

Magento 2 Order Notes – new Amasty extension

[Pavel Ponomarenko](#) Jun 7, 2017

We are happy to introduce you the new Magento 2 extension from Amasty – [Order Notes](#).

Optimize your order management by creating order notes and marking them with colored flags, badges and other labels. Now you can visualize the order processing and easily arrange numerous items of your order grid.

NEW MAGENTO 2 EXTENSIONS

ORDER NOTES

Useful for: **ORDER MANAGEMENT**

Features:

- Add important notes and process orders efficiently
- Organize and prioritize orders
- Mark orders with flags or badges to recognize a priority at a glance
- Automatically add labels to orders based on their order status

Managing the orders takes a lot of nerve. Instead of using various external platforms to arrange your orders, enhance your Magento with the extension that allows organizing a vast amount of orders and comments. Use flags and priorities to visualize your work and have a better understanding of the current order processing.

MAGENTO 2 ORDER NOTES:

- Work with notes to **process orders more efficiently**
- Set **priority** for each order
- **Apply flags** and badges to arrange orders visually
- **Automatically add labels** to the orders depending on their status
- **Arrange** all items **in bulk**
