cache Crawler is needed for so-called **warming the cache**. The pages with a big number of visits take more time and server resources during the first request for cache generation, but all the following requests are performed faster on the second try, because the site displays already generated content, the page cache. [LEARN MORE](#)

- Setting to limit cache size (for database storage only)

Cache Storage Settings	
Enable GZIP	<input type="text" value="None"/> ▲ Increases CPU load, but can lower required storage size.
Compression Level	<input type="text" value="6"/> ▲ From 0 to 9. The higher value is, more CPU capacity is required to compress data.
Maximum Storage Size	<input type="text" value="500"/> ▲ In Megabytes. Available for DB cache storage only.

- Support for cookie notification (cookie law)
- Minor updates and improvements

Order Attributes 3.1.7

- Possibility to add order attributes into HTML print-out of order confirmation email
- Possibility to add order attributes into shipment emails
- Possibility to use calendar for order attributes of date type on the order create page in the backend

+ Add Products

Product	Price	Qty	Subtotal	Discount	Row Subtotal	Action
No ordered items
