

# Configurable Product Matrix – new Amasty extension

[Alexandra Zhos](#) Sep 8, 2017

We are happy to introduce you our new Magento 1 extension – [Configurable Product Matrix](#).

**Display product matrix for configurable products and help your customers to add multiple child products to cart.**

## NEW MAGENTO EXTENSIONS

### CONFIGURABLE PRODUCT MATRIX

Useful for: **USER EXPERIENCE**

Features:

- Use a handy matrix for configurable product options
- Show the matrix for all or specific products
- Add multiple product options to cart at a time
- Display old prices in the table
- Hide out of stock items

With basic color swatches functionality, your customers need to click multiple times before they select all options of a configurable product. You can simplify this process by placing product attributes in a special matrix and allow your customers to add multiple product options in one go. Display the matrix for all or only the specific items and easily hide out of stock products. Moreover, you can add an 'Old Price' column to show the benefit of the purchase.

### **Configurable Product Matrix key features:**

- **Display product options** in the matrix
- **Show the matrix** for all or specific products
- Let your customers **add multiple product options** in less time
- **Hide out of stock items** from the matrix
- **Include an "Old prices" column** to highlight the benefit

HOME / PLAID COTTON SHIRT

MORE VIEWS

Create a matrix form for simple options of a configurable product.

### PLAID COTTON SHIRT
