Guide for Hide Price

The extension allows to control the prices' display (hide/show) for particular products or for individual categories and customize "Add to cart" buttons for guests or certain customer groups.

Options

To find general settings, go to **System → Configuration → Hide Price**

Disable an Extension for the Selected Store Views - Specify the store view where you want to disable the Hide Price option.

Hide Price by Default - Control the extension's performance. Setting the feature to *Yes* hides the prices for all the products.

The individual conditions may be configured per product or category. The individual settings priority is higher than this default setting.

Enable Customer Group Options - Select customer groups to which the price will be available. To hide price from all customers set the option to *No*.

Enable Customer Group Options	Yes	[STORE VIEW]
Show Price for the Selected Customer Groups	<div style="border: 1px solid #ccc; padding: 5px;"><p>NOT LOGGED IN</p><p>General</p><p>Wholesale</p><p>VIP Member</p><p>Private Sales Member</p></div>	[STORE VIEW]

Show Price for the Selected Customer Groups - Multi-select customer groups who can see the products' prices.

Enable Category (Product) Hide Price Options - If the option is set to *No* the Hide Price settings tab won't be displayed on the category and product pages. This will also speed up frontend pages performance.

Text to Display, Text to Display to Non-Permitted Groups, Text to Display to Non-Permitted Categories, Text to Display to Non-Permitted Products - Specify texts that will be displayed instead of the price and *Add to cart* button. You can also specify separate texts for products, groups and categories.

Enable Category Hide Price Options	Yes	[STORE VIEW]

Text to Display	Contact Us	[STORE VIEW]
Text to Display to Non-Permitted Groups	Log in to see your price!	[STORE VIEW]
Text to Display to Non-Permitted Categories	Log in to see your price!	[STORE VIEW]
Text to Display to Non-Permitted Products	Join us to see a better price!	[STORE VIEW]
Customer Login Link Url	Yes	[STORE VIEW]

Customer Login Link Url - Here you can insert page URL for the Hide Price button to redirect customers to any page you need. Eg. *Contacts* page.

Hide Price: Product Settings

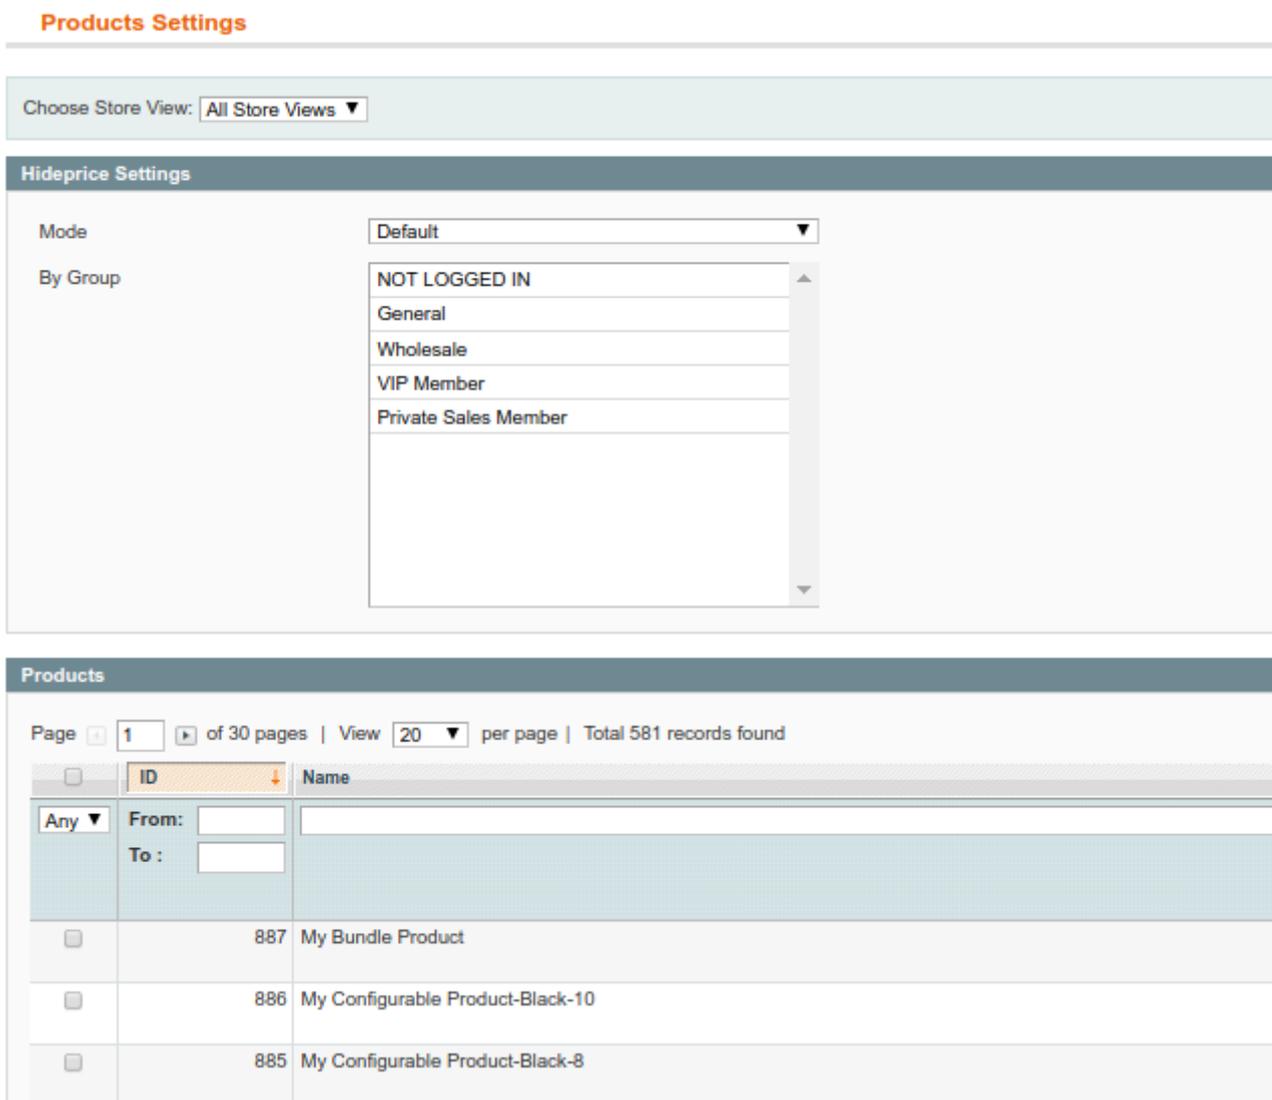

In case you've enabled the product Hide price options in the main settings, the Hide price tab will be displayed on the product page.

Mode - Here you can use 3 modes:

1) **Default** 2) **Hide Price** (enforced price hiding for particular product) 3) **Show Price** (enforced price display for particular product even if the Hide Price for the whole site option is enabled)

By Group - Choose the group where the *Mode* option will be applied. If no customer group is selected

the option won't be activated.

Hide Price: Category Settings

In case you've enabled the category Hide price options in the main settings, the Hide price tab will be displayed on the product page.

Mode - Here you can use 3 modes:

1) **Default** 2) **Hide Price** (enforced price hiding for particular category) 3) **Show Price** (enforced price display for particular category even if the *Hide Price* option is enabled for the whole store)

By Group - Choose the group where the *Mode* option will be applied. If no customer group is selected the option won't be activated.

Apply only to current category (children categories will have parent categories mode) - If you enable the option all the above settings won't work for child categories.

Precedence - In case any product is displayed on the page where no particular category for this

product is defined (e.g. search page) or the item belongs to several categories with different Hide Price settings, the Precedence option can be used. With the option you can set which category Hide Price settings will be applied to the products primarily.

[Add to Compare](#)

Quick Overview

The BlackBerry 8100 Pearl is a departure from the form factor of previous BlackBerry devices. This BlackBerry handset is far more phone-like, and RIM's engineers have managed to fit a QWERTY keyboard onto the handset's slim frame.

You can ask customers for details to calculate the final product price.
