For more details see how the AI Content Generator for Magento 2 extension works.

Guide for ChatGPT AI Content Generator for Magento 2

The AI Content Generator extension is a lightweight solution that helps store owners to maximize their productivity and save a huge amount of time by automatically generating compelling descriptions and metadata for their online store pages.

- Supports GPT-3.5-turbo, GPT-4, GPT-4o, GPT-4-turbo, GPT-4o-mini
- Generate content for product, category and CMS pages
- Add metadata to product, category and CMS pages
- Create content for multiple products via mass action
- Add meta data to multiple CMS pages via mass action
- Generate texts via Page Builder
- Generate content on any language
- Generate various content for each store view
- Choose Amasty AI Service as content generation provider
- Compatibility with Blog Pro
- Generate email and newsletter templates (PRO version)
- Customize default prompts (PRO version)
- View Generation History (PRO version)
- Compatibility with Shop by Brand (PRO version)
- Compatibility with Landing Pages (PRO version)
- Hyva Theme and Hyva Checkout compatible by default

General Settings

To configure the **ChatGPT AI Content Generator** extension on your Magento 2 instance, start by adjusting the **General Settings**.

The extension consists of two modules:

- **OpenAl Core**, which is responsible for communication with the OpenAl API service (serves as a system module, and
- Al Content Generator itself

First, please navigate to **Stores** \rightarrow **Configutarion** \rightarrow **Amasty Extensions** \rightarrow **OpenAl Core** to adjust content generation provider settings.

Content Generation Provider - here you can choose one of the content generation providers: you can use your own **OpenAI key** or utilize the **Amasty AI Service** for content generation.

The **Amasty AI service** provides unlimited content generation for customers with a product subscription. Currently, the service supports the GPT-3.5, GPT-40 Mini and GPT-40 models for generating content.

If you prefer selecting the Amasty AI Service as your content generation provider, simply enable this option and save your configuration.

Check out **this article** to learn more about Amasty Al Service. Discover how using your own OpenAl API key differs from using our service, and how we manage usage limits.

If you prefer to use your own OpenAl key, ensure to create and insert the **Secret Key** for OpenAl Core before configuring the extension. To do this, please create an account at OpenAl platform, than go to **View API Keys** and click **Create new secret key**.

As soon you get the key, come back to your Magento admin panel and insert the Secret Key you've created to allow the extension using OpenAI API.

Now let's proceed with AI Content Generator general settings. Please go to: Stores → Configutarion

→ Amasty Extensions → AI Content Generator:

General Settings

Enable Module [store view]	Yes	•	
Language [store view]	Store Language	•	
	By default ChatGPT generates a response in the lang of the selected store view locale.	uage	'
History Log Auto-Cleaning [global]	Yes	•	?
Auto-Cleaning Period (Days) [global]	30		?

Enable Module - set to 'Yes' to enable the module.

Language - by default ChatGPT generates a response in the language of the selected store view locale, but you can choose another language from the dropdown.

History Log Auto-Cleaning - available in PRO version. The records that were saved for a longer period than the specified below will be automatically removed from History Log.

Auto-Cleaning Period (Days) - available in PRO version. The records will be automatically removed after the specified period of time.

With the extension, you can generate **different content for each store view**. To do this, select the desired store view from the top right corner of the product or CMS pages grid, or choose the required store view while editing a particular page (product, category, CMS), depending on your needs. Generate the content and save the page. The content will then be displayed for the chosen store view.

Product Settings

The module allows you to specify which fields should be filled with content generated through OpenAPI and to flexibly customize the criteria that participate in the generation.

<u>a</u>masty

Product Settings

Content Based on Selected Product Attributes - here you can multi-select the attributes on which the product description will be based. The limit is 1000 attributes.

Content Based on Custom Attributes - Use this setting when the desired attribute is not found in the 'Content Based on Selected Product Attributes' option. Simply enter the attribute codes you need, separated by space.

Model Name [store view]	gpt-4
	gpt-4
	gpt-4o
	gpt-4-turbo
	gpt-4o-mini
	gpt-3.5-turbo
Temperature [store view]	0.6
	What sampling temperature to use, between 0 and 2. Higher values like 0.8 will make the output more random, while lower values like 0.2 will make it more focused and deterministic.

Model Name - choose the model that will perform content generation.

For now the following models are available within the module:

- gpt-4
- gpt-4o
- gpt-4o-mini
- gpt-4-turbo
- gpt-3.5-turbo

You can use the List models API to see all of your available models, or see Model overview for their descriptions.

Temperature - this indicator affects the creativity of the model. The closer this metric is to 2, the more random the responses to requested actions will be. The closer the metric is to 0, the less creative the model's suggestions will be.

Short Description Maximum Tokens [store view]	3000
	From 1 to 3100. The maximum number of tokens to generate in the completion. If model text-ada-001 is used, it is possible to use up to 2000 tokens.
Description Maximum Tokens [store view]	3800
	From 1 to 3900. The maximum number of tokens to generate in the completion. If model text-ada-001 is used, it is possible to use up to 2000 tokens.
Meta Title Maximum Tokens [store view]	200
	From 1 to 256. The maximum number of tokens to generate in the completion.
Meta Keywords Maximum Tokens	200
[]	From 1 to 256. The maximum number of tokens to generate in the completion.
Meta Description Maximum Tokens [store view]	1000
	From 1 to 1024. The maximum number of tokens to generate in the completion.

Short Description Maximum Tokens - the setting for OpenAl which is used for the content generation for short descriptions. The maximum number of tokens to generate in the completion. Here you can specify the number from 1 to 3100. If model text-ada-001 is used, it is possible to use up to 2000 tokens.

In OpenAI, **tokens** are the basic units of text used in language models. They are individual words or pieces of words (subwords) that are given a unique numerical representation. Language models use these numerical representations of tokens to process and generate text. In other words, when you input text into a language model, it breaks it down into tokens, which it then analyzes and uses to produce a response. The process of breaking text into tokens is called tokenization.

Description Maximum Tokens - the setting for OpenAI which is used for the content generation for descriptions. The maximum number of tokens to generate in the completion. Here you can specify the number from 1 to 3900. If model text-ada-001 is used, it is possible to use up to 2000 tokens.

Meta Title Maximum Tokens - the setting for OpenAl which is used for the content generation for meta titles. The maximum number of tokens to generate in the completion. Here you can specify the the number from 1 to 256.

Meta Keywords Maximum Tokens - the setting for OpenAl which is used for the content generation for meta keywords. The maximum number of tokens to generate in the completion. Here you can specify the the number from 1 to 256.

Meta Description Maximum Tokens - the setting for OpenAl which is used for the content generation for meta descriptions. The maximum number of tokens to generate in the completion. Here you can specify the number from 1 to 1024.

Replace the Empty Image Tag With a Product Image [store view]	Yes	•
Image Width [store view]	200	
Remove the Image Tag [store view]	Yes	•
Remove the Title [store view]	No	Ŧ
Stop [store view]	price Up to 4 sequences where the API will stop generating further tokens. The returned text will not contain the stop sequence.	
Fill in Short Description on Product Save if Empty [store view]	No The process runs in the background	•
Fill in Description on Product Save if Empty [store view]	No The process runs in the background	•
Strings to Exclude [store view]	price size material Specify the excluded tokens separated by spaces. For example title price	e:

Replace the Empty Image Tag With a Product Image - sometimes, AI generates a description with an empty img tag. If the setting is enabled, the empty img tag will be replaced with the product image.

Image Width - here you can specify the width, that will be used for the image, if the setting 'Replace the Empty Image Tag With a Product Image' is enabled.

Remove the Image Tag - in cases, when AI generates a description with an empty img tag, you can not only replace it with the product image, but also remove the tag. It will be automatically removed if this setting is set to 'Yes'.

Remove the Title - set to 'Yes' to remove the title from the product description. Usually AI uses the product name as the title.

Stop - the setting for OpenAI which specifies a sequence of tokens that should not be exceeded in the generated text. It used to control the length of the generated text and prevent the model from generating excessively long responses. When the model encounters a "stop" token, it will stop generating text and return the output generated so far.

Fill in Short Description on Product Save if Empty - if this setting is enabled, a process to fill in the Short Description will be launched in the background when the product is saved. The Short Description will be filled in only if the product did not have it before. Typically, the process takes several seconds.

Fill in Description on Product Save if Empty - if this setting is enabled, a process to fill in the Description will be launched in the background when the product is saved. The Description will be filled in only if the product did not have it before. Typically, the process takes several seconds.

Strings to Exclude - specify a list of words entered with a space, that should not be included in the generated content.

Category Settings

Category Settings	
Model Name [store view]	gpt-4o-mini
	GPT-40 mini is the most cost-effective and efficient model, perfect for quick and simple tasks. Additionally, we support the following models: GPT-3, GPT-4, GPT-4 Turbo, and GPT-40.
Temperature [store view]	0.6
	What sampling temperature to use, between 0 and 2. Higher values like 0.8 will make the output more random, while lower values like 0.2 will make it more focused and deterministic.
Description Maximum Tokens [store view]	3900
	From 1 to 3900. The maximum number of tokens to generate in the completion.
Meta Title Maximum Tokens [store view]	25
	From 1 to 256. The maximum number of tokens to generate in the completion.
Meta Keywords Maximum Tokens [store view]	200
	From 1 to 256. The maximum number of tokens to generate in the completion.
Meta Description Maximum Tokens [store view]	40
	From 1 to 1024. The maximum number of tokens to generate in the completion.
Stop [store view]	
	Up to 4 sequences where the API will stop generating further tokens. The returned text will not contain the stop sequence.

Model Name - choose the model that will perform content generation. Find more information about the models in the Product Settings section of this guide.

Temperature - this indicator affects the creativity of the model. The closer this metric is to 2, the more random the responses to requested actions will be. The closer the metric is to 0, the less creative the model's suggestions will be.

Generate Content for Product Pages

With the ChatGPT AI Content Generator for Magento 2 you can automatically generate the following data for Product Pages:

- Short Description
- Description
- Meta Title
- Meta Keywords
- Meta Description

Product Page Short Description

To generate the short description for the product page please go to **Catalog** \rightarrow **Products** \rightarrow **Needed product** \rightarrow **Content section** \rightarrow **Short Description**:

Generate with AI - click this button to automatically generate the short description for the product, based on previuosly selected product attributes (check here how to select the needed attributes).

The description will generate instantly when **more than 4 attributes** are completed for the product. If you've filled in 4 or fewer attributes, a pop-up message will appear, giving you the option to proceed or enhance your product description by adding more attributes. If none of the product attributes are filled in, a pop-up will guide you to fill in the attributes before proceeding.

Advanced Generation with AI - click this button to add an input or prompt for the automatic creation of custom product description. You can input a specific topic or idea and the AI will generate relevant content based on that input. This is a more flexible option for content generation compared to relying solely on product attributes.

Custom Prompt	>
E.g. Write a HTML product description based on: name: Dash Digital Watch color: Black	1
color: Black Please enter key information to generate content.	11
Generate with AI	

You can use the generated descriptions as they are or flexibly customize them according to your needs.

Product Page Description

With the AI Content Generator extension you can automatically generate product page description using <u>Page Builder</u>. This functionality is available for **HTML element** and **Text element**. To generate product page description via Page Builder please head to **Catalog** \rightarrow **Products** \rightarrow **Needed product** \rightarrow **Content section** \rightarrow **Description** and click the button 'Edit with Page Builder':

Compete Track Tot	e	← Back	Add Attribute	Save
	p	POWERED	BY TINY 🍬	
Description [store view]			Edit	with Page Builder
The Compete Track Tote hold inside. Tuck water bottles in handles for convenience to and cols.	s a host of exercise supplies easy-access external spaces. from.	s with ease. Stash you: Perfect for trips to (r towel, jacket and st gym or yoga studio, wi	reet shoes th dual top

Then hover the text and click on the gear icon:

Here you can see the buttons **Generate with AI** and **Advanced Generation with AI** and also generate the content based on particular product attributes or based on custom prompt, as it was described above.

								Clo	se	Sa	ve
nsert Widget.	Insert	Image	Insert Variable	Generate wi	th Al	Advan	ced Gene	eration w	ith Al

	a Al	anced Conserv	tion with Al					Clo	se	Sav	ve
Senerate with	n Al Adva	anced Genera	tion with Al					Clo	se	Sav	ve
Generate with	n Al Adva ragraph	anced Genera	tion with AI ∽ \$≣∽	<u>A</u> ~ <u>*</u> ~	B 1	Ū	= 3	Clo E E	se IE	Sav √ I≣	ve

Don't forget to click 'Save' on Page Builder editing page, when the content is generated and you've made the necessary corrections if any.

Now, you can generate descriptions not only while editing existing products, but also while adding new products on **product creation pages**. As soon as automatic generation draws data from the product creation (or product editing) page, you should fill in not fewer than 4 product attributes in order to generate high quality and relevant content.

Product Page Metadata

With the extension you can automatically add **Meta Title**, **Meta Keywords** and **Meta Description** to your product pages, to make your store pages more visible to search engines and therefore to customers. To do this please go to **Catalog** \rightarrow **Products** \rightarrow **Needed product** \rightarrow **Search Engine Optimization**.

Search Engine Optimization

Generate with AI - click this button to generate the Meta Title / Meta Description description / Meta Keywords based on previously selected product attributes.

Advanced generation with AI - click this button to automatically generate the Meta Title / Meta Description / Meta Keywords based on custom input.

Adding content to Product Pages via Mass Action

With the ChatGPT AI Content Generator extension, you can add content to multiple product pages at

once using the mass action. Navigate to **Catalog** \rightarrow **Products**, then select the products you need and choose the appropriate action:

- Short Description
- Long Description
- Short and Long Description

Now, **mass content generation** requests are processed via a **queue system** to prevent potential freezing issues. Keep in mind that configuration changes (e.g., model selection) may not take effect immediately and will continue using previous settings until Magento updates the queue state.

Products											👤 den	nouser 👻

Within the **ChatGPT AI Content Generator PRO** version you can also generate the following Meta data for multiple product pages via mass action:

- Meta Title
- Meta Keywords
- Meta Description

In the PRO version of the extension, once you've selected the desired products, you can opt for one or several actions from the modal window:

Products	Generate with Al		
Search by keyword			
Actions			
Delete	Content to Generate		
Change status	Short Description		
Update attributes	✓ Long Description		
Assign Inventory Source	Meta Title		
Transfer Inventory To Source	Meta Keywords		
Generate Content with Al	Meta Description		
✓ 4			
5			

The duration of the content generation process depends on the number of products selected for the mass action. However, you can track the process's status through a progress bar that appears as soon as the process starts.

Generate with AI - click this button to automatically generate the description based on CMS page name. This option becomes available when editing existing CMS pages.

Advanced Generation with AI - click this button to automatically generate the CMS page description based on custom input. This option is available for existing CMS pages as well as for cases

when you are creating new CMS pages.

Don't forget to click 'Save' on Page Builder editing page, when the content is generated and you've made the necessary corrections if any.

CMS Pages Metadata

With the extension you can automatically add **Meta Title** and **Meta Description** to your CMS pages, to make your store pages more visible to search engines and therefore to customers. To do this please go to **Catalog** \rightarrow **Content** \rightarrow **Needed CMS Page** \rightarrow **Search Engine Optimization**.

Search Engine Optimization 📝

	Generate with AI	Advanced Generation with AI	

Generate with AI - click this button to generate the Meta Title / Meta Description / Meta Keywords description based on the CMS page name.

Advanced generation with AI - click this button to automatically generate the Meta Title / Meta Description / Meta Keywords based on your custom input.

Adding content to CMS Pages via Mass Action

With the ChatGPT AI Content Generator extension, you can add SEO data to multiple CMS pages at

once using mass action. Navigate to Content \rightarrow Pages, then select the pages you need and choose the appropriate actions in the modal window (you can choose one or several actions simultaneously):

- Meta Title
- Meta Keywords
- Meta Description

Now, **mass content generation** requests are processed via a **queue system** to prevent potential freezing issues. Keep in mind that configuration changes (e.g., model selection) may not take effect immediately and will continue using previous settings until Magento updates the queue state.

Pages	Generate with Al		
Search by keyword	V V	Content to Generate	
Actions	~	Meta Title	
Delete	~	Meta Keywords	
Disable	~	Meta Description	
Enable			
Edit			
Generate Content with AI			
✓ 4 Privac			
S About			

The duration of the content generation process depends on the number of pages selected for the mass action. However, you can track the process's status through a progress bar that appears as soon as the process starts.

Generate Content for Blog

Al Content Generator is compatible with **Amasty Blog Pro** extension (and also included in Blog Pro). The compatibility is available as a part of an active product subscription or support subscription. This means that if you have both modules installed, you can automatically generate Blog Posts content using Al Content Generator.

To adjust Blog content generation general settings please head to Stores \rightarrow Configuration \rightarrow Amasty Extensions \rightarrow Al Content Generator \rightarrow Blog Posts Settings:

Blog Posts Settings	
Model Name [store view]	gpt-4o-mini
	GPT-40 mini is the most cost-effective and efficient model, perfect for quick and simple tasks. Additionally, we support the following models: GPT-3, GPT-4, GPT-4 Turbo, and GPT-40.
Temperature [store view]	0.6
	What sampling temperature to use, between 0 and 2. Higher values like 0.8 will make the output more random, while lower values like 0.2 will make it more focused and deterministic.
Title Maximum Tokens [store view]	200
	From 1 to 256. The maximum number of tokens to generate in the completion.
Full Content Maximum Tokens [store view]	3900
	From 1 to 3900. The maximum number of tokens to generate in the completion.
Tags Maximum Tokens [store view]	200
	From 1 to 256. The maximum number of tokens to generate in the completion.
Short Content Maximum Tokens [store view]	3000
	From 1 to 3000. The maximum number of tokens to generate in the completion.

Meta Title Maximum Tokens	200
[store view]	From 1 to 256. The maximum number of tokens to generate in the
	completion.
Meta Tags Maximum Tokens [store view]	200
	From 1 to 256. The maximum number of tokens to generate in the completion.
Meta Description Maximum Tokens [store view]	1000
	From 1 to 1024. The maximum number of tokens to generate in the completion.
Stop [store view]	
	Up to 4 sequences where the API will stop generating further tokens.
	The returned text will not contain the stop sequence.
Strings to Exclude [store view]	price size
	Specify the excluded tokens separated by spaces. For example: title price

Fill in the settings the same way as it was described above for Product, Category and CMS pages.

Then you can proceed to any Post page and generate the content you need. With the ChatGPT AI Content Generator for Magento 2 you can automatically generate the following types of content for Blog Post pages:

• Title

When it comes to designing a homepage for your Magento 2 website, there are a few key elements that you need to consider. Your homepage is the first impression that your visitors will have of your online store, so it's important to make sure it's visually appealing, user-friendly, and showcases your products in the best possible way. In this blog post, we will guide you through the process of designing a homepage for your Magento 2 website, without focusing on price and size.

Compatibility with Amasty SEO Toolkit Pro/Premium

The **ChatGPT AI Content Generator** solution is compatible with the **SEO Toolkit Pro/Premium** extension versions (ChatGPT AI Content Generator is included in SEO Toolkit Pro, while ChatGPT AI Content Generator Pro is included in SEO Toolkit Premium). This compatibility is available as part of an active product or support subscription.

If you have both modules installed, you can enhance the functionality of SEO Toolkit with the ability to automatically generate compelling descriptions and metadata, including generating metadata for category, product, and CMS pages directly during page inspection using the SEO Toolbar feature, in case issues with metadata are detected.

Please refer to the SEO Toolkit for Magento 2 guide to get detailed information about this compatibility.

[Pro] Generate Email Templates

This functionality is available within **ChatGPT AI Content Generator Pro**.

To automatically generate Email templates, please navigate to **Marketing** \rightarrow **Communication** \rightarrow **Email Templates**.

[Pro] Generate content for Brand Pages

The **Pro version** of the extension is compatible with **Amasty Shop by Brand** (the compatibility is available as a part of an active product subscription or support subscription). This means that if you have both extensions installed, you can automatically generate Brand Pages content using Al Content Generator.

This functionality is available if you have **both extensions installed**: Shop by Brand for Magento 2 and ChatGPT AI Content Generator Pro for Magento 2.

To adjust Brand Pages content generation general settings please head to **Stores** → **Configuration** → **Amasty Extensions** → **Al Content Generator** → **Brand Pages Settings**:

Brand Pages Settings		
Model Name [store view]	gpt-4o-mini	•
	GPT-4o mini is the most cost-effective and efficient model, perfe quick and simple tasks. Additionally, we support the following models: GPT-3, GPT-4, GPT-4 Turbo, and GPT-4o.	ct for

Use Case: Customize Prompts for Mass Generation

For example, you may need to mass-generate short descriptions for specific products incorporating particular nuances to these descriptions (e.g., mentioning a brand, emphasizing pricing policy, setting a specific length, or including a CTA). Here are two approaches:

Option 1. Customize prompts in the Prompt Management grid

If you need **the same prompt for a specific group of products** and are using the **PRO version** of the extension, follow these steps:

- Navigate to Amasty → Al Content Generator → Prompt Management.
- Select the prompt for Short Description and edit it: customize the input and add variables as needed.

Prom	pt Management	1	demouser 🔻
Search by	/ keyword	Q	Columns 🔻

• Click **Apply** to generate content based on the customized prompt for all selected products.

Option 2: Customize prompts for specific products

This option is applicable for **Standard and PRO versions** of the extension.

If you need to mass-generate content, but **certain products of the list require nuanced prompts**, follow these steps:

 Go to Stores → Attributes → Product and create a new attribute (e.g., AI Helper) with the input type Text Area.

Attribute Properties

Default Label \star	Al Helper
Catalog Input Type for Store Owner	Text Area 💌
Values Required	No 🔻

• Assign this attribute to relevant product categories via **Stores** \rightarrow **Attributes** \rightarrow **Attribute Set**.

Groups

 Open Amasty → Al Content Generator → Configuration, scroll to the Product Settings tab, and select your new custom attribute in Content Based on Selected Product Attributes. Save the configuration and flush the cache if needed.

General Settings

Enable Module [store view]	Yes	Ŧ	
Language [store view]	Store Language	Ŧ	
	By default ChatGPT generates a response in the language of the selected store view locale.	ie	
History Log Auto-Cleaning [global]	Yes	Ŧ	?
Auto-Cleaning Period (Days) [global]	30		?

Product Settings

[store view]	Activity Al Helper brand Category Gear Categories Climate Collar				
	Color Country of Manufacture New Theme	•			

• In the **Product Grid**, open products with the new attribute. Enter a tailored prompt in the Al Helper field. *Tip:* For bulk editing, export products with attributes, modify the custom attribute in an editor (e.g. you may copy the tailored prompt to the particular products you need), and reimport the data.

Fitness Equipment

Fitness Equipment is a category of products designed to help you achieve your fitness goals. Whether you're looking to build muscle, improve your endurance, or simply stay in shape, these items are essential for any fitness enthusiast. From weights and resistance bands to treadmills and exercise bikes, there's something for everyone in this category.

Fitness Equipment is a subcategory of Gear, which means that it includes all the tools and accessories you need to support your active lifestyle. Whether you're a seasoned athlete or just starting out on your fitness journey, you'll find everything you need to get the most out of your workouts.

One of the great things about Fitness Equipment is that it's incredibly versatile. You can use it to target specific muscle groups, improve your cardiovascular fitness, or simply get a great workout in your own home. With so many different options available, you're sure to find something that meets your needs and fits your budget.

Whether you're looking to build strength, burn fat, or simply stay in shape, Fitness Equipment is an essential part of any fitness routine. So why wait? Browse our selection today and start working towards your fitness goals!

Troubleshooting

Openai internal error

Problem:

The following error appears during descripton generation:

Last update: 2025/08/13 magento_2:chatgpt_ai_content_generator https://amasty.com/docs/doku.php?id=magento_2:chatgpt_ai_content_generator 08:41

Solution:

- **Temperature Setting:** Adjust the temperature setting to a value below 1.5. The error occurs when the setting is equal to or greater than 1.5. Higher values cause OpenAI to process requests for extended periods, potentially leading to server interruptions before receiving a response.
- Maximum Tokens: Reduce the maximum tokens value.

Additional packages (provided in composer suggestions)

To make additional functionality available, please install the **suggested packages** you may need.

Available as a part of an active product **subscription** or support subscription:

For Basic and Pro versions:

• **amasty/module-ai-blog-pro-content-generator** - Install this package to ensure compatibility with Amasty Blog Pro.

For **Pro** tariff plan only:

- **amasty/module-ai-mass-actions-content-generator** Install this package to use the mass SEO field content generation functionality for product pages.
- **amasty/module-ai-xlanding-content-generator** Install this package to ensure compatibility with Amasty Landing Pages.
- amasty/module-ai-shop-by-brand-content-generator Install this package to ensure compatibility with Amasty Shop by Brand.
