

Amasty Extensions Updates – November 2017

[Alexandra Zhos](#) Nov 29, 2017

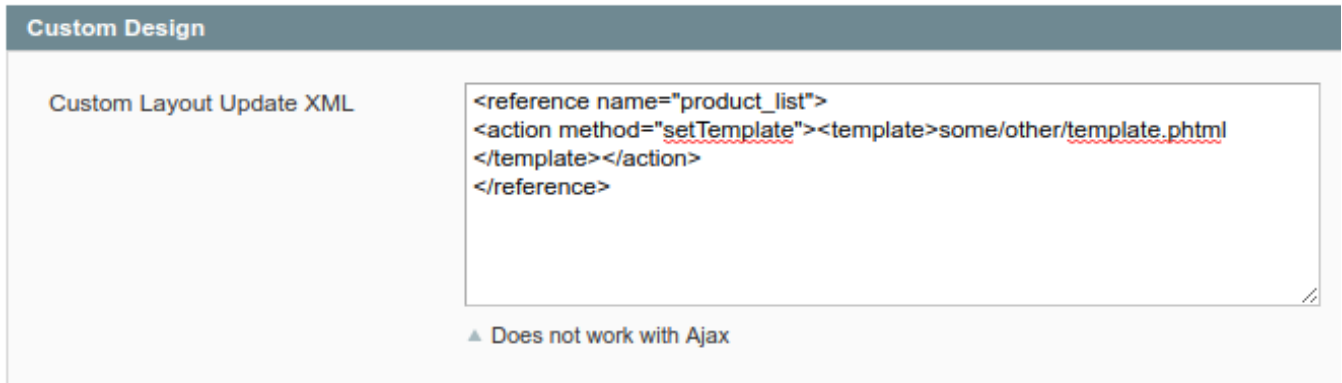

We are happy to introduce you all the updates that we've made in November. This month, we have updated quite a lot of Amasty extensions. Some of them, such as Improved Layered Navigation and Multi-Warehouse Inventory for Magento 2, received some new exciting features. For example, Magento 2 Improved Layered Navigation is now compatible with ElasticSearch!

Read on to see the details.

Magento 1

[Improved Layered Navigation 3.4.2](#)

- Now you can add additional CMS blocks on top or below the product list or below the filter navigation blocks for certain pages by using the XML layout.

Custom Design

Custom Layout Update XML

```
<reference name="product_list">
<action method="setTemplate"><template>some/other/template.phtml
</template></action>
</reference>
```

▲ Does not work with Ajax

- The WYSIWYG editor was added to the description field on the custom pages (Improved Layered Navigation -> Pages).
- The issues with the advanced mode and position field validation were fixed.
- The configuration settings in the backend were revised.
- Compatibility with Amasty Color Swatches Pro was improved.

Sales Reps And Dealers 1.5.0

- A new option was added: now you can show all customers for dealers in the admin panel.
- A new setting was created: it's possible to change a dealer or assign an order to a specific dealer from the backend.
- Now it's possible to allow dealers to work with only a specific customer group.
- The logic of sending emails to dealers was improved.

Quick View 1.0.7

- A new option was introduced: it allows to redirect a customer to the shopping cart page after an item was added to the cart.
- The jQuery fancybox library was updated and the code was improved.
- Several minor improvements were made.

Color Swatches Pro 3.17.1

- Now the product availability (In Stock / Out of Stock) is changed

automatically after product options are selected.

- Now the already uploaded images are saved with JS.

XML Google® Sitemap 1.4.0

- The Hreflang Tag Support was introduced. This option informs Google which site to show to foreign users. This option is useful for multi-lingual and multi-regional sites. Read [more](#).
- An issue with the sitemap generation by cron was fixed.

Customers Also Viewed 1.3.3

- The ability to display products from specified categories only was introduced.
- The issue with manually added products was fixed.

Out Of Stock Notifications 1.7.0

- A new option was added: now it's possible to allow subscription for the out of stock products right from the category page.

- A new feature was added: now it's possible to display particular options at the top of the filter. Other options will be folded.

Manage Swatch (Values of Your Attribute)

Featured

- Several issues with a brand page, “Apply by button” option, a product listing page, subcategory images slider, and a tooltip template were fixed.
- Other minor fixes and improvements were made.

Magento 2 Multi Warehouse Inventory 1.3.3

- Backorders support was added. Now you can configure backorders globally or separately for each particular warehouse or product.
- The ability to configure the order formation mechanism was made. Now an order can be collected from warehouses where the product is available or from warehouses where the product is available as a backorder.
- New Stock criteria to prioritize shipments from warehouses were introduced. Now you can ship the order from the warehouse where the required quantity of the product is available.
- Several issues were fixed and minor JS fixes were made.

Magento 2 Shipping Rules 2.0.1

- A new option was introduced: now you can specify coupon codes that will activate or disable a particular promotion rule.
- A new setting was implemented: now it's possible to restrict rule activation by day and time.
- Customer attributes and Purchase History were added to the rule's conditions.
- The option to include taxes and discounts to the subtotal was added.
- Magento 2.2 compatibility was improved.

Magento 2 Delivery Date 1.5.1

- A new feature was made: Delivery Date fields validation now works for orders that were placed in the admin area.
- Now you can set default values for Delivery Date fields in the extension settings.
- Magento 2.2 compatibility was tested and confirmed.
- A [grid filtering](#) was improved.

Magento 2 Shipping Restrictions 2.0.1

- A new option was introduced: now you can specify coupon codes that will activate or disable a particular promotion rule.
- Customer attributes and Purchase History were added to the rule's conditions.
- The extension's architecture was changed.
- Magento 2.2 compatibility was improved.

Magento 2 Payment Restrictions 2.0.1

- A new setting was implemented: now it's possible to restrict rule activation by day and time.
- Customer attributes and Purchase History were added to the rule's conditions.
- Now you can set to include taxes and discounts to the subtotal.
- The extension's architecture was changed.
- Magento 2.2 compatibility was improved.

Magento 2 One Step Checkout 1.3.1

- A new option was added: the "Create an account" checkbox was added to the checkout page. Thus, if this option is selected, the registration email is sent after an order is placed.
- Now the "Place Order" button is blocked when you edit a billing address.
- Multiple minor fixes were made.

Magento 2 Shipping Table Rates 1.2.0

- A new option was added: now you can change the name of the shipping method for different store views.
- Minor interface improvements were introduced.
- Several fixes were made.

Magento 2 Custom Forms 1.1.0

- Now it's possible to send the results of each custom form to different email addresses.
- Minor issues were fixed.
