Another way to check the activity of a certain admin user is to proceed to **System** \rightarrow **Permissions** \rightarrow **Users**, select the required user and switch to the **Login as Customer Report** tab.

Automatic Log Clearance

General						
Enable Clearing Log Data by Cron	Yes	[GLOBAL]				
Delete Records Older Than	365	[GLOBAL]				
	▲ Days					

With the extension, you can set up the automatic log clearance using cron. Please, go to **System** \rightarrow **Configuration** \rightarrow **Amasty Extensions** \rightarrow **Login as Customer**:

Enable Clearing Log Data by Cron — enable or disable the automatic log clearance;

Delete Records Older Than — specify the number of days to clear the older log records.

Please, do not set the **Delete Records Older Than** value to 0. This will disable the clearance process.

Login as Customer Permissions

Store admin can distribute a permission to login as customer to sub-admin users.

Please, go to **System** \rightarrow **Permissions** \rightarrow **Roles** and select the role you want to grant permission. Switch to the **Role Resources** tab.

You can enable or disable the following role resources:

• Customers → Manage Customers → Login as Customer Button

<u>a</u>masty

- Reports \rightarrow Customers \rightarrow Login as Customer Log
- System \rightarrow Permissions \rightarrow Users \rightarrow Login as Customer Tab
- System → Configuration → Login as Customer Settings
