

Magento 2 Custom Forms – new Amasty extension

[Alexandra Zhos](#) Aug 31, 2017

We are happy to introduce you our new Magento 2 extension – [Custom Form](#).

Create different types of forms to effectively collect customers' data. Customize each form with a handy constructor and generate multiple forms in a minute.

NEW MAGENTO 2 EXTENSIONS

CUSTOM FORM

Useful for: **CUSTOMERS' DATA**

Features:

- 15 elements for custom form creation
- Drag-and-drop form constructor
- Make important fields required
- Display multiple forms on one page
- Collect and analyze customer data

With native Magento functionality, you can't create advanced [custom forms](#) without coding. To simplify your life we developed the extension with a custom form constructor that lets you create any web form in minutes. Various input types help you gather and analyze the information of any kind.

MAGENTO 2 CUSTOM FORMS MAIN FEATURES:

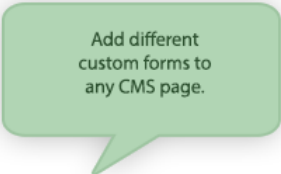

- **Use 15 different input types** for custom form creation
- **Arrange necessary elements in forms** the way you like
- Mark important **fields as required**
- Display **multiple forms per page**
- **Forms settings** like placeholder option, fields validation, different file types support and others

Submit the form to get 5% off
