

Amasty Extensions Updates: May 2014

[Vera Rabkina](#) May 26, 2014

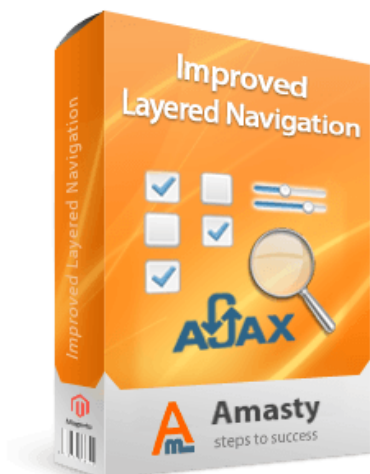

It's the end of the month again, which means Amasty Team is ready to introduce to you its monthly updates roll-up. The top-star of this month has become Improved Layered Navigation extension, which can boast of such a great amount of updates, that the effort put in is equal to creating a new one. If to cut a long story short, it started supporting [Solr](#), offered a few new filters and has become more suitable for responsive themes. Want to learn more? Check inside!

Besides Improved Layered Navigation update, this month we paid a lot of attention to improving the flexibility of the extensions functions – [One Step Checkout](#) and [Pre Order](#) updates – as well as increasing compatibility of the extensions, like in the case with [Advanced Permissions](#) and [Abandoned Cart E-mail](#). [Magento log extension](#) – Admin Actions Log and [Google Rich Snippets](#) also were not left aside and got some new functions aimed to increase overall User Experience.

Check the full list of the updates below:

Amasty Extensions Updates: May 2014

Improved Layered Navigation

Improved Layered Navigation

Version 2.5.4

- Fix hide one value for price and category filters
- Ability to include filters only in certain categories
- Hide brand state on brand pages
- Improved compatibility with Product Finder (finder block refreshing)
- Improved compatibility with Landing Pages (category ids)
- Fix excluding categories on search results
- Ability to display filters in the left column AND above products at the same time. Useful for responsive themes
- Enterprise SOLR Search full support
- Ability to set URL key. Nice for not English alphabets
- Ability to include layered navigation in selected categories only
- Cache for URL generation
- Speed improved

One Step Checkout

Version 2.3.2

- Fix for shipping method not being saved in some cases
- Better compatibility with SagePay payment methods
- Code refactoring, some rewrites removed to improve compatibility
- Flexible and configurable visual color schemes for one page checkout

Admin Actions Log

Version 1.0.4

- Now it's possible to log actions of all new admin users automatically
- Better detection of attacker's IP address

Pre Order

Version 1.2.0

- Possibility to customize shopping cart note for each product separately
- Now it's possible to use attribute {variables} in product pre order note and shopping cart note

Advanced Permissions

Version 1.0.3

- Better compatibility with Magento 1.4 - 1.5
- Possibility to restrict access to invoices/shipments/credit memos and transactions

Google Rich Snippets

Version 1.0.5

- Possibility to display rating summary snippet on category pages

– Possibility to display minimum product price snippet on category pages

Compatibility and code refactoring

Abandoned Cart Email

Version 1.6.1

- Compatibility with SMTP extensions

Landing Pages

Version 1.4.0

- Code refactoring and optimization
