

Amasty extensions updates – February 2017

[Alexandra Zhos](#) Mar 10, 2017

We are happy to announce a preview of our February's updates.

This month we developed a lot of backend and admin features that we sure you'll enjoy a lot. Magento 1 users should pay attention to the updates in the Auto Add Promo Items, Improved Layered Navigation and Special Promotions extensions. What concerns Magento 2 plugins – don't forget to check Color Swatches, where we added a couple of useful settings for customers; One Step Checkup was also enriched with some new backend improvements.

Magento 1

[Auto Add Promo Items 2.4.0](#)

- A new feature was implemented: now you can enable or disable Promo Banners for each rule separately.

- Now the module ignores spaces when you lists SKUs in the “Promo Items” field. Now you shouldn’t care to leave a space or not after a comma.
- Now the final (discounted) price is taken into consideration when you filter products on category pages.
- Now you can see the reminder if the gift is “out of stock”.
- “Out of stock” or “Disabled” products could be shown on a banner now.
- A number of fixes and improvements were added.

Special Promotions 1.11.3

- Now you’ll receive a notification based on SKU in case you create a rule for the product with “Out of stock” status or/and has Qty=0. You can switch on/off this option in the System settings.

Shopping Cart Price Rule

- Rule Information
- Conditions
- Actions
- Labels
- Manage Coupon Codes
- Product Page Banners

⚠ Please notice, the **msj009** have stock quantity <= 0 or are "Out of stock". That may interfere in proper rule execution.

✔ The rule has been saved.

🔗 Edit Rule 'ergeg'

Update prices using the following information

Apply Percent Discount: Buy X get Y Free

Please see [Percent Discount](#).
It gives Y product specified discount, but does not add the product Y automatically. For auto-adding please consider [Free Gift module](#)

Calculate Discount Based On

Skip Items with Special Price

Apply the rule only to cart items matching the following conditions (leave blank for all items)

⚠ In order to use attributes like SKU or Manufacturer, please activate "Use for Promo Rule Condition" option in [Product Attributes](#)

- The notification system was updated. Now the admin won't be notified on SKUs that have Quantity=0 if Manage Stock = NO.
- A new value for a discount calculation was added: "Original Price. Apply the Biggest Discount". This feature stops discounts accumulation from different rules and conditions and applies only the biggest one.
- A number of fixes and improvements were added.

Improved Layered Navigation 3.0.9

- Now you can set the number of unfolded options for the category filter by using the 'Less'/'More' buttons.
- Now the module supports the UTF-8 encoding for the URLs. This option is quite useful for using the national symbols.
- A number of fixes and compatibility improvements were added.

Full Page Cache 1.6.10

- The automatic cache clearing was made for specific pages affected by catalog price rules or special prices.
- A number of general improvements were added.

Meta Tags Templates 1.3.12

- Now when you work with a variable like {category} only the names of active categories are used.
- A minor code syntax improvement was added.

Event Tickets 1.1.2

- A 'Ticket Type' column on the 'Registered Attendees' grid was added.
- Minor fixes and improvements were added.

Edit Lock 1.0.3

- Products are now being locked (depending on the new setting) when using “Update Attributes” mass actions.

[XML Google® Sitemap 1.1.9](#)

- Compatibility with Blog Pro extension was improved.

Magento 2

[Magento 2 One Step Checkout 1.0.2](#)

- The ability to refresh payment methods & total upon the shipping address change was added.
- The ability to set an optional Zip Code for specific countries was created.
- An issue with the payment methods that required redirecting to the payment system was fixed.
- Compatibility with Delivery Date for Magento 2 was improved.
- A number of minor fixes & improvements were added.

[Magento 2 Improved Layered Navigation 1.14.6](#)

- The ability to add URL suffix to a brand and filtered ‘all-products’ pages was added.
- Some minor fixes and backend interface improvements were added.

[Magento 2 Color Swatches 1.1.0](#)

- A new feature was added: now when the customer switches the options like color, size and etc., it’s possible to update not only the product image but also a price and a description.

[Magento 2 Customer Attributes 2.0.0](#)

- Now it’s possible to create dependent attributes, i.e. to display certain

attributes only in case a particular value of the other attribute was selected.

- The issue with the ‘Manage Label / Options’ panel was fixed.

Magento 2 Product Labels 1.2.1

- Performance optimization was made: cache for a labels’ block was added.
- Compatibility improvements were implemented.

Magento 2 Admin Actions Log 1.0.7

- Now the passwords in the log are hidden under asterisks.
- Some improvements in the actions log were made.

Magento 2 Advanced Permissions 1.0.5

- Restricted websites and stores are hidden from the product page now.
- A number of minor improvements were added.

Magento 2 Landing Pages 1.1.5

- The ability to allow non-unique URL keys for different stores was implemented.
- A number of minor improvements were made.

Magento 2 Extra Fee 1.1.2

- An extra fee for the totals at the checkout success page was added.

Magento 2 Efficient Order Export 1.1.6

- A new export setting was implemented: now the module is able to exclude bundle and configurable products from the export and to skip parent products.

[Magento 2 Out Of Stock Notifications 1.2.0](#)

- Support for subscriptions to items of grouped products was added.

Minor updates and improvements
