

Magento 2 Multiple Coupons – new Amasty extension

[Ksenia Dobрева](#) Nov 3, 2015

We are pleased to inform you about our new Magento 2 extension – [Multiple Coupons](#).

Increase customer loyalty by enabling registered clients and guest visitors use numerous discount coupons for one order.

NEW MAGENTO 2 EXTENSIONS

MULTIPLE COUPONS

Useful for: **MARKETING**

Features:

- Allow guest visitors to use multiple coupons
- Display the list of applied coupons in the shopping cart and checkout
- Limit usage of specific coupons together with other promo codes
- Apply/remove multiple coupons when creating orders in admin panel

Out of the box, Magento doesn't allow your customers to apply more than one coupon. But this functionality is needed to help your sales and customer loyalty. Thus, in case a customer has his birthday coupon and receives another coupon from a holiday deal, he can apply both of them. Using two and more coupons makes an impression of a very attractive purchase, which raises the chances of a decision to buy.

MAGENTO 2 MULTIPLE COUPONS FEATURES:

- Let your customers **apply all available promo codes to one order** and achieve a maximum possible discount;
- Enable multiple coupon options not only **for registered customers** but for **guest visitors** as well;
- Display **the list of active codes** on the shopping cart and checkout pages;
- Clearly show the discount customers get after a promo code application. Allow them to **easily apply/remove certain coupons** right on the shopping cart page, during checkout;
- Specify the **coupon codes** that can be **used only individually**;

- Apply/remove **multiple coupons** when creating **orders from the backend**.
