For more details see the Google Invisible reCaptcha

Guide for Google Invisible reCaptcha (Captacha Registration)

Add Google Invisible reCaptcha to any forms on your website easily. The module enables you to protect your store from bots without any coding.

- Manage your captcha settings in one place
- Make changes without digging into a website code
- Protect your store with the latest security option

Google invisible reCaptcha protects your store from spam and frauds while letting real customers pass through easily. But anyway Captcha integration takes time and coding effort. To minimize your developer's work, we create Invisible Captcha solution. Now it's enough just to fill some settings fields to secure your store.

General Settings

To get the access to the Invisible reCaptcha settings please go to **System** \rightarrow **Configuration** \rightarrow **Amasty Extensions** \rightarrow **Google reCAPTCHA** and expand the **General** section.

O Adding reCAPTCHA to your site

+ Keys

Site key	Secret key
Use this in the HTML code your site serves to users.	Use this for communication between your site and Google. Be sure to keep it a secret.
41.63ma003AAAAA1133777yn.708a-ugw@?puitj303y82	45.61ex108444481et_864-854e11g110102e30cg

- Step 1: Client side integration

Paste this snippet before the closing </head> tag on your HTML template:

<script src='https://wnw.google.com/recaptcha/api.js'></script>

Paste this snippet at the end of the <form> to create a button protected by the Invisible reCAPTCHA. You will need to create a callback function to handle the result.

The Invisible reCAPTCHA documentation site provides more details and advanced configuration options.

Step 2: Server side Integration When your users submit the form where you integrated reCAPTCHA, you'll get as part of the payload a string with the name "g-recaptcha-response". In order to check whether Google has verified that user, send a POST request with these parameters: URL: https://www.google.com/recaptcha/api/siteverify secret (required)

Go back to the backend of the module.

Paste the Site key and the Secret key in the General settings tab.

Hit the Save Config button to complete Magento captcha registration.

IP whitelist — Captcha won't be displayed for the following IPs in the list. Each IP must be on a new line.

Google reCAPTCHA for Backend

Enable Google reCAPTCHA for Backend to open the list of settings.

Google reCAPTCHA for Backend			
Enabled	Yes You need fill Keys for Checkbox Type of Captcha to use Captcha for the Backend.	T	[GLOBAL]
Test Mode	Yes Please use this setting first time after configuration to be sure the extension configured correctly 	•	[GLOBAL]
Language	 en Please leave empty to allow Google to detect a language of user agent or please set needed value from the following list of <u>languages</u> 		[GLOBAL]

Type — select the appropriate type of Captcha (V2 Invisible, V2 Checkbox, V3)

Captcha Version 3 Score - (only for V3) reCAPTCHA v3 returns a score for each request without user friction. The score is based on interactions with your site and enables you to take appropriate action for your site.

Error Message - (only for V3) fill in custom text for the error message.

Language — set the language for Invisible Captcha. You can see the list of the available languages here.

Theme of Captcha Badge — define the Captcha Badge theme (light or dark);

Default forms — Pick the forms that need to be protected by Captcha via multi-select control.

Advanced Settings

To specify forms that should be protected with the Google Invisible reCaptcha module please expand the Advanced Settings section.

Advanced Frontend Settings		
URLs to Enable	customer/account/createpost newsletter/subscriber/new customer/account/loginPost review/product/post contacts/index/post	[STORE VIEW]
	For example: customer/account/createpost Each url must be on a new line <u>How to choose URL</u>	
Selectors for Forms	form[action*="customer/account/createpost"] form[action*="newsletter/subscriber/new"] form[action*="customer/account/loginPost"] form[action*="review/product/post"] form[action*="contacts/index/post"]	[STORE VIEW]
	For example: form[action*="customer/account/createpost"]	
	Each selector must be on a new line	
Enable Google reCAPTCHA for Guests Only	No	▼ [STORE VIEW]

To specify forms that should be protected with the Google Invisible reCaptcha module please expand the **Advanced Settings** section.

Right after the installation Google Invisible reCaptcha protects contact, registration, review, and subscription forms.

URLs to Enable — specify the form URLs that should be protected;

It is not the URL where your form is located.

Selectors for Forms — fill in the selectors for each form.

For example you would like to add a Google re CAPTCHA to a registration form in Magento. This is how to get the URL:

1. Go to the registration form page.

2. Fill in the form.

3. Open the **Inspect** window, and then the **Network** tab.

CSS	styles.css	;	o /doFau	lk/ccc/-	GET	200	stylesheet	(index)				

5. Click on this request and in the **'Headers'** tab find a **'Request url'**. Copy the path from the url (in our example it is **customer/account/createpost/**).

6. Paste the URL in the 'URLs to enable' field.

Urls to enable	customer/account/createpost	[STORE VIEW]
		/i
	For example: customer/account/createpost	
	Each url must be on new line	

In the **Selector for forms** field you need to put a CSS selector of the form.

This is how to get a CSS selector for the **Create an account** form:

1. Go to 'Create an account' page and open the 'Inspect' window.

2. Find the HTML code of the form, click on the right mouse button and choose **Copy** \rightarrow **Copy** selector

You should be absolutely sure that the selector is unique. Otherwise, Google CAPTCHA would be added to the all elements that have this selector name. Ask your developer to check it.

	Add attribute Edit attribute Edit as HTML Copy	•	Copy outerHTML	Login Information Password*
	Hide element Delete element		Copy selector Copy XPath Cut element	form#form-validate 12
Elements C	Expand all Collapse all		Copy element Paste element	ation Security Audits
<pre></pre>	:active :hover			and accord months
<pre> <noscript></noscript></pre>	:focus :visited			
▼ <div <br="" class="ma
▼<div class=">▼<div class="<br">▼<div class<br="">▼<div class<="" td=""><td>Scroll into view</td><td>•</td><td>"></td><td></td></div></div></div></div>	Scroll into view	•	">	
Korw a the div.wrapper div.page	ction="https://amasty div.main-container.coll-lag	/•.co	m/customer/account/createpo	ust/" method="post" id="for ount-create form#form-validate

3. In our case the selector is **.customer-account-create .account-create form** and we added it to the **Selector for forms** field.

Selectors for forms	.customer-account-create .account-create form	[STORE VIEW]
	▲ For example: .customer-account-create .account-	
	create form	
	Each selector must be on new line	

Enable Invisible Captcha for guests only - set this option to *Yes* to activate captcha for non-registered clients only.

IP whitelist - specify IP addresses for which invisible captcha will be disabled.

Each IP must be on a new line.

Save the configuration.

Enable Google reCAPTCHA for Guests Only — select **YES** to enable reCaptcha for guest visitors only.

Google ReCAPTCHA for Amasty Extensions

The module comes with built-in support of several Amasty extensions.

Please expand the Google ReCAPTCHA for Amasty Extensions section.

Google reCAPTCHA for Amasty Extensions						
Custom Form	Not Installed ▼ ▲ Create customizable forms to collect additional information about your customers and view the	[STORE VIEW]				
Blog Pro	received data from the admin panel. <u>Learn more</u> .	ISTORE VIEWI				
blog i to	Equip your store with full-featured blog that supports responsive layout, numerous widgets, customizable posts, and convenient SEO-tools. <u>Learn more.</u>	[0.0.12.11]				
Product Questions	Not Installed ▼ Provide customers with the ability to ask questions on product pages and organize answers in the informative FAQ section. Manage answers and categories from the backend and customize the knowledge base layout. Learn more.	[STORE VIEW]				

Here you can see the names of the supported modules: Custom Form, Blog Pro, Product Questions. If the module is installed, then you can enable or disable the Captcha for it. All required settings will be added automatically.

If the module is not installed you will see that the dropdown menu is inactive and the module is marked as **Not installed**.

Two-Factor Authentification

The module comes with built-in support of Amasty Two-Factor Authentification

2022/04/15 00:51	15/16	Guide for Google Invisible reCaptcha (Captacha Registration)						
Two-Factor Authe	ntication							
Status		 Not installed Add extra security level to boost data protection for your e-business. Prevent your store from common Internet threats like keyloggers, data sniffing and unsecured wi-fi connections. Stay convinced that your Magento account is available only to your staff members. <u>here</u>. 	[STORE VIEW]					

If the module is not installed you will see that the dropdown menu is inactive and the module is marked as **Not installed**.

Hot to Check Invisible reCaptcha

When everything is set, it is important to check how reCaptcha works. Please, follow these steps:

- 1. Open the page which has a form protected by Google Invisible reCaptcha;
- 2. Open your browser console;
- 3. Choose to perform as any other browser or device;
- 4. Try submitting the form several times until Google shows you the reCaptcha test.
