For more details see the [Automatic Categories for Magento 2](#) extension page.

Guide for Automatic Categories for Magento 2

Employ automatic categories extension to manage your catalog pages more efficiently and faster. Set conditions to run sales and seasonal campaigns, tailoring particular product listings for your purposes.

- Associate products with categories automatically
- Create merchandising conditions
- Import conditions from other catalog pages
- Preview and sort product listing

Create a Category

To create a new Magento 2 virtual category or edit the existing one, go to **Admin Panel → Catalog → Categories**.

Choose the category you want to edit or create a new one via **Add Root Category/Add Subcategory** buttons.

Automatic Category

Yes

?

Enable Category - set to Yes to make a category visible on the frontend.

Include in Menu - enable this option to add the category to your storefront menu.

Category Name - specify the title of the category.

Automatic Category - enable this functionality to collect and display only those products that match the specified conditions.

Product Conditions

Expand this tab to set conditions based on the attributes to display only the desired group of products.

Product Conditions

Select Conditions

If ALL of these conditions are TRUE :

Is on Sale is Yes

Apply Conditions

After you click the 'Apply Conditions' button, the category will display only the products that are matching the conditions.

Import Conditions

Import conditions from

-- Please Select --

-- Please Select --

Default Category

... What's New

... Women

..... Tops

..... Jackets

..... Hoodies & Sweatshirts

..... Tees

..... Bras & Tanks

..... Bottoms

..... Pants

..... Shorts

... Men

..... Tops

..... Jackets

..... Hoodies & Sweatshirts

..... Tees

..... Tanks

..... Bottoms

..... Pants

Use the **Conditions Tree** to specify the necessary conditions or their combinations. After you click the **Apply Conditions** button, the category will display only the products that are matching the conditions.

To avoid common mistakes while setting the conditions, check [this post](#).

amasty

You may also save time by duplicating the conditions of a particular category and moderate them if needed. Use the **Import conditions from** dropdown menu to choose the category which conditions you want to reproduce. The conditions will be retrieved to the current automatic category, afterwards you can modify them.

Any time there is an inventory update, the category page will be updated automatically.

Invisible Items

When the conditions are set, go to **Products Merchandising** section to see the products that are automatically retrieved by the applied conditions. You will also see the number of invisible items:

Products Merchandising

Sort Order

Visible items: 35 Invisible items: 11

Auto X

Auto X

In Stock

Sprite Yoga Companion Kit
24-WG080
\$0.00

 page 1 → ^

Auto X

In Stock

Didi Sport Watch
24-WG02
\$92.00

 page 1 → ^

Items can become invisible in the following cases:

- products are invisible in the selected store view;
- products have **Not Visible Individually\Search only** visibility settings;
- products that are out of stock if their display is disabled in the General Settings (to make these

products visible, navigate to **Stores → Configuration → Catalog → Inventory** and set the **Display Out of Stock Products** option to Yes).

Products Merchandising

Once you set the conditions, go to **Products Merchandising** section to see the products that are automatically retrieved. Magento 2 category page builder extension allows to customize all categories, including dynamic and ordinary ones.

 <p>Sprite Stasis Ball 75 cm 24-WG083-pink \$32.00</p>	 <p>Teton Pullover Hoodie-M-Purple MH02-M-Purple \$70.00</p>	 <p>Affirm Water Bottle 24-UG06 \$7.00</p>	 <p>Stark Fundamental Hoodie MH06 \$24.00</p>
 <p>Stark Fundamental Hoodie-M-Purple MH06-M-Purple \$42.00</p>	 <p>Savvy Shoulder Tote 24-WB05 \$32.00</p>	 <p>Teton Pullover Hoodie MH02 \$33.00</p>	 <p>Oslo Trek Hoodie MH08 \$33.00</p>

Sort Order - select from the dropdown the preferable way of the automatic ordering of the product

listing.

Available options:

- Move out of stock to the bottom
- Newest products first
- Name: Ascending
- Name: Descending
- Price: Ascending
- Price: Descending

Enlarge the sorting options with the **Magento 2 Improved Sorting** extension. Due to the synergetic work of these 2 modules, you're able to sort products by 'Top Rated', 'Most Viewed', 'Best Sellers', 'Biggest Saving', 'Reviews Count' and 'Now in Wishlists'.

Search Products - find products within one current automatic category selection by SKU or name. Employ a search box at the top of the products merchandising listing.

In the **Visible Items** tab all the products that fall under the specified conditions are displayed. You can check their title, SKU, variation (color or size), price and stock availability. Due to this functionality, you can, for example, easily move out of stock products to the end of the list.

Drag-and-drop Magento items via page builder the way that is aligned with your current marketing needs.

Move to Top - simply click the button to send a particular product to the first position in the product listing.

Once you drag and drop a particular product using Magento category page builder, its mode is switched to **Manual** and it is “pinned” to a particular location. Which means it will remain in the same position even after the automatic sorting is applied.

For your convenience, the number of products per page in the admin panel equals the number of products customers see on the frontend. Thus, you will see how the products will be displayed to customers on each page.

In order to **move products through the pages** change the page number per the product you want to move to another page. As the page number is changed, the product becomes last on this page.

Content

In this tab, you can specify the category’s description and add a catchy icon to attract more customers.
