# Guide for Extended Order Grid

Add more functionality and flexibility to Magento order grid. The Extended Order Grid extension provides you with the ability to add extra columns, utilize the advanced filtering, and save grid templates to switch the order grid view in a few clicks.

- Display additional data on the grid
- Search and sort data by additional parameters
- Add product thumbnails to the grid
- Shipping and payments on the grid
- Exhaustive product information right on the grid

## Extension Configuration

To configure the extension, please, go to **System → Configuration → Extended Order Grid**.

**General Settings**

Max products display per order on the grid	<input type="text" value="2"/>	[GLOBAL]
▲ By default, the data on order grid is shown for maximum 5 products per order. Please specify the number which suits you best. All product data can be seen in a popup.		
Hide Configurable Parents	<input type="text" value="Yes"/>	[GLOBAL]
▲ If to hide parent products for configurable items		
Hide orders with statuses	<div><div>Canceled</div><div>Closed</div><div>Complete</div><div>Suspected Fraud</div><div>On Hold</div><div>New Order Status</div><div>Payment Review</div><div>PayPal Canceled Reversal</div><div>PayPal Reversed</div><div>Pending</div></div>	[STORE VIEW]

**Max products display per order on the grid** — limit the number of products to display on the grid from orders;

**Hide Configurable Parents** — choose **Yes** to hide configurable parent product's attributes from the order grid;

**Hide orders with statuses** — hide orders from the grid with the defined statuses.

## Order Grid Configuration

To add new columns to the order grid, please, go to **System → Amasty Extended Order Grid**.
