For more details see the Quick View extension page.

Guide for Quick View

The extension allows your customers to quickly view product details and add products to cart right from the pop-up window on a category page. Furthermore, promptly redirect customers to the shopping cart page after they add products to cart.

Settings

To enable the Quick View Extension, go to **System → Configuration → Quick View**.

Enable Quick View - To enable the extension, set to *Yes*.

Product Item CSS Selector - If the *Quick View* window is displayed correctly – then leave this line without changes. Otherwise, you need to open your category page and copy correct CSS selectors here.

Custom CSS Styles for Hover Block - This feature enables you to customize the *Quick View* button. You can specify button color, size and other parameters.

See an example of the *Quick View* customized button – red color.

Redirect to shopping cart - You can redirect the customers right to the shopping cart page after they click *Add to Cart* button.

The *Quick View* button on the category page.

After customers click on the *Quick View* button, the pop-up with product information appears.

After customers add product to cart, the extension redirect them to the shopping cart.
