

Magento 2 Duplicate Categories – new Amasty extension

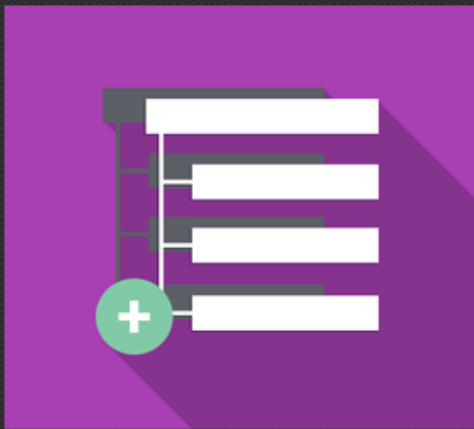

[Alina Bragina](#) Jan 25, 2018

We are happy to present you our new Magento 2 extension – [Duplicate Categories](#).

Streamline product management by saving time spent on duplicating categories and subcategories in multiple store views. Take total control over duplication settings and product relations. Easily search for the category you need to copy and automatically rename it during the duplication.

NEW MAGENTO 2 EXTENSIONS

DUPLICATE CATEGORIES

Useful for: **CATALOG MANAGEMENT**

Features:

- Duplicate categories and subcategories fast
- Copy category assignments for products
- Modify content for duplicate categories
- Save hours on product management
- Duplicate categories in all store views

If you run a multi-store view website, the Duplicate Categories extension will help you save time spent on routine operations. Do away with manual creation of duplicate categories. Create correct category duplicates in seconds without mistakes in settings or spelling. Select parent category and rename categories while duplicating them.

MAGENTO 2 DUPLICATE CATEGORIES FEATURES:

- Create **duplicate categories for multiple store views** in seconds to save your efforts and time spent on assigning products to the same category;
- **Accurately duplicate categories across multiple store views** without any mistakes. Categories that have different names and attributes in different store views will be properly copied;
- **Set parent category for duplicates** in advance;
- **Manage duplicate settings:** select if to copy a category with or without all the subcategories;
- **Copy product relations** or uncheck the option while duplicating to

copy only the category;

- **Find and replace content in a category name**, description, meta keywords, meta description fields while creating duplicates.
