Guide for B2B E-commerce Solution for Magento 2

Optimize your e-commerce operations with our all-in-one B2B solution, tailored to the specific needs of modern B2B markets. Fully compatible with Adobe Commerce B2B, this solution provides a range of practical features that help your business adapt to shifting e-commerce trends and manage both B2B and B2C activities efficiently.

- Let companies create multiple accounts
- Create a structured dealers base
- Customize pricing policy per customer group
- Set precise access limitations
- Let buyers negotiate prices using quotes
- Streamline bulk ordering
- Grant store credits as incentives
- Build an automatic discount system
- Enable smart product recommendations
- Optimize shipping & payment operations
- Hyva-ready storefront and Hyva Checkout compatible
- REST API support

We've crafted **three tailored B2B solutions** to advance your business. Each feature is designed for seamless integration with each other and native Magento 2. Select the option that aligns with your business objectives, whether you're starting from scratch, enhancing your existing website with extra features, or transforming your B2C site into a fully functioning B2B or B2B2C platform.

B2B E-commerce Essentials Solution for Magento 2

This solution is built to empower your store with the most essential features to upgrade your B2C Magento store and make it ready for working in the B2B segment.

B2B Company Account

Simplify purchases for your customers by introducing B2B Company Accounts to Magento 2 store. Let companies register multiple user accounts, allow special permissions to enhance the shopping, and get more orders.

- Create multiple company accounts as a store admin;
- Allow businesses to create and manage sub-accounts from the frontend;
- Transfer users between company accounts in the backend;
- Easily manage all company accounts in one place;
- Offer personalized marketing and pricing based on company membership.
- REST API Support

Navigate to **Stores → Configuration → Amasty Extensions → Company Account**.

Small companies
Wholesale

Approve Companies Automatically
[global]

No

If set to Yes, all new companies will automatically get Active status.

Inactivate Customer upon Removing
from Company Account
[global]

Yes

if disabled, the customer will still remain Active after being removed from Company in admin panel. Note: you can change Customer's Status on Customer edit page.

See detailed configuration guide [here](#).

Quick Order

For B2B sales it's important to provide options for convenient bulk purchasing without visiting each product page every time. With this solution it is possible with the Quick Order page.

Key features:

- Let clients add products by SKU/Name
- Create orders by inserting multiple SKUs
- Import products for orders via CSV and XML files
- Allow buyers to specify custom product options
- Allow placing quick orders from the category pages
- Provide convenient quick order UX on mobile

To enable the functionality, proceed to **Stores → Configuration → Amasty Extensions → Quick**

Order.

See detailed configuration guide [here](#).

Customer Group Auto Assign

This Magento B2B solution allows you to utilize a smart algorithm to automatically categorize customers into groups applying different pricing levels for different customer groups.

Key features:

- Manage customer groups based on custom rules
- Use simple rules based on customer and order attributes
- Schedule the rules processing frequency with integrated Cron functionality
- Define rules processing order via prioritization
- Easily manage all group-switching rules in one place
- Show customer group status in the customer's account

To adjust the rules for automatic assigning of customer groups, proceed to **Customers → Amasty Customer Group Auto Assign → Rules**.

Extended Product Grid with Editor

This module will enable you to monitor, filter, and modify any catalog info right from the grid to minimize time spent on catalog processing: add columns, edit data in the cells, and even manage the product inventory. Moreover, you can create templates to save the desired grid layouts and switch between them according to your needs.

Key features:

- Edit product data right on the grid
- Activate additional product attributes
- Add product grid templates
- Manage product inventory by adding or deducting items
- Customize filters to easily find information
- Compatibility with Magento Enterprise splitted databases

To configure general extension settings please go to **Stores → Configuration → Amasty Extensions → Product Grid**.

Editing Settings

Editing Mode
[global]

Multi Cell

Single Cell - data is being saved right after any cell is edited.
Multi Cell - Save button should be clicked after data in multiple cells has been edited.

Crop Decimal Digits
[global]

No

When enabled, decimal digits in the grid are cropped to 2 decimal places and rounded.

Additional Grid Columns Settings

☑ Related products, Up-sells, Cross-sells Columns

☑ 'Qty Sold' Column

Quantity Based Availability

Quantity Based Availability
[global]

Yes

When set to yes, availability will automatically change to 'In stock' when quantity is positive and to 'Out of stock' when quantity is zero or negative. When set to 'No', availability status will not be updated automatically.

See detailed configuration guide [here](#).

Product Attachments

Offer customers additional product info: provide accurate manuals, licenses, warranties and other documents on webstore pages.

Key features:

- Upload the unlimited number of attachments
- Support for any file types
- Track attachments downloads
- Equip files with catchy icons
- Compatibility with the Magento Enterprise Remote Storage functionality

To configure general extension settings please go to **Stores → Configuration → Amasty Extensions → Product Attachments**.

B2B E-commerce Pro Solution for Magento 2

This solution includes all the Magento 2 B2B commerce features from the Essentials, plus extended functionality for advanced personalization and customer segmentation, catering to the diversified needs of growing B2B companies.

The graphic features a dark blue background. At the top right, a blue pill-shaped badge contains the text "B2B E-COMMERCE SUITE: PRO". Below this, the text "Grow business" is written in large white font, followed by "better understanding customers' needs" in a smaller, lighter blue font. On the left, a white box with a light blue border lists "All features from B2B Essentials +" followed by a checklist of nine items, each preceded by a green checkmark. To the right of the list, several overlapping, stylized illustrations of mobile devices (phones and tablets) are shown, each displaying different B2B e-commerce interface elements like social media icons, a price tag, a shopping cart, and a storefront.

B2B E-COMMERCE SUITE: PRO

Grow business

better understanding customers' needs

All features from **B2B Essentials** +

- ✓ Request a Quote
- ✓ Hide Price
- ✓ Store Credit & Refund
- ✓ Sales Reps and Dealers
- ✓ Customer Group Catalog
- ✓ Social Login
- ✓ Product Option Templates
- ✓ Cancel Orders

Request a Quote

This functionality will allow you to create accurately adjusted pricing offers to the various segments of your audience. Let buyers comfortably negotiate prices and create quotes in one click from any web store page.

Key features:

- Let clients request quotes from any page
- View and manage all quotes in a separate grid
- Automatically approve quotes with specific conditions
- Let guest visitors ask for quotes
- Easily turn quotes into orders

To enable quote request availability, proceed to **Stores** → **Configuration** → **Amasty extensions** → **Request a Quote**.

Training</div></div> <p>'Add to Quote' button will be hidden for each product from the selected categories. This setting is applied to product list and product page.</p>
Allow Quote Request for Customer Groups [store view]	<div><div>Not Logged In</div><div>General</div><div>Wholesale</div><div>Retailer</div></div> <p>If 'Not Logged In' option is chosen, guest users will insert email addresses upon quote submission and accounts will be created automatically.</p>

A detailed configuration guide you can find [here](#).

Hide Price

Hide product prices and “Add to cart” button for specific products or whole categories. Manage prices display depending on customer groups.

Key features:

- Limit prices visibility on category and product pages
- Disable 'Add to Cart' and 'Add to Wishlist' buttons
- Show prices to specific customer groups only
- Customize text messages
- Redirect clients to any form or page

To configure the module, please go to **Stores → Configuration → Amasty extensions → Hide Price**.

Store Credit & Refund

B2B Suite also includes the solution to improve retention by granting store credits, that clients can use for further purchases.

Key features:

- Add or subtract any store credit amount from the admin panel
- Let clients spend their credits on new purchases
- Process refunds with store credits application
- Show store credit and refunds balance in customer account
- Send notifications about any changes in balance

To activate the functionality, navigate to **Stores → Configuration → Amasty Extensions → Store Credit**.

Sales Reps & Dealers

Provide high-quality service and individual approach to each customer by including dealers in your

business model.

Key features:

- Create multiple user roles
- Assign orders to particular dealers
- Let clients choose their dealers
- Show dealer information to clients
- Check the list of orders assigned to each dealer
- Use notifications to keep sales reps informed

To configure general extension settings, go to **Stores → Configuration → Amasty extensions → Sales Reps and Dealers**.

General

Default Dealer [global]	<input type="text" value="Frank Wilson"/> ▼	All new orders will be assigned to this dealer except if a specific customer is already assigned to another dealer.
Send New Order Email to the Dealer [global]	<input type="text" value="Yes"/> ▼	Indicate `Yes` to send a copy of the order email to the associated dealer.
Show Re-assign Fields [global]	<input type="text" value="Yes"/> ▼	On the order view page in Backend.

Show Author of Message [global]	<input type="text" value="Yes"/> ▼	
Hide the `Manage Customers` tab [global]	<input type="text" value="No"/> ▼	On the `Edit User` page (the `Edit Dealer` page).
Allow dealers to see all customers and orders [global]	<input type="text" value="No"/> ▼	Indicate `Yes` to allow dealers to see all customers and orders in the system

Check how to adjust each setting [in this guide](#).

Customer Group Catalog

Create an individual selling strategy for your clients by providing a selective catalog and price visibility for particular customers and customer groups to meet the needs of each segment.

Key features:

- Adjust the visibility of products and categories by customer groups
- Provide businesses with selective access to store catalog
- Hide or replace product price with CMS-block or image

- Redirect users to custom CMS-pages or to 404 page

To configure these options, go to **Store → Configuration → Amasty Extensions → Customer Group Catalog**.

Social Login

Provide customers with an easy single-click registration and login process via social networks.

Key features:

- AJAX pop-up for the login/register purpose
- 4 positions of the social login bar
- Redirect after login

- Included reCAPTCHA
- Supports Google, Facebook, Twitter, Instagram, LinkedIn, Amazon, Paypal, Twitch, Pinterest, etc.
- WCAG compliance

To configure these options, go to **Store → Configuration → Amasty Extensions → Social Login**.

General Settings

Enable Social Login
[store view]

Product Option Templates

Offer extra product customizations and services right on the product pages: add materials info,

related items and services, price variations, etc.

Key features:

- Offer extra products and services
- Customize options with image, text and color swatches
- Configure smart option dependencies
- Quickly assign option templates to multiple products
- Add free and paid accompanying items to products

To create and manage product option templates, go to **Catalog → Product Option Templates → Template List**.
