For more details see the [Gift Card](#) extension page.

Gift Card

Enable customers to buy gift cards and send them to friends via email or by post. Create an unlimited number of gift cards with different pricing models and keep track of all purchased certificates.

- Create gift cards with fixed or open amount price types
- Easily generate and upload gift codes
- Send gift certificates via email or post office
- Keep track of all purchased gift cards
- Offer stunning gift card templates

How do gift cards work?

- Gift card is an alphanumeric code, consisting of letters and numbers, like BIRTHDAY_DF627. It can be applied at the cart/checkout to cover the order total
- These codes are grouped in code pools: Birthday cards, Christmas cards, etc. You can name them as you want. Before selling gift cards, you need to create a code pool for your campaign
- In the catalog, gift card is represented as a custom product type. A customer can buy this product and get the code. You can allow customers to use gift cards they bought for themselves
- Gift card is always linked to the code pool. Code pool should be generated first, then a product is linked to the pool
- A gift card code becomes activated after the order invoiced only. If the order is not paid, a customer will not be able to apply a gift card
- To track the balance of a particular voucher, Gift Code Accounts are issued. The store manager can adjust the balance manually

How do I ship my gift cards?

- Gift Card as a product in your catalog may be virtual, printed or combined
- A virtual gift card is just an email-sent code like virtual and downloadable products, it has no weight, there is no physical inventory and it cannot be shipped
- When gift card is printed or combined, it means the code is being printed on a sheet of paper and delivered. The delivery flow is standard like for simple products
- Amasty Gift Card does not cover printing issues, we offer only tracking tools

Magento™ is

Amounts - here you can specify different price ranges for your gift cards.

Allow Open Amount - Set the option to 'yes' to enable customers to specify their own gift card value.

Open Amount Min Value and **Open Amount Max Value** - specify min and max value limits.

Price equal to - choose **the whole card amount** and the gift card value will be equal to its price. If you want to make gift carts value higher then it's price, choose **percent of the card amount** and specify a particular percent.

Specify percent - specify the percent of the card value. E.g. If the Card value is 100 and you specify 125 percent in this tab, the card price will be equal to 125. It's also possible to make a gift card price lower then it's value: for example, if you set 90 and the cart value is 100, your customer will by the gift card for \$90.

Gift Card Information

The screenshot shows the Magento Admin interface for configuring a new gift card product. The top navigation bar includes 'Dashboard', 'Sales', 'Catalog' (selected), 'Customers', 'Promotions', 'Newsletter', 'CMS', 'Reports', and 'System'. The left sidebar shows 'Product Information' with sub-items: General, Prices, Meta Information, Images, Design, Gift Options, Gift Card Information (selected), Inventory, Websites, Categories, Related Products, Up-sells, Cross-sells, and Custom Options. The main content area is titled 'New Product (Default)' and contains the 'Gift Card Information' section. This section has a 'Create New Attribute' button and the following settings:

- Card Type ***: Virtual (dropdown), [GLOBAL]
- Lifetime (days)**: 0 (input), [GLOBAL]. Includes a checkbox for 'Use Config Settings'.
- Allow Message**: Yes (dropdown), [STORE VIEW]. Includes a checkbox for 'Use Config Settings'.
- Email Template**: Default Template from Locale (dropdown), [GLOBAL]. Includes a checkbox for 'Use Config Settings'.
- Choose gift card code set ***: Code Set 1 (dropdown), [GLOBAL]
- Choose gift card images**: A list of image options including 'Happy Birthday Gift Card' (selected), 'Thank you!', and 'From me to you', [GLOBAL]

Card Type - Specify gift card type: virtual, printed, combined (includes both types).

Lifetime (days) - You can specify the certificate lifetime for each particular gift card product or use the configurable settings

Allow Message - Set the option to 'yes' to enable customers to write greeting messages for gift certificates.

Email Template - Specify an email template you want to use for gift card emails or choose configurable settings.

Choose gift card code set - Specify which gift card code set you want to use for each particular gift card product. (Customers > Gift Cards > Gift Card Codes)

Choose gift card images - Specify gift card images available to customers on the gift card product page.
