

Magento 2 Store Locator – new Amasty extension

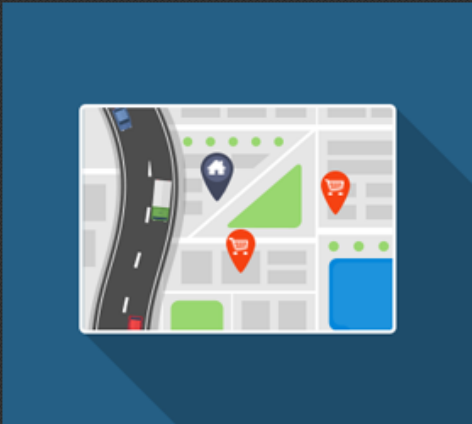

[Ksenia Dobreva](#) May 20, 2016

Please meet the new Magento 2 extension from Amasty – [Store Locator](#).

Let customers quickly find the nearest offline stores with your products by displaying them on a handy Google map. Specify additional information for each store location to maximally streamline shopping process.

NEW MAGENTO 2 EXTENSIONS

STORE LOCATOR

Useful for: **USER EXPERIENCE**

Features:

- Import GEO IP data
- Display additional info for each store location
- Assign products or categories to store locations
- Upload images for any store location
- Highlight store clusters with different colors

This extension is designed to improve the omnichannel experience you're providing to your customers. A text list of available stores is no longer an option for e-commerce: you also need to show the map, to help the user find the nearest store, and to make these instruments convenient and user-friendly. Magento 2 Store Locator from Amasty serves that purpose gracefully!

MAGENTO 2 STORE LOCATOR FEATURES:

- Let customers find the **closest brick-and-mortar stores**;
- Give them a possibility to **narrow the search** by setting the radius and distant units (kilometers/miles);
- Easily **create and display a limitless number of physical store locations**;
- Use the **'Preview' option** on the backend map **to check the locations are tidily arranged**;
- **Define geo coordinates either** specifying longitude and latitude **manually or using the 'Auto Fill' option**;
- **Assign specific products to definite store locations.** The link

to matching store location will be added to the product page;

- Don't overload the map, use **clustering for neighbored stores**;
- **Customize locator page** with unique title, Google mark template, user-friendly URL, etc.;
- Detect store visitors' location with the **'Browse location' feature**; **download/import** a ready-made **CSV file with GEO IP data** or use the options together.
