For more details, see the way the Customer Attributes for Magento 2 extension works.

# **Guide for Customer Attributes for Magento 2**

Display additional attribute fields on the registration page to collect important customer data. Create customer attributes of various types to effectively gather as much information as you need.

- · Show extra attributes of different input types
- Manage customer attributes from the admin panel
- · Effectively process collected customer data
- Use additional attributes in email templates
- Generate handy attribute usage reports
- ADA & WCAG compliant (for Hyva and Luma Themes)
- Hyvä Checkout ready

Magento 2 Customer Attributes and Customer Attributes Pro extensions are compatible with **Hyvä themes**. You can find the packages: *amasty/module-customer-attributes-hyva-compatibility* (for Lite and Pro versions) and additionally *amasty/module-customer-login-attributes-hyva-compatibility* (for Pro version) for installing in composer suggest (Note: the compatibility is available as part of an active Product Subscription or Support Subscription).

The extension is compatible with **Hyvä Checkout**. You can find the '*amasty/module-customerattributes-hyva-checkout*' package for installing in composer suggest. The compatibility is available as a part of an active product subscription or support subscription.

Explore our internal **Knowledge Base** to gain even more valuable insights and uncover answers to popular questions about the configuration and features of the Magento 2 Customer Attributes extension.

## **General Settings**

To configure general extension settings please go to **Stores**  $\rightarrow$  **Configuration**  $\rightarrow$  **Customer Attributes**.

		Save Config
General Settings		
Display customer attributes on the "select customer" grid [website]	Yes This applies to the customers grid which is used select a customer during order creation at the backend	to
Allow customers to change their group [website]	Yes	•

**Display Customer Attributes on the 'selected customer' grid'** - Please set this option to 'Yes' to see the attributes when you select a customer during order creation from the backend.

**Allow customers to change their group** - This option lets customers choose and change their customer group. To make the option work please create customer attribute of 'Customer Group Selector' input type.

## **Attribute Creation**

To create a new attribute please go to **Customers**  $\rightarrow$  **Customer Attributes**  $\rightarrow$  **Manage Attributes**. On this grid, you can add the new attributes and edit the already created ones. To add an attribute, please click the **Add New Attribute** button.

Customer Attributes

Default Value	Date Multiple Salect
	Multiple Checkbox Select with Images
Values Required	Dropdown
	Yes/No
	Single Radio Select with Images
Input Validation	Customer Group Selector
	Static Text
	Single File Upload

**Default Label/ Attribute Code** - Specify an attribute label and a code. The code will be used only for internal needs.

**Store View** - Select the store view for which the attribute will be available.

**Catalog Input Type for Store Owner** - choose among various input types depending on your specific needs. Please note that the following fields depend on the selected input type.

NOTE: after the attribute code and the catalog input type are specified and saved they can't be

changed.
----------

Catalog Input Type for Store O wner	Text Field	•
Default value	Sales Manager	
Values Required	Yes 🔹	
Input Validation	None	
	None Decimal Number	
	Integer Number	
	Email	
Attribute Configuration	LIRI	
	Letters	
	Letters (2.7. A.7) or Numbers (0.9)	
Show on the Customers Grid	CNDLV(slidstics	
Show on the Orders Grid	Nickname validation	
	Royalty Card Number	
	RUT code validation	
Show on the Order View page	No 🔻	
	In the Account Information block at the Backend	

Default Value - Specify the value which will be preselected by default if necessary.

**Values Required** - If the option is set to 'yes' customers won't be able to leave this attribute field blank while getting registered.

To make the value required in Hyvä Checkout, the "Required" checkbox must be selected for the attribute in **Stores > Configuration > Hyvä Themes > Checkout > Shipping Address Form**.

Input Validation - Specify the type of input validation.

**CNPJ Validation** - a taxpayer identification number for Brazilian companies. **CPF Validation** - an individual number in Brazil. **RUT code validation** - a taxpayer identification number in Chile. Select pages on which the attribute will be displayed. Specify attribute display order.

#### Attribute Configuration

## **Attribute Relations Management**

To manage attribute relations please go to **Customers**  $\rightarrow$  **Customer Attributes**  $\rightarrow$  **Manage Attribute Relations.** 

Attribute Relation Q 💄 admin 🗸										
			Add New Rela	tion						
1 records found	Tecords found     Image     Image     Image     Image									
Relation Name ↓	Parent Attribute	Dependent Attributes	Attribute Codes	Action						
Distributor	Choose your customer group	Whould you like to join an affiliate program?, What is your company name?, Your position in the company	customer_group, affiliate_program, company_name, company_position	Edit						

**Attribute Relation** - On the 'Attribute Relation' grid you'll see all created relations. It's possible to add an unlimited number of new relations and manage already created once.

Relation Name - Specify a relation name that will be used for internal needs only.

**Parent Attribute** - Choose the attribute that will be parent.

Please, consider, that only these types of attributes can be used as the parent attributes.

- Multiple Select
- Dropdown
- Multiple Checkbox Select with Images

#### • Single Radio Select with Images

Attribute Options - Select attribute values that will trigger the display of dependent attributes.

**Dependent Attributes** - Specify which attributes will be dependent. These attributes will be displayed only if a customer selects one of the specified values of a parent attribute.

**Dependent attributes** are shown because the **'Distributor'** option is chosen. According to our settings 'Distributor' is the value of a parent attribute which triggers the display of dependent attributes.

Choose your customer group

Your position in the company *	
Sales Manager	
Whould you like to join an affiliate program?	
Yes	~

## **Attribute Display on the Backend**

Show additional attributes on the Customers grid. Filter the list of shoppers using custom attributes. E.g. you can find out where customers see information about your store and fine tune your marketing strategy accordingly.

**NOTE:** Custom attributes will be also displayed on the 'Select Customer' grid when a store admin generates orders from the backend. Apart from that, you can display custom attributes on the order grid as well as on the order info page.

#### <u>a</u>masty

Also, the attributes can be viewed and edited from the customer's account. Take a look at the **Account Information** section to see the existing attributes.

## **Include Customer Attributes in E-mail**

The extension is compatible with Order Status extension for Magento 2.

You can include customer attributes in your business e-mails, by inserting the special variable in your messages. Insert a customer attribute into the code:

If customer attribute is *profession*, for instance, insert the following in your letter:

{{var order.customer.getData('profession')}}`

or

```
{{var order.customer.getProfession()}}
```

You can include any custom attributes into any email template.

The extension is fully compatible with **Magento 2 PDF Customizer**. Use more customer attributes in your templates!

## **Attributes Import and Export**

With the extension, you can include the created customer attributes into the default Magento import/export procedures.

#### **Geo IP Data Configuration**

This product includes GeoLite2 Data created by MaxMind, available from 24.10.2023 (last update date).

The extension uses Geo IP Database to detect site visitors' location. Please, go to **Stores**  $\rightarrow$  **Configuration**  $\rightarrow$  **Amasty Extensions**  $\rightarrow$  **Geo IP Data**.

Databases are required for the correct work of the GDPR module. Also you need to install php bcmath or gmp extension on your server.

You can get the databases automatically or import your own data.

Hit the **Download and Import** button to make the extension download the updated CSV dump file and import it into your database automatically.

To import the files from your own source, use the Import option. Path to the files should look like this

(the part 'var/amasty' should be replaced with your folders' names):

var/amasty/geoip/GeoLite2-City-Blocks-IPv4.csv var/amasty/geoip/GeoLite2-City-Blocks-IPv6.csv var/amasty/geoip/GeoLite2-City-Locations-en.csv

In the Import section, the **Import** button is grayed out by default. It will be available right after you upload the CSV files. The red error notification will switch to green success notification when the import is completed.

#### **IP Database Update Settings**

The database included in the extension was last updated on October 24, 2023. To keep the IP database current, you can update it using one of two methods.

Please note that regardless of the updating method chosen, you need to import the IP database first.

 $(\land)$ 

#### IP Database Update Settings

Refresh IP Database [global]	Manually	•
	Manually	
	Update via Amasty Service	

**Refresh IP Database** - select the appropriate method for refreshing the IP database:

- Manually to manually upload the updated database files;
- **Update via Amasty Service** to update the database automatically and regularly via Amasty Service, which is complimentary for you *until August 2024*.

#### Debug Mode

You can enable IP forcing, which makes it possible to set a specific IP address that will be used instead of the visitor's real IP address when determining geolocation. The feature is useful while configuring or testing the extension.

#### Debug

Enable Force IP [global]	Yes	•			
Force IP Address [global]	192.0.2.1				
	You can set IP address for testing. Please be careful to avoid issues on production.				

Enable Force IP - set to Yes to replace the real IP address.

Force IP Address - specify the address to use instead of a real one.

#### FAQ

\* I want to use your Customer Attributes in scripts/customizations. How may I get their values from the code?

- \* My Customer Attribute relations don't work, how can I check if anything is not configured correctly?
- \* How to create a promotion based on the Customer Attributes values?
- \* Why don't the Customer Attributes relations work while placing an order in the Backend?
- \* Is it possible to show/hide a child attribute on the shipping page depending on the parent attribute value previously selected on the registration page?
- \* Is it possible to allow customers to upload files using the Customer Attributes M2 extension?
