

amasty

For more details see the [Custom Form](#) extension page.

Custom Form

Create web forms to analyze your target audience. Easily collect additional info and create an e-mail database.

General Settings

General

To configure the extension, go to **Admin Panel → CMS → Custom Forms**

Allowed File Extension - Specify available formats for files that should be uploaded.

Specify **Max File Size** for upload in megabytes(*mb*).

Autodetect File Mime Type on Download - Automatically detect file types.

Notification

Enable Notification to email - Allow the extension to send notifications.

Send Emails To - Specify an e-mail to receive the submitted data.

Custom Forms

Notification

Enable Notification to email	<input type="text" value="Yes"/>
Send Emails To *	<input type="text" value="owner@example.com"/>
Email Sender	<div><input type="text" value="General Contact"/><ul style="list-style-type: none">General ContactSales RepresentativeCustomer SupportCustom Email 1Custom Email 2</div>
Email Template	<input type="text" value="Custom Forms Notification (Default Template froi"/>
Format Date	<input type="text" value="Y-m-d"/>

CAPTCHA

Enable CAPTCHA - Set to Yes to enable CAPTCHA.

If you plan to use CAPTCHA in your forms, remember to specify the parameters of symbols. The following fields are mandatory.

CAPTCHA Timeout (minutes) - Specify a timeout in minutes.

Number of Symbols - Specify the number of symbols, eight symbols maximum.

Symbols Used in CAPTCHA - Specify symbols.

Use either letters or numbers, no spaces, lookalike symbols (e.g. *i,l,1*) decrease chance of correct recognition.

Case Sensitive - Set to Yes, to make CAPTCHA Case sensitive.

Custom Forms

Notification

CAPTCHA

Enable CAPTCHA

CAPTCHA Timeout (minutes) *

Number of Symbols *
▲ Please specify 8 symbols at the most. Range allowed (e.g. 3-5)

Symbols Used in CAPTCHA *
▲ Please use only letters (a-z or A-Z) or numbers (0-9) in this field. No spaces or other characters are allowed. Similar looking characters (e.g. "l", "1", "1") decrease chance of correct recognition by customer.

Case Sensitive

How to create new fields

To configure and create custom Forms, Fields or Submitted Data, go to **Admin Panel → CMS → Custom Forms → Fields**

Here all your custom fields are listed. You can edit each of them whenever you need.

Dashboard Sales Catalog Customers Promotions Newsletter **CMS** Reports System

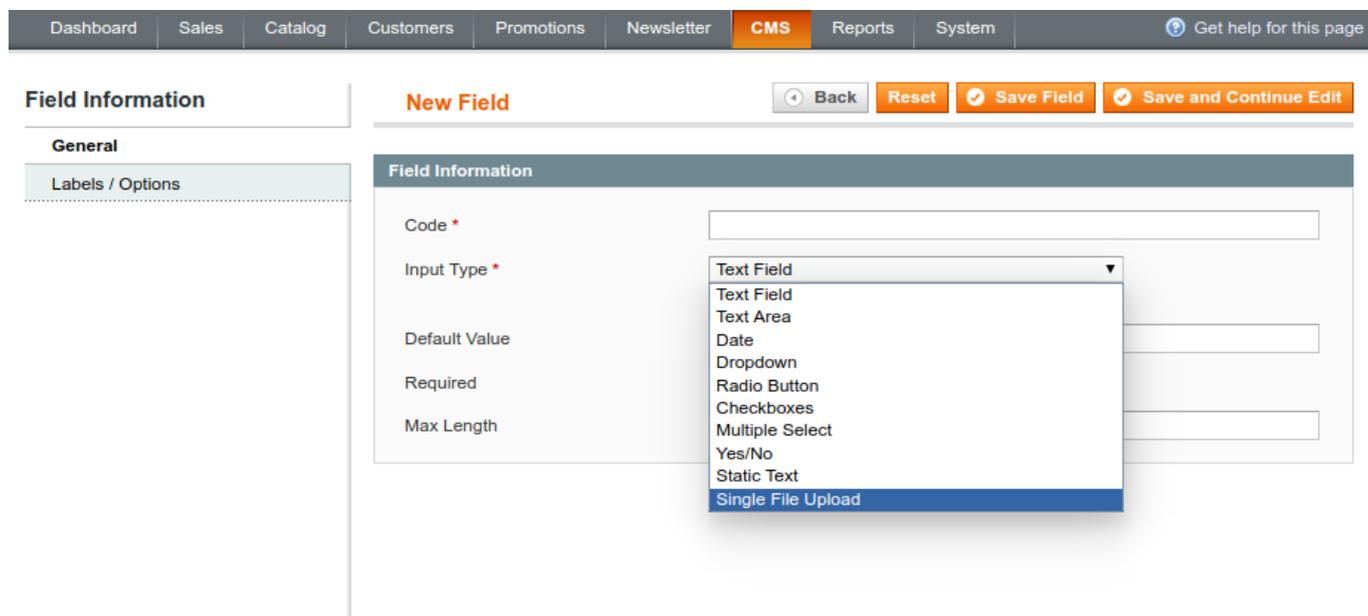

Field Management + Add New

Page 1 of 1 pages | View 20 per page | Total 11 records found Reset Filter Search

ID	Code	Label	Action
11	file	Upload file	Edit
10	email	email:	Edit
9	special_offers	Fill in and get special offers	Edit
8	coupon	To get 5% discount coupon	Edit
7	tell_us_more	Tell us more about yourself!	Edit
6	card_holder	Are you our discount card holder?	Edit
5	items_of_interest	Items of interest	Edit
4	gender	Gender	Edit
3	date_of_birth	Date of Birth	Edit
2	suggestions	Your suggestions for improving our service:	Edit
1	name	Full name	Edit

Add New - To create a new field click *Add new* button

Types of fields

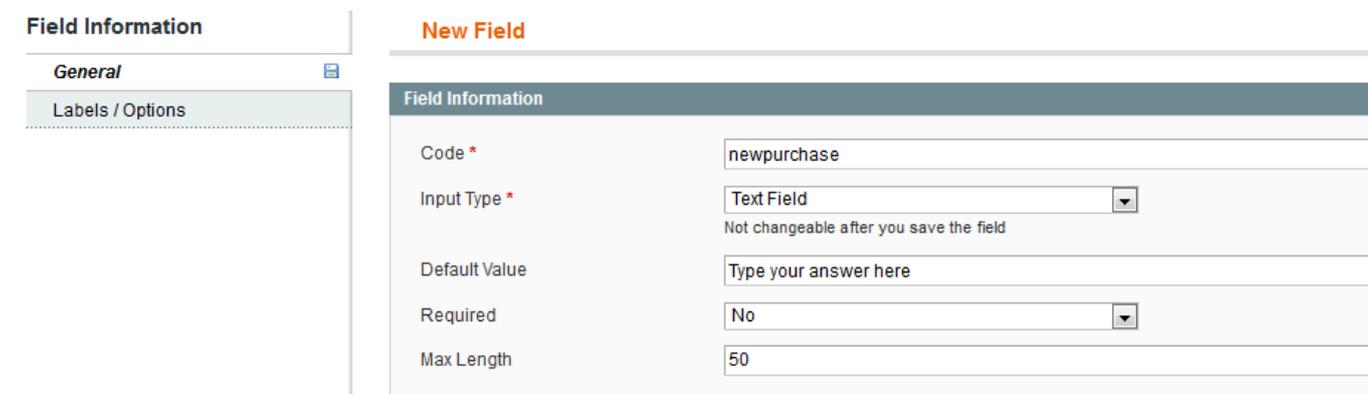

Code - Specify an identifier for your field, for internal use.

Input Type - Select a type of input for your form. Notice that it cannot be changed, after the field is saved.

Static Text type of input can not be changed.

Options for *Dropdown*, *Checkboxes*, *Multiple Select* and *Radio Buttons* types of input are identical.

Single file upload - Offer a field to upload files.

Default Value - Specify the text by default in this field.

Max Length - Specify the max length of the field (in symbols).

Notice that *Text Area* type of input allows to use more symbols than *Text Field*.

Admin	English	French	German
admin new purch	eng new purch	fr new purch	de new purch

Field Information

Code *

Input Type * Not changeable after you save the field

Required

CMS Pages

CMS Embedding Code

```

{{block type="amcustomform/form" name="amcustomform.form" form_id="4" focus="1"}}

```

Copy this code into CMS Page Editor to insert form into any CMS page.

Templates

Template Embedding Code

```

<?php echo Mage::app()->getLayout()->createBlock('amcustomform/form', 'amcustomform.form', array('form_id' => 4, 'focus' => 1))->toHtml() ?>

```

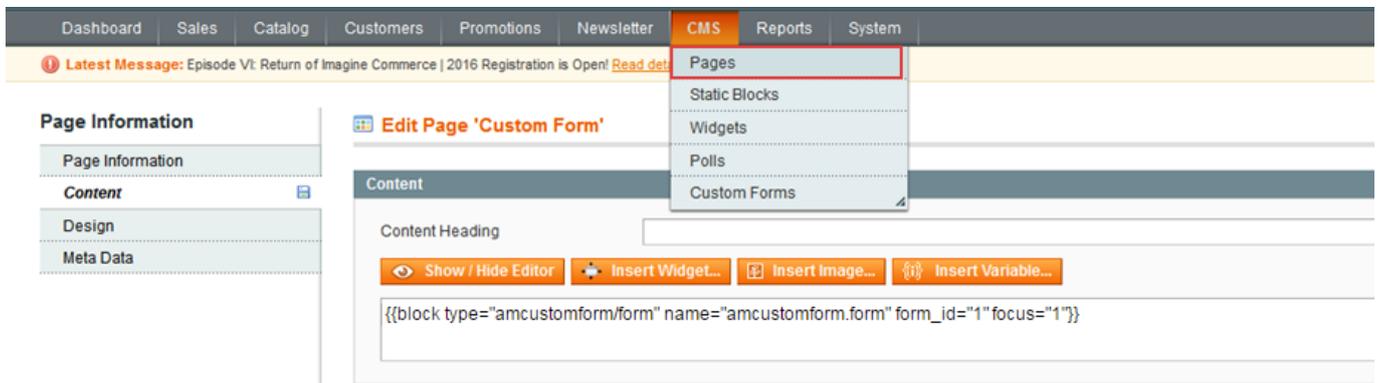

Insert this code into *.phtml template directly to display form in any block.

CMS Embedding Code - Use the code to add your newly created form to CMS.

Use focus="1" to activate the form right after the customers load the page.

Use focus="0" not to activate the form right away. (e.g. the form is at the bottom of the product page - and the customers have to check the product info first and then go to the form).

To add your newly created form to your site, go to **Admin Panel → CMS → Pages**. Paste the code of a custom form in *Content* field .

Submitted Forms' Data

The screenshot shows the Magento Admin Panel navigation bar with the 'CMS' menu item highlighted. A dropdown menu is open under 'CMS', showing options: Pages, Static Blocks, Widgets, Polls, Custom Forms, Fields, Forms, and Submitted Data. The 'Submitted Data' option is highlighted with a red box. Below the menu, the 'Submitted Form Data' table is visible. The table has columns for ID, Form Code, Form, and Store. It shows a list of submitted forms with their respective IDs and codes.

ID	Form Code	Form	Store
36	igor	Admin IGor	Main Website Madison Island English
35	igor	Admin IGor	Main Website Madison Island English
34	experirnce	admin form	Main Website Madison Island English
33	experirnce	admin form	Main Website Madison Island

To view saved data of custom forms go to **Admin Panel → CMS → Custom Forms → Submitted Data**

View detailed info from each custom form right from the admin panel.

The screenshot shows the detailed view of a submitted form. The navigation bar is at the top with 'CMS' highlighted. Below it is a 'Submit' button. The form details are as follows:

Form: igor
Submitted: 2015-10-12 14:14:40
Ip: 192.168.100.173
Customer: Not provided

Field	Value
name	Jane Clarks
mail	jane@example.com
country	en2
call	Yes
phone	212-555-7575
comment	Please, contact me as soon as possible

Export forms' data via CSV file

To export custom forms, check the desired form on the grid, and click **Export**.
