# Free Shipping After Discount

The Free Shipping After Discount module provides free shipping based on the cart subtotal after a promo code or a discount rule application.

- Apply free shipping to a cart subtotal after discount
- Take shipping calculations over total control
- Configure the module in one click

## Settings

To enable the extension please go to **System** → **Configuration** → **Shipping Methods** → **Free Shipping**.

### Shipping Methods

**Order Amount After Discount** - set this option to 'Yes' to disable a free shipping method after a discount.

In our example the minimal order amount equals to \$100. It means that if after a coupon application a cart subtotal decreases to \$99 or less, the Free Shipping method will be disabled.

## Frontend examples

In this example the module is disabled and the "Free Shipping" method is available even after a coupon application.

The screenshot displays a shopping cart with a 'HERALD GLASS VASE' (SKU: hddooo) priced at \$110.00. A coupon code '25off' has been applied, reducing the subtotal to \$82.50. The shipping and tax estimation section shows the location as Birmingham, Alabama, with a ZIP code of 35005. The 'Free Shipping' method is selected, showing a cost of \$0.00. An overlay window titled 'Free Shipping' is open, showing configuration options: 'Enabled' is set to 'Yes', 'Title' is 'Free Shipping', 'Method Name' is 'Free', 'Minimum Order Amount' is '100', and 'Order Amount after Discount' is 'No'. An orange arrow points from the 'Free Shipping' method in the shipping options to the 'Free Shipping' overlay window. The grand total is \$89.31.

When the extension is switched on, customers won't be able to use the 'Free Shipping' method when after a discount the cart value gets lower than the specified minimal order amount.

## SHOPPING CART

PROCEED TO CHECKOUT

Coupon code "25off" was applied.

PRODUCT	PRICE	QTY	SUBTOTAL
