

Magento 2 Improved Sorting – new Amasty extension

[Ksenia Dobрева](#) Aug 13, 2015

We are happy to present you our first extension for Magento 2 – [Improved Sorting!](#)

Extend Magento 2 built-in functionality with Improved Sorting. Allow your potential customers to find the desired product within seconds. Automatically push bestsellers to the top based on up-to-date product sales.

NEW MAGENTO 2 EXTENSIONS

IMPROVED SORTING

Useful for: **USER EXPERIENCE**

Features:

- Offer each customer a suitable sorting option
- Enable users to view products by options as 'Best Sellers', 'Top Rated', 'Most Viewed' etc.
- Focus on better performing products
- Sort out-of-stock products and items without an image last
- Change sorting order when you need

Improved Sorting for Magento 2 is a very effective tool for store-owners who care about their customers. Increase the usability of your catalog with user-friendly sorting options! Allow your potential clients to browse catalog or categories by any comfortable parameters: best sellers, most viewed, top rated, new and in wishlist.

MAGENTO 2 IMPROVED SORTING MAIN FEATURES:

- **Sort products by various parameters**, such as 'Biggest Saving', 'Bestsellers', 'Top Rated', 'Now in Wishlists', and more;
- **Manually manage the order of products** in 'Bestsellers' and 'Most Viewed' lists. If you need to move some items up to sell them quicker, you can do it in a few clicks;
- **Display** out of stock products and products with zero quantity **at the end of the product list**. If you allow backorders, some products may have inventory status 'In Stock', even if their quantity is zero. You can display such products at the end of the product list when needed;
- **Set** sorting by **any of the new options as default**. You can make

any of the new sorting options default both at the catalog and category levels.

ADVANCED OPTIONS

You can disable any of the new sorting options both at the catalog and category level;

The extension enables customers to apply all sorting options to product lists generated by layered navigation;

Optional indexing ensures your category pages are loaded fast even if you have a very large catalog;

For EE users: the extension supports MySQL Fulltext search engine
