

Magento 2 XML Google Sitemap – new Amasty extension

[Alexandra Zhos](#) Mar 30, 2017

We are happy to introduce you our new Magento 2 extension – [XML Google® Sitemap](#).

Automatically generate XML Sitemaps in an efficient way. Let your web store communicate with the search engines quickly and properly.

NEW MAGENTO 2 EXTENSIONS

XML GOOGLE® SITEMAP

Useful for: SEO

Features:

- Index your content **much faster**
- Include or exclude various types of pages
- Specify frequency of updates for each type of pages
- Set priority of importance for group of links
- Add images with titles and templates

A sitemap is a guidebook to your store for search engines. But with default Magento 2 settings it's hard to customize it without additional advanced options. The module helps you to meet all Google requirements, build your XML sitemap automatically and shorten the time for indexing in search.

MAGENTO 2 XML GOOGLE® SITEMAP:

- Index your content **much faster**
- **Include or exclude links** from Category, Product, CMS pages or Extra links;
- **Specify frequency of updates** for each type of pages
- **Set importance priority** for group of links
- **Add images** with titles and templates
- **Use a handy grid** with all sitemaps in one place

Manage Google XML Sitemaps
