

New Magento 2 extensions: Extra Fee, Delivery Date, and more

[Alexandra Zhos](#) Nov 16, 2016

NEW AMASTY EXTENSIONS

We continue bombing you with new extensions! In this short article you will get acquainted with 4 modules, that enable you to improve your custom service, manage your store on a more advanced level, and, as a result, receive more loyal and happy customers.

[Extra Fee for Magento 2](#)

NEW MAGENTO 2 EXTENSIONS

EXTRA FEE

USEFUL FOR: CHECKOUT

FEATURES:

- Create an unlimited number of extra fees
- Display fees on cart and checkout pages
- Generate extra fees based on payment and shipping methods
- Determine fees display with flexible conditions

One of the most common ways of encouraging your store visitors to spend more without intrusive pushing them is to offer extra services. Extra Fee for Magento 2 provides an opportunity to create and add fees like gift wrapping, rush delivery, insurance or any other benefits to the checkout and cart pages. You'll see how your average check has increased.

[Delivery Date for Magento 2](#)

NEW MAGENTO 2 EXTENSIONS

DELIVERY DATE

USEFUL FOR: SHIPPING MANAGEMENT

FEATURES:

- Enable buyers to select days and time of delivery
- Specify how delivery data will be displayed on the frontend
- Allow customers to write delivery comments
- Exclude any dates from your delivery plan

Without saying, delivery is one of the key factor that influences customer's choice during online shopping. But even the attractive price can't help you to hold the client if you don't offer flexible and clear delivery conditions. With Magento 2 Delivery Date you will be able to create and optimize your schedule the way you need by excluding non-working days and setting minimum and maximum delivery intervals. The extension allows your customers to leave a comment, choose the day and time period for conveniently receiving their desired orders and getting a positive shopping experience.

[Special Occasion Coupons for Magento 2](#)

NEW MAGENTO 2 EXTENSIONS

SPECIAL OCCASION COUPONS

USEFUL FOR: PROMOTIONS

FEATURES:

- Generate coupons based on multiple events
- Send promo codes to customers automatically
- Choose the date of dispatch and set the expiry period for each coupon type
- Automatically delete unused coupons

Everybody enjoys receiving a personalized coupon or a promo code. Moreover, without them your emails don't seem so valuable and have a risk to get into the spam basket without opening. Time your discounts to a specific occasion like birthday, one year since registration, newsletter subscription or any other event with Special Occasion Coupons extension for Magento 2. Now you can generate customized coupons, dispatch them and keep your promo code base clean and up-to-date.
