

amasty

For more information, see the way the [B2B Company Account for Magento 2](#) extension works.

Guide for B2B Company Account for Magento 2

Simplify purchases for your customers by introducing B2B Company Accounts to Magento 2 store. Let companies register multiple user accounts, allow special permissions to enhance the shopping, and get more orders.

- Create multiple company accounts as a store admin;
- Allow businesses to create and manage sub-accounts from the frontend;
- Transfer users between company accounts in the backend;
- Easily manage all company accounts in one place;
- Offer personalized marketing and pricing based on company membership.
- REST API Support

The extension is compatible with **Hyvä Theme**. You can find the 'amasty/module-company-account-hyva' package for installing in composer suggest. The compatibility is available as a part of an active product subscription or support subscription.

General Settings

To configure the **B2B Company Account** extension on your Magento 2 instance, start by adjusting the **General Settings**.

To access **General Settings**, please go to **Stores → Configuration → Amasty Extensions → Company Account**.

General

URL Key
[global]

Please note that the entered value must be unique, otherwise it may conflict with the Magento B2B Company feature.

Allow Company Creation from the Registration Page
[global]

Allow Company Creation for Customer Group(s)
[global]

- Big Whale Development LTD
- Business Company
- Example Company LLC
- General**
- Retailer
- Small companies
- Wholesale

Approve Companies Automatically
[global]

If set to Yes, all new companies will automatically get Active status.

Inactivate Customer upon Removing from Company Account
[global]

if disabled, the customer will still remain Active after being removed from Company in admin panel. Note: you can change Customer's Status on Customer edit page.

URL Key - add an URL key for company pages on the storefront.

Please note that the entered value for the 'URL Key' setting must be unique, otherwise it may conflict with the Magento B2B Company feature.

Allow Company Creation for Customer Group(s) - choose the customer groups that will see the *Company Account* tab in their customer account. It is especially handy if your store sells both to businesses and regular shoppers.

Allow Company Creation from the Registration Page - if enabled, the "Allow Company Creation for Customer Group(s)" setting will be hidden and the creation of a company account will be available to all users on the frontend along with the creation of a customer account. This functionality is available as a part of an active product subscription or support subscription.

See the example below to understand how the option for creating a company account from the

registration page will appear.

On the Sign In page:

Show Password

* Required Fields

Create an Account with Company Account

Approve Companies Automatically - set to *Yes* if you want all new company creation request automatically transfer to *Active* status without store admin approval. Set to *No*, if you want to approve each company request manually.

Inactivate Customer upon Removing from Company Account - set to *Yes* to inactivate user

account upon removing from company account by the store admin.

Please note that, if the company administrator deleted a user from the company account management panel, the user will be permanently deleted from the system. In case the user will be deleted from store backend by store admin, the **Inactivate Customer upon Removing from Company Account** configuration in General Settings determines, what status (Active or Inactive) such user account would acquire.

Admin Notification

In the **Admin Notification** section store admins can configure what email notifications will be sent to store admins upon a specified event. Also, adjust the template that will be used for each notification type.

You can send automatic emails for events like:

- New company registration request;
- New company creation;
- Sales representative appointment.

Company Store Credits Payment Method

To allow a new offline payment method in your store, first, you need to go to the **Stores → Configuration → Sales → Payment Methods**. Then, please kindly scroll down to the **Other Payment Methods → Company Store Credit (Amasty)** tab, and click on the *Company Store Credit Tab*.

Please kindly note that the B2B Company Account extension **doesn't** handle the payments similarly to the PayPal or Braintree integrations. It is intended to use as an offline payment method, where the extension covers transaction logging/tracking tool. And the money transfers itself are should be handled in any other convenient for the store way, e.g. wire transfers, credit cards payments using PayPal or any other payment methods that are available.

⌵ Company Store Credit (Amasty)

Enabled [website]	Yes	▼
Title [store view]	Company Store Credit	
New Order Status [website]	Processing	▼
Payment from Applicable Countries [website]	All Allowed Countries	▼
Sort Order [website]	1	

Enabled - set to Yes to allow Company Store Credits functionality in the store.

The *Enabled* setting allows using Company Store Credits as a payment method for **ALL COMPANIES**. In case you don't want to allow using Store Credits for certain companies, you need to proceed in the following order:

1. First, go to the Company Account settings for each *CompanyName* that you'd like to exclude from Store Credits payment method. To do that, please go to **Customers → Amasty Company Accounts → Manage Companies → Select *CompanyName* on the grid → Click *Edit***
2. Scroll down to the **Payment Restrictions** tab and select **Company Store Credits**.
3. Hit the **Save** button.

4. Do the same action of restricting *Company Store Credit* for each company that you don't want to be using Store Credits.

5. Go back to **Configuration** → **Sales** → **Payment Methods** to finalize configuring new offline payment method.

Title - Customize the payment method name, so that an appropriate naming will be visible on the store frontend.

New Order Status - Set the Order Status that will be automatically assigned to all new orders that were placed using Store Credits as a payment option.

Payment from Applicable Countries - select the **All Allowed Countries** if the payment method has to be available for every eligible company no matter what country they set in the Address field. In case you want to restrict Store Credit availability, select the **Payment from Specific Countries**, and a new setting will appear.

Payment from Specific Countries - select all countries that will be allowed to pay with Store Credits.

Sort Order - set the display priority of this payment method on the checkout frontend. Enter a whole number, where the 0 is the highest position, and 3892 is much lower.

Company Accounts

To manage all company accounts from the backend as a store admin, kindly go to **Customers** → **Amasty Company Accounts** → **Manage Companies**. Then, a **Company Accounts** grid will open.

Company Accounts

[Add New Company](#)

Filters | Default View | Columns

Actions | 8 records found | 20 per page | 1 of 1

ID	Status	Phone Number	Country	City	Customer Group	Company Admin	Action	Company Type
2	Active	425-258-6012	United States	Everett	Example Company LLC	Veronica Costello	Edit	Parent
3	Active	716-341-3373	United States	Buffalo	Default Group	Kathryn Halbert	Edit	Unrelated
4	Active	480-229-8327	United States	Gilbert	Big Whale Development LTD	John Engman	Edit	Child
5	Active	317-364-4121	United States	Indianapolis	Small companies	Daniel Wilson	Edit	Child

On the grid, you can see all company accounts that are created in your store, and track the status for each of them. The information like company phone number, customer group, company admin, country, and the city is also displayed by default. Also, in this grid you can see the company type of each account: Parent, Child or Unrelated.

To add a new company account manually from the backend, kindly click the **Add New Company** orange button in the top-right corner of the screen.

How to add new Company Account from the backend

To create a new company account from the backend as an admin, you need to complete 4 blocks with company information.

General Settings

New Company

← Back Delete Account Reset Save **Save&Close**

 Rejected
 Pending
 Inactive
 Active
 Rejected

Rejected Date

Rejected Reason
 Please, re-check the accuracy of information about the company.
 The following fields must be completed:
 - Company legal address;
 - Company legal name.

Rejected Date - this field will be completed automatically, based on the date when the *Rejected* status was assigned.

Rejected Reason - here you can specify the reason as to why the company was denied.

The screenshot shows the 'New Company' form in the Magento 2 admin interface. A warning popup is centered on the screen, asking for confirmation to reject the company. The popup text reads: 'Are you sure you want to reject this company? Confirmation will block login for all company users. Please specify a reason for rejection to explain your choice to Company Administrator'. The popup has 'Cancel' and 'OK' buttons. The background form is partially visible, showing the 'General' section with fields for 'Company Name', 'Status', 'Rejected Date', 'Rejected Reason', and 'Company Administrator'. The 'Rejected Reason' field contains the text: 'Not all paperwork is submitted to our office. Please, check the necessary documents and send them via mail.' The 'Company Administrator' field contains the name 'Deborah Bryant'.

After the pressing the **Save** button with *Rejected* company status, the warning popup appears. It is designed to prevent any accidental rejects, and admins will be asked to fill in the *Rejected Reason* field to communicate the reasons for company disapproval.

Assign the same Customer Group to all Users - set to *Yes* to automatically assign customer groups to all users that will belong to the chosen company.

If your business prefers to assign customer groups based on VAT ID's as specified in **Store → Configuration → Customers → Customer Configuration → Create New Account Options**. Then you might want to choose the **Assign the same Customer Group to all Users** set to **No** to disable automatic assign to one customer group based on the company.

Create New Account Options

Show VAT Number on Storefront <small>[website]</small>	No

To show VAT number on Storefront, set Show VAT Number on Storefront option to Yes.

You can try the way it works in your store on the [B2B Company Account extension demo](#).

Company Administrator - choose a company administrator from the list of existing customers.

Customer Group - choose the customer group that will be assigned for all company members. Note that, you can also create custom customer groups for each specific company. It comes in especially handy if you want to restrict access to certain catalog pages or offer tier pricing based on user group.

Sales Representative - choose the Sales Representative for the company.

The *Sales Representative* users are configured in the **System → Permissions → All users**. You can assign special permissions for a users with Magento 2 *User Roles* functionality.

Company Information

In the **Company Information** block, you'll be asked to fill in the main info on the company.

Company Information

Company Legal Name	<input type="text" value="Example Business LTD"/>
Company Email *	<input type="text" value="example@business.com"/>
VAT\TAX ID	<input type="text" value="ATU15662209"/>
Reseller ID	<input type="text" value="1548975"/>

Company Legal Name - enter the company legal name, as it is registered in official paperwork.

Company Email - enter the main email to contact the company.

VAT\TAX ID - enter the VAT/TAX ID number. It is the value-added tax number that is assigned to the company by some jurisdictions for tax reporting purposes. It is highly useful for EU businesses, and also in many other countries.

Reseller ID - enter the resale number that is assigned to the company for tax reporting purposes.

Company Legal Address

In the **Company Legal Address** block, you'll be asked to fill in the main info on the company registration address.

Company Legal Address

Street Address *	<input type="text" value="135 Hershell Hollow Road"/>
City *	<input type="text" value="Everett"/>
Country *	<input type="text" value="United States"/> ▼
State/Province	<input type="text" value="Washington"/>
ZIP/Postal Code *	<input type="text" value="98201"/>
Phone Number *	<input type="text" value="425-258-6012"/>

Street Address - add the street address where the company is registered to conduct business.

City - enter the city name where the company is registered to conduct business.

Country - choose the required country name from the dropdown list.

State/Province - enter the state or province, if applicable for a specific company.

ZIP/Postal Code - add the ZIP or postal code where the company is registered to conduct business.

Phone Number - enter the main phone number for the company.

Company Users

In this block, store admin can assign or unassign existing users to a new company from the backend. To add users, click on the **Add New User** in the top-right corner of the block.

 Default View 

 Columns 

4 records found

20  per page

1 of 1

Date	Operation	Comment	Amount	Balance
Jan 14, 2021 4:14:56 AM	Repaid by Company	Bonus points for loyalty	\$100.00	\$830.00
Jan 14, 2021 4:14:39 AM	Added by Admin	Special agreement	\$150.00	\$730.00
Jan 14, 2021 4:14:14 AM	Repaid by Company	Wire transfer	\$80.00	\$580.00
Jan 13, 2021 9:47:41 AM	Repaid by Company	Initial pre-payment as per agreement #326 of Jan 05 2021	\$500.00	\$500.00

Credit Currency - set the currency in which Store Credits will be counted. Please note that in the dropdown, only Base Currencies will be shown.

Current Balance - displays the number of store credits that are available for the CompanyName to spend. This card has also an **Issued Credit** information, that provides the admin with data on how much credit admin has issued to this company for all the time. *Issued Credit* is calculated as a sum of *Added and Substracted* credits.

To Be Paid - shows the number of store credits that the CompanyName needs to pay back to your store. In case the *To Be Paid* amount is NEGATIVE, this means that the company pre-paid some money in advance. In this case, the *Current Balance* will be a positive number.

Manage Credits Balance

To add funds to the company's store credits, please click the **+ Change Balance** button in the **Current Balance** block.

Then, a pop-up window will appear as shown on the example screenshot below.

Choose Operation - select the operation type. It impacts the way how the store credit totals will be calculated.

- *Added By Admin* - will add credits to the *Current Balance*. For example, *Added by Admin* can be used in cases like 'Admin and Company agreed that Company is allowed to have \$XX money of credits. Company will order goods using store credits and then later will transfer real money to the store.' Admin uses *Added by Admin* operation to set the initial store credits balance.
- *Subtracted by Admin* - will reduce the number of credits on the company's balance.
- *Repaid by the Company* - will add credits to company's balance, BUT the 'To be Paid' amount will be reduced. You can use it in cases when client-company transfers you actual money for orders that were paid via store credits. Also, it can be used in the scenarios when companies agreed to put money on the balance BEFORE buying any goods.

Amount - simply enter the number of store credits that need to be added/subtracted to the balance.

Comment - if needed, you can leave a short comment to mark the transactions' context and easily track them down in the future.

Overdraft for Store Credits

The extension allows to set up an overdraft of store credits. To do this, please set the switcher in the **Allow Overdraft** setting to **Yes**.

Then, more configuration options will appear.

Current Balance

-\$749.36

Overdraft Limit: **\$1,000.00**
Issued Credit: **-\$55.00**

[+ Change Balance](#)

To Be Paid

\$694.36

Warning! The overdraft payment period is overdue. Every day a **30%** penalty is imposed on the entire overdraft amount(\$749.36).

[Send a Reminder](#)

Allow Overdraft Yes ?

Overdraft Limit * \$ 1,000.00

Specify the maximum value of negative balance.

Penalty-Free Period Set

15

Day(s)

Overdue Payment Penalty, % * 30

Overdraft Limit - enter the number of store credits a company is allowed to overspend.

Penalty-Free Period - the extension allows charging up a penalty for not paying back the debt in the set timeframe. Select the *Unlimited* to not impose any penalties for using an overdraft.

In case you want to charge penalties, select the *Set* option. Then, configure the time where if a company pays back, it won't be charged a penalty. You can set the period in Days, Weeks, Years.

Overdue Payment Penalty, % - enter the number of how many penalties to charge. This is a percentage of all overdraft amount used.

In case a company is on its **Penalty period**, the extension automatically changes the colour of **To be Paid** block to make it more noticeable and urge companies pay back money faster. Moreover, the extension also allows to send e-mail reminders on debt in the **To be Paid** block in one click — simply click the **+Send a Reminder** button.

Company Account on the frontend

With the **B2B Company Account** extension for Magento 2, company admins can set up different levels of access to company account information.

Check the demo to [manage the company account as an admin user](#) or to see the company [as a regular employee](#).

The **company administrator** is the user that created a request for a company account or was assigned as a company admin from the backend by the store admin. The company admin has full access to the company account setting on the frontend.

Company Account

See the way **Company Account** appears on the frontend. A new section with additional tabs — Company Account, Manage Company Accounts, Users, Roles, Store Credit, and Orders — has been added to the left-side user account navigation.

[Compare Products](#)

Enter the **First Name** and **Last Name**.

Add personal **Email** of the employee.

User Role - choose the user role of an employee to limit access to certain areas of Company Account. To adjust user roles, please go to the **Roles** tab in the **Company Account**.

Job Title - enter the job title of the employee.

Phone Number - fill in the contact phone number for the user.

Status - set to *Active* to activate the user.

Company Roles

On the **Company Roles** page, you can adjust the access level for each role.

To add a new role, click the + **New Role** button.

After that, you'll be asked to specify the **Role Title** - the name of the role that will be visible for all users within the company account.

Also, set up the **Role Permissions** via the permission tree to allow or restrict access to certain areas or actions for all users that belong to this user role.

You can provide the users with permissions to view and manage Subaccounts, view and edit Users,

use Company Store Credit and more. Also, you can restrict the rights to place and view orders within a company. This way, B2B clients can precisely distribute appropriate user permissions and save time and efforts on communication.

Company Store Credit

On this page, company users with the appropriate role permissions can view the current store credit balance, pending payments, and transaction history.

Request to create company account from the fronted

If the user belongs to the customer group that is allowed to create requests for a company account, this user will see the **Company Account** section in their customer account.

After pressing the **Create** button, the user will be asked to fill in some information on the company, similar to the backend company creation.

After all necessary fields are completed, please click the **Submit** button. Then, the company account request will be sent to the store admin for approval (if in General setting automatic company approval is disabled).

The user will see a success message, and company status will be **Pending** upon admin's approval or reject. Below, see an example of how it looks on the frontend:

Import and Export

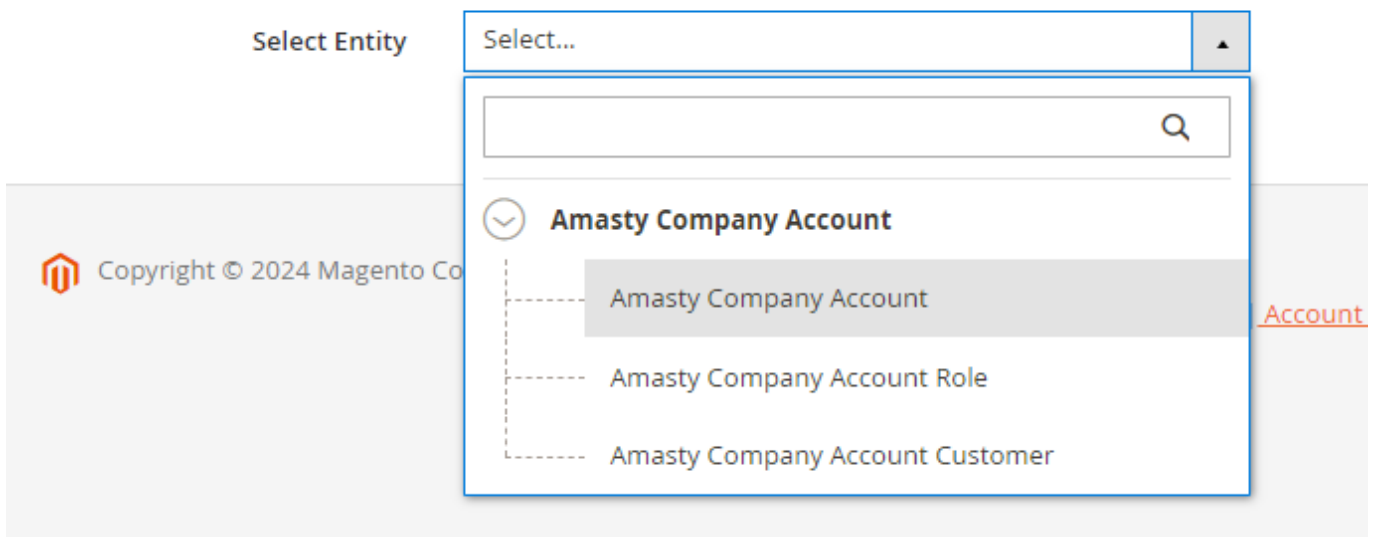

With the B2B Company Account extension you can import and export **Company Accounts** data. This functionality is available as a part of an active product subscription or support subscription.

To **Import** the company accounts data, please navigate to **System → Amasty Import → Import → Select Entity → Amasty Company Account → choose the needed entity:**

Import

Down

Import Settings

Then, scroll down to the *Fields Configuration* tab and enable the needed subentities for import.

Add Modifier

 **Amasty Company Account Order** 

Enabled Yes

Entity Key 

Custom Entity Key

 **Amasty Company Account Role** 

 **Amasty Company Account Customer**

Enabled No

 **Amasty Company Account Credit**

Adjust other settings for the import according to your needs.

To **Export** company accounts data, please navigate to **System** → **Amasty Export** → **Export** → **Select Entity** → **Amasty Company Account** → **choose the needed entity**:

Export

Export Settings

Then, scroll down to the *Fields Configuration* tab and enable the needed subentities for export.

 **Add Modifier**

Add Static Field

 **Amasty Company Account** 

Enabled Yes

Entity Key 

Output Entity Key 

Add Fields

 **Amasty Company Account Role**

 **Amasty Company Credit**

 **Amasty Company Account Orders**

Adjust other settings for the export according to your needs.

Compatibility with REST API

B2B Company Account extension supports API.

To get company accounts data you should be authorized as admin and have the API Authorization token. Use the API URLs specified in webapi.xml file:

webapi.xml 2.43 KiB

```

1 <?xml version="1.0"?>
2 <routes xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xsi:noNamespaceSchemaLocation="urn:mag
3   <route url="/V1/amcompany/company/:companyId" method="GET">
4     <service class="Amasty\CompanyAccount\Api\CompanyRepositoryInterface" method="getById"/>
5     <resources>
6       <resource ref="Amasty_CompanyAccount::company_management" />
7     </resources>
8   </route>
9   <route url="/V1/amcompany/company" method="POST">
10    <service class="Amasty\CompanyAccount\Api\CompanyRepositoryInterface" method="save"/>
11    <resources>
12      <resource ref="Amasty_CompanyAccount::company_management" />
13    </resources>
14  </route>
15  <route url="/V1/amcompany/company/:companyId" method="PUT">
16    <service class="Amasty\CompanyAccount\Api\CompanyRepositoryInterface" method="save"/>
17    <resources>
18      <resource ref="Amasty_CompanyAccount::company_management" />
19    </resources>
20  </route>
21  <route url="/V1/amcompany/company/:companyId" method="DELETE">
22    <service class="Amasty\CompanyAccount\Api\CompanyRepositoryInterface" method="deleteById"/>
23    <resources>
24      <resource ref="Amasty_CompanyAccount::company_management" />
25    </resources>
26  </route>
27
28  <route url="/V1/amcompany/credit/:companyId" method="GET">
29    <service class="Amasty\CompanyAccount\Api\CreditRepositoryInterface" method="getByCompanyId"
30

```

Use the following methods to handle CRUD actions on Company Account via REST API:

- To create company account

```
method="POST"
endpoint: /V1/amcompany/company
```

- To update company account data

```
method="PUT"
endpoint: /V1/amcompany/company/:companyId
```

- To receive company account data

```
method="GET"
endpoint: /V1/amcompany/company/:companyId
```

- To delete company account

```
method="DELETE"
endpoint: /V1/amcompany/company/:companyId
```

- To assign customers to company account

```
method="POST"  
endpoint: /V1/amcompany/customer/:companyId
```

- To delete customers from company account

```
method="DELETE"  
endpoint: /V1/amcompany/customer/:customerId
```

- To update company account's store credits

```
method="PUT"  
endpoint: /V1/amcompany/credit/:companyId
```

- To view company account's store credits

```
method="GET"  
endpoint: /V1/amcompany/credit/:companyId
```

Additional packages (provided in composer suggestions)

To make additional functionality available, please install the suggested packages you may need.

Available with **no additional fees**:

- **amasty/module-company-account-to-builder** - Install this module to activate the integration with the Custom Reports Builder extension and create valuable reports about your Company Accounts.

Available as a part of an active product **subscription** or support subscription:

- **amasty/module-company-account-hyva** - Install this package to ensure the Company Account extension works with the Hyvä Theme.
- **amasty/module-company-account-export-entity** - Install this package to export Company Accounts data.
- **amasty/module-company-account-import-entity** - Install this package to import Company Accounts data.
- **amasty/module-company-account-register** - This package allows users to create a Company Account from the 'Sign in' and 'Create an Account' pages on Luma Theme.
- **amasty/module-company-account-register-hyva** - This package allows users to create a Company Account from the 'Sign in' and 'Create an Account' pages on Hyva Theme.
- **amasty/module-company-account-subaccount** - Install this package to build a Company Hierarchy by creating and assigning related companies to a designated parent company on Luma Theme.
- **amasty/module-company-account-subaccount-hyva** - Install this package to build a

Company Hierarchy by creating and assigning related companies to a designated parent company on Hyva Theme.

- **amasty/module-company-account-subscription-functionality** - This package provides the ability to flexibly turn off custom email notifications.

Find out how to install the **B2B Company Account** extension for Magento 2 via [Composer](#).
