

# Magento 2 Generate and Import Coupons – new Amasty extension

[Alexandra Zhos](#) Dec 19, 2016

Please welcome – here's a new Amasty extension, [Generate and Import Coupons](#).

**Reduce time spent on coupon management by generating and importing an unlimited number of promo codes in a couple of clicks. Easily track coupon usage statistics and export codes for your affiliates.**

# NEW MAGENTO 2 EXTENSIONS

## GENERATE AND IMPORT COUPONS

### USEFUL FOR: PROMOTIONS

#### FEATURES:

- Generate and import thousands of coupons per cart price rule
- View and export detailed coupon usage reports
- Provide coupons via URLs
- Use handy coupon templates for accurate codes generation

*We've created a simple but powerful tool to facilitate your coupon management process. Now you can fastly generate, export and import an unlimited number of promo codes, specify coupons by cart price rule and manage them with a customizable template. You may share coupons with your affiliates to increase your sales, and automatically generated code usage reports will help you to control the process.*

## **MAIN MAGENTO 2 GENERATE AND IMPORT COUPONS FEATURES:**

- **Generate coupons in bulk** by specifying necessary coupon parameters.
- **Track coupon usage:** view and export detailed reports.
- **Provide coupons via URLs.**
- **Use handy coupon templates** for accurate codes generation.
- **Offer deals on hosting services** like Groupon and others.
