## [Quick AJAX Login](#)

Registration is an Achilles' heel of many Magento stores: sometimes it's too long, sometimes it requires too many details, so plenty of customers opt it out and choose an online Magento store with some easier requirements. In the era when [social networks](#) are a king, [Quick AJAX Login](#) is a must-have for any store that wants its customers to feel comfortable and spend their time on buying, not filling in tons of forms. This Magento extension works perfectly for any type of store and provides a great variety of options, including page redirect and connection of store account to the chosen social network.

## [Advanced Permissions](#)

[Advanced Permissions](#) is a real savior for owners of multi-vendor, multilingual and simply large Magento stores. It provides you with a handy tool for improving its business workflow and managing all the people working with your online shop. Forget about mess, wrong products management and accidental mistakes. With this Amasty Magento extension you will be able to create special roles with specified options for every user, limit access to certain products and categories and a lot more. Manage roles quickly and let your staff operate only that part of store they really need.
