For more details see the [Advanced Permissions](#) extension page.

Guide for Advanced Permissions

Distribute permissions for the backend users to provide them with limited access to products, categories, store views, and websites editing. Separate duties between the admin users of your store. Set specific roles for vendors, category managers, etc.

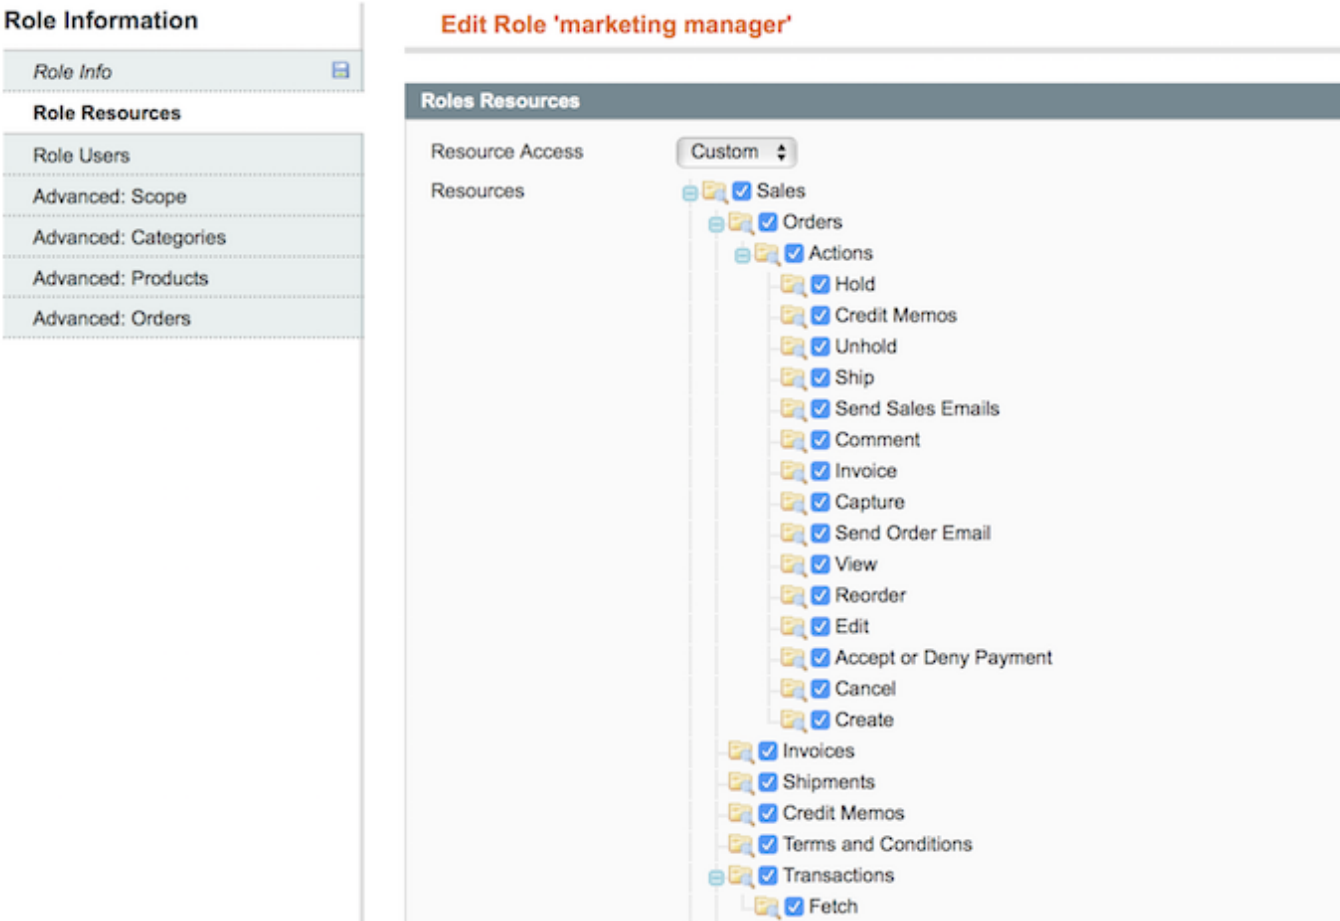

- Limit access by store view and website
- Distribute product and category management
- Quickly assign and duplicate roles
- Implement additional user roles
- Fully compatible with other extensions

Creating a new role

To create a user with the advanced permissions you will need to create a role first. Go to **System → Permissions → Roles** and click the **Add New Role** button.

The screenshot displays the 'Edit Role' interface for a role named 'marketing manager'. On the left, a sidebar titled 'Role Information' contains a 'Role Info' tab and a list of tabs: 'Role Resources', 'Role Users', 'Advanced: Scope', 'Advanced: Categories', 'Advanced: Products', and 'Advanced: Orders'. The main content area is titled 'Edit Role 'marketing manager'' and features a 'Role Information' section with a 'Role Name' field containing the text 'Marketing Manager'.

Then, specify the name of the role and switch to the Role Resources tab.

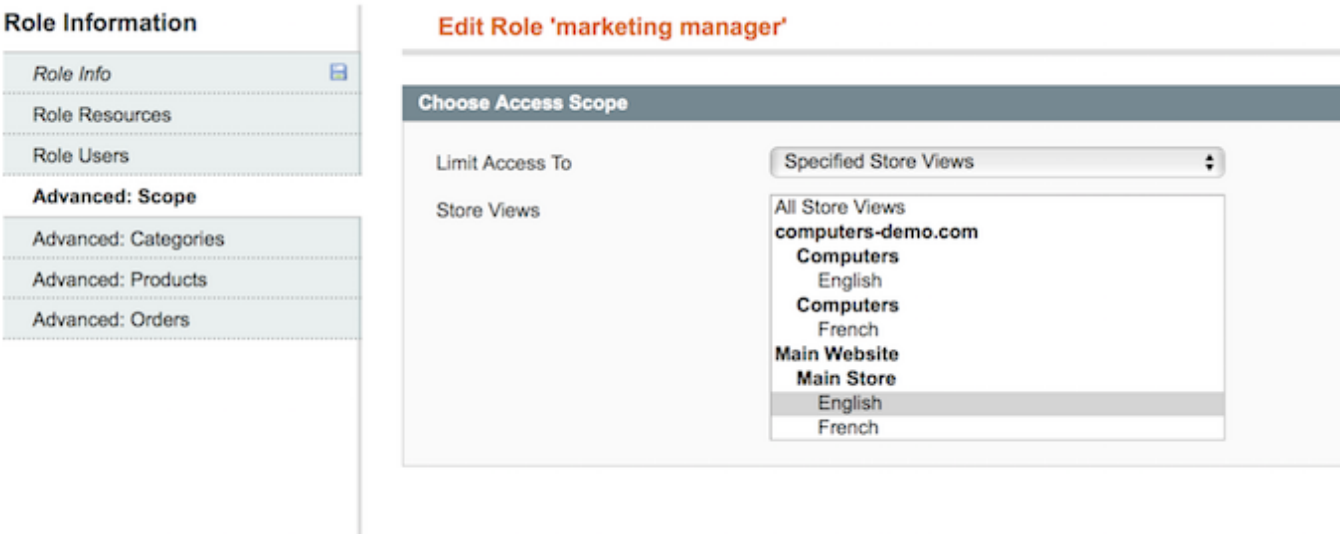

Here you need to select resources the admin user will have the access to.

You can allow to delete categories and products for sub-admin users.

With the **Allow to view/edit product owner** setting you can change the product owner.

Advanced Permissions: Scope

At the **Advanced Permissions: Scope** tab you can specify website or store view the sub-admin will

have the access to. Choose Store View or Website from the Limit Access To dropdown and select particular store views or websites below.
