

Magento 2 Product Parts Finder – new Amasty extension

[Ksenia Dobрева](#) Mar 24, 2016

Please meet the new Magento 2 extension from Amasty – [Product Parts Finder](#).

Equip your store with an advanced search option. Let customers easily find necessary repair parts and components by placing year-make-model and other additional product filters on your website.

NEW MAGENTO 2 EXTENSIONS

PRODUCT PARTS FINDER

USEFUL FOR: ADVANCED SEARCH

FEATURES:

- Create year-make-model and similar filters
- Show part finders on home and category pages
- Add multiple selection options to each filter
- Import values for finder options
- Customize filter display

Do you sell spare parts or accessories for any tech industry? Then a simple product parts finder is a must have tool for your Magento store. It lets users easily search for the necessary products using [Magento 2 product filter](#) and find the items they want fast and easy.

- Show product finders **on category and home pages**
- Make use of **universal products** which are shown in search regardless of the finder filters selection
- **Design the finder blocks** according to your needs: choose orientation, position, choose or design your own selector templates, and more
- **Use CSV import** and numerous settings to configure your product finders fast and easy even with a big number of products
- The extension was optimized **to work with large (10k+ products) catalogs**

Apart from basic options, the extension has several additional features, such as redirecting to the relevant category, unique URLs for search results, and more.
