

Magento 2 Store Switcher – new Amasty extension

[Alina Bragina](#) Jan 18, 2018

We are happy to present you our new Magento 2 extension – [Store Switcher](#).

Automatically switch customers from different countries to a relevant store view. Supply them with suitable currency and language. Make shopping comfortable for clients and bring your store to the international level.

NEW MAGENTO 2 EXTENSIONS

STORE SWITCHER

Useful for: **USER EXPERIENCE**

Features:

- Guide international customers to the corresponding store version
- Set appropriate language based on customers' location
- Show all prices in shopper's local currency
- Utilize users' IP addresses to detect their location
- Disable automatic redirection for certain IP addresses

Integrated Magento functionality doesn't allow for effective service provided to customers of different geo-locations. With the Store Switcher extension, you will manage to use customers' IP to automatically direct them to a relevant store view. Localize your website internationally to gain global market share.

MAGENTO 2 STORE SWITCHER FEATURES:

- Automatically **switch visitors to a relevant store view** by using their IPs;
- Provide foreign visitors with the **native language and currency (prices)**;
- **Enable automatic currency switcher** by adding currency for each country you need in the backend;
- **Configure redirects from different countries** to specific URLs in the backend;
- **Allow visitors to switch store views manually** or choose to redirect users for the first visit only;
- Direct visitors to **pages with geo-specific information**: shipping

restrictions for their location, taxation, localized product information, etc.;

- **Keep specific URLs/pages unvaried** for all store views;
- Create a list of **IP addresses which are to be ignored** by the module.
