

Amasty Extensions Updates: June 2014

[Vera Rabkina](#) Jun 25, 2014

June can boast of 9 great updates, which have made Amasty Magento modules even more functional and user-friendly. Some of the extensions got completely redesigned; others got some new features you, customers, asked us for. Can't wait to check what Amasty Team has prepared for you? Get inside now!

The main update of this month is the redesign of [Meta Tags Templates](#). Now you can mass change meta tags by categories and URLs, which is great for big online stores management and will save you plenty of time. We also have some good news for [Google Rich Snippets](#) owners: the extension has started supporting brands. This will make your store even more noticeable in the search results. The new version of [Full Page Cache](#) supports mobile themes and offers even better productivity. Check more updates in our monthly infographics below.
