

Magento 2 Elastic Search – new amasty extension

[Alina Bragina](#) Jun 1, 2018

We are happy to present you our new Magento 2 extension – [Elastic Search](#).

Add a precise and incisive search engine to your store. Let users benefit from partial search by any data type. Offer autocomplete suggestions and spelling corrections, as well as multilingual search, to make the process smooth.

ELASTIC SEARCH

Useful for:

SEARCH EXPERIENCE

Features:

- Autocomplete suggestions & spell corrections
- Partial search by SKU, name, attributes, category
- Product attribute weight settings
- Flexible indexing management
- Multi-lingual search

Accuracy and speed are two factors primarily responsible for users satisfaction with a search process. The closer the search results will bring them to elements matching the focus of their query, the faster they'll decide on the purchase. With the Elastic Search extension, you'll optimize your [search performance](#), accelerate the catalog layered navigation and index numerous products simultaneously.

MAGENTO 2 ELASTIC SEARCH FEATURES:

- Use the **advanced auto-complete window and a wildcard partial search** to anticipate users' potential queries;
- Avail of the **spell corrections feature** to avoid no-result pages caused by misspellings;
- Create a **synonyms core with alternative product names** to make sure customers will find the desired products;
- Define **stop words** and exclude them from the search results;
- Point out the **search types for each product attribute** (SKU, name, description) to allow searches with autosuggestions and

autocorrections;

- Use the **‘Boolean Operator’ setting** to specify how the keywords are combined for each product attribute;
- Define **search weight for product attributes**, which is applied to the search algorithm, to give your users more precise results;
- Let your visitors know about the current trends showing a **‘Recent and Popular Searches’ section** in the pop-up;
- Provide users with **categories, CMS, and landing pages links** in the pop-up to direct them right to the desired product;
- Benefit from the **multilingual support** allowing your visitors to search in their native language;
- Customize and adjust the settings to your business needs with the **developer-friendly extension**.
