# Guide for GDPR

Make your store compliant with the latest EU's GDPR and other legislative requirements. Create and manage privacy policy documentation, add consent checkbox to the registration and checkout pages, and send email consent requests.

- Collect consents with the privacy policy
- Manage privacy policy documentation
- Send consent requests for customers with and without consents
- Track privacy policy related activity in the actions log
- Approve or deny requests to delete users' accounts

## Extension Configuration

To configure the extension, please, go to **System → Configuration → Amasty Extensions → GDPR**.

### General

The screenshot shows the 'General' configuration tab for the Amasty GDPR extension. It contains two main settings:

- Forbid a customer's personal data anonymization for orders in certain statuses:** A dropdown menu is set to 'Yes'. A tooltip explains: 'If enabled, orders in certain statuses will not be allowed to anonymize personal data from by a customer and by admin roles.' A '[STORE VIEW]' link is visible to the right.
- Order Statuses:** A multi-select dropdown menu lists various order statuses: Canceled, Cancelled Ogone, Closed, Complete, Declined Ogone, Suspected Fraud, On Hold, Payment Review, PayPal Canceled Reversal, and PayPal Reversed. A tooltip explains: 'Orders with selected statuses will not be allowed to anonymize personal data.' A '[STORE VIEW]' link is visible to the right.

**Forbid a customer's personal data anonymization for orders in certain statuses** — enable

this option to forbid the anonymization process for certain order statuses;

**Order Statuses** — select order statuses to forbid the anonymization action when the order is in certain statuses.

## Enable or Disable the Privacy Settings Section

Anonymize Personal Data For Guest	<input type="text" value="Yes"/> ▼ ▲ A guest will not be able to anonymize order data if disabled	[STORE VIEW]

In the **Enable or Disable the Privacy Settings Section** you can adjust which privacy settings should be available to customers.

**Don't Sell My Personal Information** - if disabled, a customer will not be able to give consent to sell personal data.

The feature is developed to help store owners comply with the CCPA requirements.

**Download Personal Data** - set to *Yes* to allow users to download all their data in CSV spreadsheet.

**Anonymize Personal Data** - set this option to *Yes* to enable users to anonymize their data.

**Delete Account** - set to *Yes* to allow registered customers to create a request to delete their profile via a personal account.

**Anonymize Personal Data for Guest Users** - set to *Yes* to enable order data anonymization for Guest users.

**Display Only for EEA Countries** — enable this options to display a privacy policy consent checkbox only for users from the European Union countries. When the field is enabled, you can multi-select the

needed countries manually.

To make this option functional, the Geo IP Data module should be configured.

**Consent Text** — specify the consent text that will be displayed after the checkbox. You can use the HTML to add links or other custom info.

**Display at Registration** — set to *Yes* to add a privacy policy consent checkbox to the registration page.

**Display at Checkout** — *Yes* to enable a privacy policy consent checkbox to the checkout page.

**Display at Newsletter Subscription** — change to *Yes* to enable a privacy policy consent checkbox to the subscription form;

**Display at Contact Us** — set to *Yes* to add a privacy policy consent checkbox to the contact us page.

The GDPR extension is fully compatible with the Amasty One Step Checkout module.

On the grid, you can see all actions performed by store users regarding privacy policy consents and the GDPR-related account management. Such actions include: giving the consent, data

anonymization, delete requests, etc. It is highly helpful, as the module also tracks the IP address and date and time of action to help you timely catch fraudulent activities.

## Manage Customers (CCPA)

On the **Manage Customers** grid you can view and filter all customers by their consent to sell personal info or not. The extra 'Don't Sell My Personal Information' column is added to the grid by the extension.

The screenshot shows two panels from a web interface. The top panel, titled 'Download and Import', shows a progress bar with three stages: 'Download' (grey circle), 'Import' (green circle with checkmark), and 'Completed' (green circle with checkmark). Below the progress bar, the text 'Last Imported: 2019-04-01 07:56:05' is visible. The bottom panel, titled 'Import', shows a progress bar with two stages: 'Import' (grey circle) and 'Completed' (green circle with checkmark). Above the progress bar, the text 'Last Imported:' is followed by three lines of file paths, each with a red 'X' icon: 'var/amasty/geoip/GeoLite2-City-Blocks-IPv4.csv', 'var/amasty/geoip/GeoLite2-City-Blocks-IPv6.csv', and 'var/amasty/geoip/GeoLite2-City-Locations-en.csv'. Both panels have a '[STORE VIEW]' link in the top right corner.

Databases are required for the correct work of the GDPR module. Also, you need to install [php bcmath](#) or [gmp](#) extension on your server.

You can get the databases automatically or import your own data.

Hit the **Download and Import** button to make the extension download the updated CSV dump file and import it into your database automatically.

To import the files from your own source, use the **Import** option. Path to the files should look like this (the part 'var/amasty' should be replaced with your folders' names):

```
var/amasty/geoip/GeoLite2-City-Blocks-IPv4.csv  
var/amasty/geoip/GeoLite2-City-Blocks-IPv6.csv  
var/amasty/geoip/GeoLite2-City-Locations-en.csv
```

In the Import section, the **Import** button is greyed out by default. It will be available right after you upload the CSV files. The red error notification will switch to green success notification when the import is completed.

**Anonymise personal data**

Anonymising your personal data means that it will be replaced with non-personal anonymous information and before that you will get your new login and password to your e-mail address. After this process, your e-mail address and all other personal data will be removed from the website.

I agree and I want to proceed

**Delete account**

Request to remove your account, together with all your personal data, will be processed by our staff.

Deleting your account will remove all the purchase history, discounts, orders, invoices and all other information that might be related to your account or your purchases.

All your orders and similar information will be lost.

You will not be able to restore access to your account after we approve your removal request.

I understand and I want to delete my account

From this page, customers can:

- Forbid to sell personal information;
- Download all their personal data in the CSV format;
- Anonymize their personal information;
- Request for account removal.

After customers select any option, they will be required to enter the account password to prove the

identity. Such an option is designed to prevent account deletion or anonymization by accident.
