For more details see how the [Cancel Orders for Magento 2](#) extension works.

Guide for Cancel Orders for Magento 2

Improve customer loyalty and enhance your store usability by providing cancellation options right on the frontend. Monitor all cancellation requests in one place and automatically restock products with the Magento 2 Cancel Orders extension.

- Allow customers to cancel orders in accounts
- Show handy cancellation popup
- Provide cancellation reasons dropdown
- Track annulation requests in a separate grid
- Notify your managers about new cancellations
- Automatically restock cancelled items
- WCAG compliance (for Luma Theme)
- Mage-OS compatible
- Hyva-ready storefront and Hyva Checkout compatible by default

The extension is compatible with **Hyvä Theme**. You can find the 'amasty/module-cancel-orders-hyva-compatibility' package for installing in composer suggest. The compatibility is available as a part of an active product subscription or support subscription.

Configuration

To adjust the basic extension setting, navigate to **Stores → Configuration → Amasty Extensions → Cancel Orders** tab.

General Settings

In the **General** section you can limit the possibility to cancel orders and configure the strategy or refunds processing.

Pending
Processing
Suspected Fraud

**Refund Paid Processing
Orders Automatically**
[store view]

Online (if possible)
Disabled
Online (if possible)
Offline

Enabled - set to Yes to activate the extension.

Allow for Selected Group(s) - choose all or particular customer groups for which order cancellation will be available.

Allowed Order Status(es) - specify which orders can be cancelled, e.g. you may allow customers to cancel pending orders only.

Refund Paid Processing Orders Automatically - enable or disable automatic refunds for canceled orders. You may also choose one of the following refund strategies:

- **Disabled** - customers will be able to cancel Processing Order only if it wasn't yet invoiced.
- **Online** - in this mode Processing Order with online invoice will be refunded online (exception: if order has several invoices, it will be refunded offline).

- **Offline** - all orders will be refunded offline regardless used payment method.

All products in canceled orders will be returned to stock automatically.

How it works:

The extension process the requests in the following way:

1. *Pending* are automatically transformed into *Canceled*
2. *Processing* orders without invoices and Suspected Fraud are transformed into *Canceled*
3. *Processing* orders with invoices are refunded: if automatic refund is selected, a Credit Memo is created and the status of the main order is switched to *Closed*. After that, the status is automatically changed to *Canceled* and the comment is added as well.

For orders with invoices in the **pending** status, we have linked the behavior to the **Automatically Return Credit Memo Item to Stock** setting (located at **Stores → Configuration → Catalog → Inventory → Product Stock Options**).

Therefore, when canceling orders with invoices using the module:

- If **Automatically Return Credit Memo Item to Stock** is set to **Yes**, the products are returned to stock.
 - If **Automatically Return Credit Memo Item to Stock** is set to **No**, the products are **NOT** returned to stock.

Comment

Reason

Button Label - specify a button text for order cancellation that will be displayed in a customer account.

This text will be shown in the **My Orders** tab.

My Orders

Order Total	Status	Action
\$28.82	Pending	View Order Reorder Cancel Order
\$56.96	Pending	View Order Reorder Cancel Order
\$85.52	Pending	View Order Reorder Cancel Order

Enable Cancellation Popup - choose Yes to display a popup with cancellation reasons and a comment field. Due to the popup, you can find out why customers cancel orders and improve your selling strategy.

Popup Notice - specify the notice that will be added to the popup. You may use it to provide customers with cancellation terms or any additional info.

Order Cancellation Reasons - add the reasons for Cancel Order and set the sequence for frontend display using drag-and-drop. Customers will be able to choose the necessary reason in a dropdown.

Is Required - select the fields that must be filled for cancellation request.

The configured popup is displayed in the following way:

Auto Cancel Mode

Using this tab, store admin can adjust automatic cancellation for pending orders after a certain period of time.

Auto Cancel Mode

Enabled
[global]

Yes

Enable to automatically cancel pending orders after a set period of time.

Consider Orders Created from
[global]

2019-01-01

Orders with older Creation Date will not be automatically canceled. If left empty, all orders are considered.

Consider Order Status(es)
[global]

Pending

Pending Payment

Conditions based on Payment Method
[global]

Payment Method(s)	Duration	Duration unit	Actions
No Paym ▼	10	Day(s) ▼	
Check / I ▼	10	Day(s) ▼	
PayPal B ▼	10	Day(s) ▼	
<button>Add</button>			
<button>Run</button>			

Enabled - choose 'Yes' to automatically cancel pending orders after a set period of time.

Consider Orders Created from - specify the particular period of time. Orders with the earlier Creation Date will not be automatically canceled. If left empty, all orders are considered.

Consider Order Status(es) - select order statuses for which auto cancellation will be applied.

Conditions based on Payment Method - add particular payment methods for which automatic cancellation will be available.

Apart from preconfigured payment methods, you may choose **No Payment Information Required**. It means that orders with store credits, rewards and gift cards as a payment methods will be also available for cancelling.

In addition to this, set the following conditions:

- **Duration** - specify time period after which an order with the particular payment method will be canceled.
- **Duration unit** - select the unit for calculating: Day(s) or Hour(s).
- Delete specific methods using the **Actions** column.

Cron is running each hour by default. If you need to apply Auto Cancel immediately, click the 'Run' button (before performing the action, please make sure that conditions are saved).

After the cancellation is executed, you will see the notification about (un)successfully auto canceled orders.

All canceled orders will be placed in the separate **Cancel Orders Grid**.

Admin Email Notifications
