

# Magento Custom Form – new Amasty extension

[Ksenia Dobрева](#) Oct 19, 2015

A new Amasty extension is here! Please meet the new tool for your Magento store – [Custom Form](#) extension.

**Create any kind of web form for maintaining contact with your visitors, collecting additional info and creating e-mail database with ease.**

# NEW AMASTY EXTENSIONS

## CUSTOM FORM

USEFUL FOR: EMAIL MARKETING, CUSTOMER FEEDBACK

### FEATURES:

- CUSTOMIZE FORMS WITH DIFFERENT TYPES OF INPUT
- ADD NUMEROUS FORMS ON THE SAME SITE PAGE
- MAKE IMPORTANT FIELDS OBLIGATORY
- USE CAPTCHA FOR SPAM PROTECTION
- VIEW SUBMITTED DATA FROM THE ADMIN PANEL

## Why do you need Magento Custom Form extension?

There is no default functionality for custom form builders in Magento. The only way you could build a form is to customize the registration form, which requires time, effort and money and can't be convenient at all.

That's why we created an extension so you could use all the benefits of online forms in e-commerce.

### You can use Magento Custom Form for:

- general contact form
- customer service form
- satisfaction survey
- product questions

→ RMA form

→ suggestion form

→ ask for quote form

→ job application form

→ and more.

## **Main features**

### **1. Create custom forms on Magento**

Use the following type of fields and combine them for desired results:

- Text field
- Text area
- Static Text
- Date
- Yes/No
- Dropdown
- Multiple Select

HOME / CUSTOM FORM

**Name \***

**Please, type your e-mail here \***

**Country**

**Would you like to request a phone call? \***

No  
Yes

**If you want to receive a call back, please type in your phone number**

**Feedback is welcomed!**

**Please type the letters below \***

---

RESET    SUBMIT

## 2. Create forms in admin panel – no coding required!

Create custom Magento forms in admin, then copy and paste the generated code into the desired CMS block.

**Advanced feature:** you can build the form and insert it directly into the template to display in any block you want.

### 3. Spam protection with CAPTCHA

Use **Google ReCaptcha** and **Zend ReCaptcha** to protect your forms from spam and bots.

### 4. Set the results page

Choose the URL which will be shown after successful form submission. It could be a simple thank you page, or a page offering more shopping ideas to the customers.

The screenshot shows a website interface with a green notification bar at the top stating "The form is saved successfully". Below this, there is a section titled "OUR STORY" with the heading "Madison Island is...". Underneath, there are four lines of italicized text: "...a breath of fresh air.", "...a mecca for style savvy travellers.", "...a curator of gorgeous sartorial design.", and "...a world class concept store.". To the right of this text is a blurred image of a person in a store. In the foreground, an "Edit Form" modal window is open, displaying a table of form settings. The "Success URL" field is highlighted with a red border and contains the value "/about-store".

Form Information	
Code *	coupon_form
Success URL *	/about-store
Use CAPTCHA	Yes
Send notification to email	Yes

### 5. Have all the feedback stored in admin

Most custom web forms send submitted information only to your email. Magento Custom Form stores all the submitted data in admin area so you can easily access it.
