

Amasty Extensions Updates: January 2014

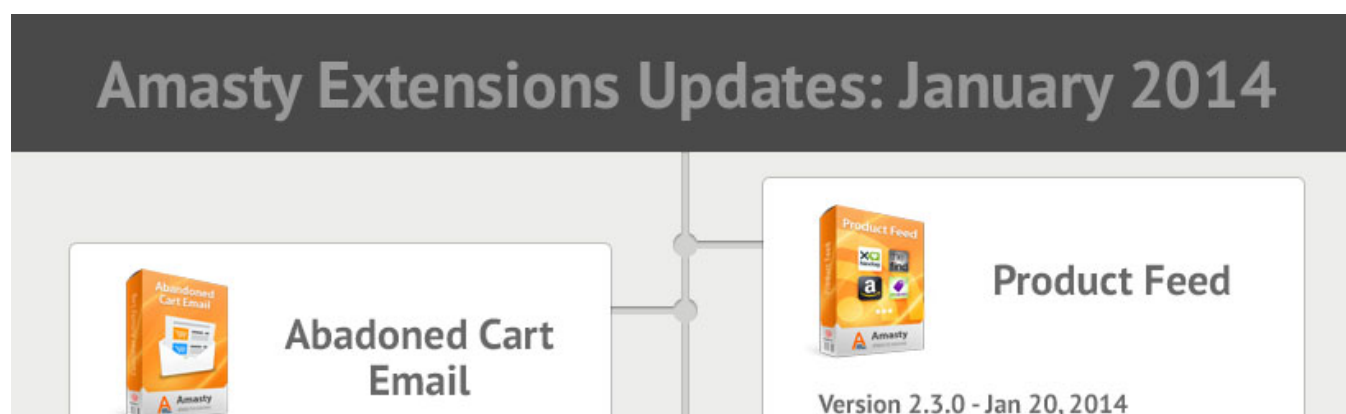

[Vera Rabkina](#) Jan 21, 2014

Amasty team is constantly working on improving the quality of the extensions it offers. Regular updates help us to hold the bar high and remain among the leaders of Magento extensions producers. Let's see what updates we have made during the first month of the year.

This January our developers have significantly improved a number of our Magento extensions. Some of them like [Abandoned Cart Email](#) and [Email to Customers](#) have acquired new features. Others like [Product Feed](#), [Facebook & Twitter Promo](#), Errors Detector have had old features improved. And many more extensions have had template files rebased ([Out of Stock Notification](#), [Customer Product Images](#)) and minor bugs fixed: [AJAX Image Uploader](#), [Delivery Date](#), [AJAX Shopping Cart](#).

Find more information about our updates in **Magento infographics** below:

Version 1.3.6 - Jan 20, 2014

- Category conditions
- TM_FireCheckout compatibility
- Skip carts with zero items

- Better filters by QTY and Categories
