

# Amasty Extensions Updates – July 2017

[Alexandra Zhos](#) Jul 29, 2017

It's the low season, but we didn't stop updating our extensions to make them even better. Check the list below to see if your extensions were updated!

## Magento 1

### [Abandoned Cart Email 1.14.0](#)

- A Debug Mode feature was added. When enabled, the carts will be immediately marked as abandoned and an email will be sent with zero delay.
- It is now possible to output the coupon expiration date in the email.
- A number of fixed and improvements were implemented.

### [Color Swatches Pro 3.16.0](#)

- Compatibilities with a number of third party and Amasty extensions

were added and improved.

- A new setting *Show all options* on the category and product page was added.
- Minor fixes were added.

### **GeoIP Redirect 1.0.13**

- The option *All Except Specified URLs* is now active by default now for the *Apply Logic To* setting.
- Some system URLs like *checkout* or *paypal* were added to the exceptions list.
- *Restriction by IP* was renamed to *IP to Ignore*.

### **Custom Form 1.2.0**

- A new type of field – *Single File Upload* was added.
- Minor improvements were added.

### **Special Promotions 1.12.0**

- The extension general settings were restructured. Now all the settings are divided into groups.
- Minor fixes were added.

### **Quick AJAX Login 1.0.7**

- The ability to login with Twitter was added.
- Minor fixes were added.

### **Auto Add Promo Items 2 2.5.1**

- The new option whether to apply rules for the gifts added with the current rule was implemented.
- Internal improvements for products with custom options were made.

### **Admin Bookmarks 1.2.0**

- The *Access Control List* option is added. Now admin users can rename or edit only their own tabs.

## Magento 2

### Magento 2 Multi Warehouse Inventory 1.1.1

- Now you can set different shipping methods and rates per warehouse.
- Now you can calculate the shipping cost on checkout based on customer address & warehouse location.
- A possibility to use SKU (instead of the product ID) and warehouse code (instead of the warehouse ID) in the API was added.
- Minor bug fixes & improvements were added.

### Magento 2 Product Attachments 1.2.2

- A possibility to mass import attachments with the URL type was added.
- Minor improvements were added.

### Magento 2 Product Feed 1.3.0

- Now you can make the extension ignore certain categories in Category attribute and Category mapping output.
- Some minor issues were fixed.

### Magento 2 GeoIP Redirect 1.0.5

- Special URLs like payment gateways replies are not redirected by default now.

### Magento 2 Delivery Date 1.4.0

- Now delivery date is available with Order API.

## Minor improvements

- Product Labels 4.0.11
- AJAX Shopping Cart 2.3.11
- HTML Sitemap 1.0.11
