We are happy to present you our new Magento 2 extension – [Extended Order Grid](#).

Customize several order grid views to let your staff process orders quickly and conveniently. Add and remove columns, hide and show certain types of orders, apply diverse filters, as well as present and export the grid data the way you need.

EXTENDED ORDER GRID

Useful for:

ORDER MANAGEMENT

Features:

- Filter orders by weight, subtotal, discount amount
- Search for orders by customer group, phone or email
- Show product thumbnails on the order grid
- Shipping and payment methods and other info
- Remove particular default columns from the grid

As quick and quality services are crucial to customer satisfaction, your ability to rapidly process orders increases the number of happy customers you get. Magento 2 Extended Order Grid is designed to make order management more efficient. It allows you to tailor several order grids to your needs and enjoy transparent navigation of each.

MAGENTO 2 EXTENDED ORDER GRID FEATURES:

- **Add custom columns to and remove default ones from** the grid to speed up order processing and simplify order management;
- Display must-have columns with **shipping and payment information**, as well as with automatically calculated order weight;
- **Show product thumbnails** to make it easier to navigate the grid;
- **Hide orders with certain statuses** (e.g. pending, canceled) to make the order grid more transparent;
- **Apply filters and search for orders by necessary parameters** (weight, subtotal, discount amount, customer group, phone, etc.) to

prioritize orders;

- **Use several order grid views** to conveniently manage certain types of orders (with particular statuses, related to selected categories, etc.);
- **Export orders data from the grid** to have it always at hand for analysis.
