For more details see how the Delivery Date for Magento 2 extension works.

Guide for Delivery Date for Magento 2

Increase the level of customer service in your store. Enable clients to choose delivery dates and time periods to receive orders. Define your delivery schedule and exclude specific days or hours when delivery is unavailable. Add delivery info to emails and printed order-related docs.

- Enable buyers to select days and time of delivery
- Specify how to display delivery info on the frontend
- Allow customers to write delivery comments
- Exclude any dates from your delivery plan
- Set minimal and maximum delivery intervals

With the extension you'll be able to create flexible delivery schedule: exclude holidays and previous days from the timetable, allow same- and next-day delivery; specify a deadline after which same-day delivery is unavailable, create time frames and let customers choose delivery hours.

Configure the extension

To access the settings of 'Delivery Date for Magento 2' please go to: **Stores → Configuration → Delivery Date**

General Settings

First, you need to configure the 'General' section. The options you specify here will apply to all store views.

General

Enabled [store view]	Yes ▼

Disable Delivery On [store view]	Sunday Monday Tuesday Wednesday Thursday Friday Saturday

Exclude disabled delivery days from Minimal and Maximal Delivery [store view]	No ▼

Minimal Delivery Interval [store view]	0

In days. Set to 0 to allow same day delivery.

Enabled - The option turns on/off the module.

Disable Delivery On - Choose days of the week for which delivery won't be available.

Minimal Delivery Interval - Define how many days should pass after the order is placed and before the delivery is available. In this case, the delivery won't be available for the same day and the next 2 days after the purchase. Notice, that all dates and years before the order will also be restricted.

Minimal Delivery by Product [store view]	

Product attribute code (type = Price).

Exclude Weekend, Holiday and Delivery Interval from Minimal Delivery [store view]	Yes ▼

Minimal Delivery cann't be weekend, holiday and delivery interval .

Maximal Delivery Interval [store view]	7

In days

Minimal Delivery by Product - Apart from minimal and maximal intervals for all deliveries in

general you can activate a specific delivery interval for each product. However, this requires the creation of a new product attribute with Price value. After this, the number of days, which you set in the needed product's settings, will overwrite the general Minimal Delivery Interval.

Exclude Weekend, Holiday and Delivery Interval from Minimal Delivery - Set 'Yes' if you want to exclude weekend, holiday and delivery interval from minimal delivery.

Maximal Delivery Interval - On the other hand, maximal interval will include the day of the order and N-1 days after the order has been placed. For instance, the interval is set to 7. It means that the delivery will be available for the same day and 6 next days.

For example, an item was purchased on the 7th of September. A customer can choose same-day delivery or schedule it for any other day until the 14th. As you can see, Saturday and Sunday are unavailable, because we have selected these days in the **Disable Delivery On** field.
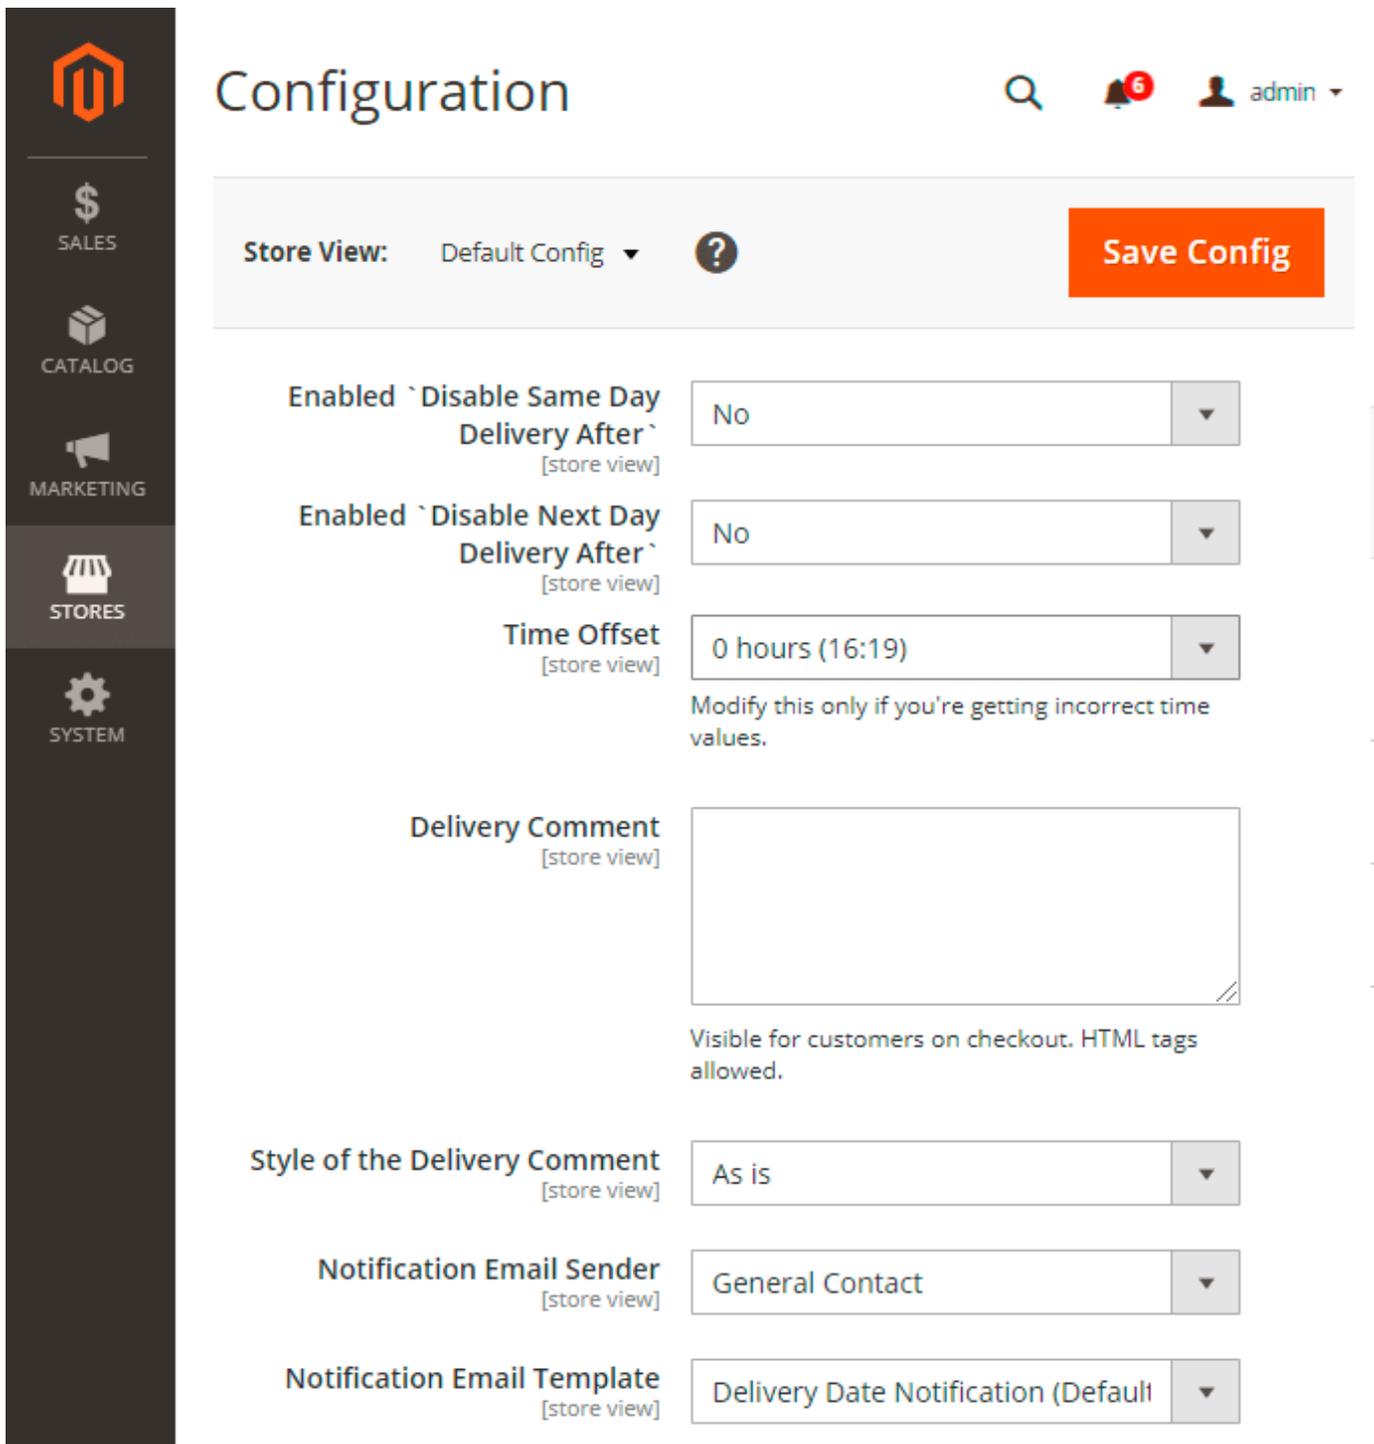

Enabled `Disable Same Day Delivery After` - You can choose to restrict delivery for the same day as the order was placed after certain hours.

Enabled `Disable Next Day Delivery After` - It is also possible to restrict delivery for the next day as the order was placed after a certain time period. We will set at 8:30 pm. So the orders which were placed later can't be delivered the next day.

Time Offset - The number, specified in this field will be added or subtracted (when with the minus) to the current time. We recommend leaving the field set to 0 if you are not experiencing any problems with time values. If you modify the Time Offset, please remember that the change applies to:

- Minimal Delivery Interval;
- Maximal Delivery Interval;
- Disable Same Day Delivery After;
- Disable Next Day Delivery After.

Delivery Comment - Add a comment to the delivery date. You can write a text and include an HTML link to *Contact us* page, for example.

Style of the Delivery Comment - You can choose between two types of comment display:

```
1. As is - the comment looks like a plain text;
```

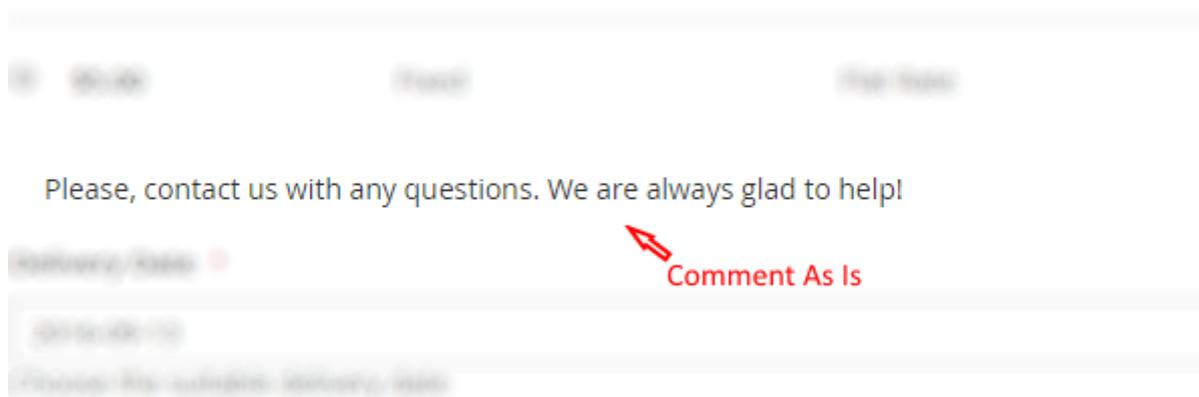

```
2. Magento Notice - the comment is highlighted.
```

Notification Email Sender - Choose the default e-mail sender for all delivery-related notifications. It can be the Owner, Sales Representative, Customer Support Manager, etc..

Notification Email Template - Select the e-mail template for delivery-related letters. If you need to create an appropriate template first, please go to **Marketing → Communications → Email Templates**.

Quota

In this section, you can configure unlimited or a certain number of deliveries per day or per week.

Quota

Quota Type	Unlimited	▼
[website]		
	Unlimited	
	Per Day	
	Per Day of the Week	

Quota Per Day - Define how many deliveries per day your store can make. After the limit is exceeded, the day will become unavailable for delivery.

Quota

Quota Type [website]	Per Day of the Week ▾
Quota per Monday [website]	9
	Maximum number of deliveries per day. Set 0 to unlimited.
Quota per Tuesday [website]	5
	Maximum number of deliveries per day. Set 0 to unlimited.
Quota per Wednesday [website]	7
	Maximum number of deliveries per day. Set 0 to unlimited.
Quota per Thursday [website]	10
	Maximum number of deliveries per day. Set 0 to unlimited.
Quota per Friday [website]	8
	Maximum number of deliveries per day. Set 0 to unlimited.
Quota per Saturday [website]	2
	Maximum number of deliveries per day. Set 0 to unlimited.
Quota per Sunday [website]	2
	Maximum number of deliveries per day. Set 0 to unlimited.

Quota Per Day Of The Week - Set how many deliveries you can make per each day of the week.

Delivery Date Section

In this section you can select date format, choose to which documents, notifications and backend store pages delivery date info should be included. The module allows to offer the choice of delivery dates only for certain groups of customers or with particular shipping methods. The distribution options have never been so flexible!

Delivery Date

Date Format [store view]	yyyy-mm-dd (2017-11-20) ▼
	Format of date for outputting values
Is Required [store view]	Yes ▼
Set Default Value [store view]	Yes ▼
	Will preselect value on the frontend (if date is not disabled).
Default Value [store view]	1
	0 - same day or first possibility when using 'Delivery by Product', 1 - next day etc.

Include Into [global]

> Print Copy of Order Confirmation
> Order Confirmation E-mail
> Invoice E-mail
> Shipment E-mail
> Invoice PDF
> Shipment PDF (Packing Slip)

Display On [global]

> New/Edit/Reorder Order Page (Backend)
> Invoice View Page (Backend)
> Shipment View Page (Backend)
> Order Info Page (Frontend)

Field Note [store view]	Choose the suitable delivery date
	Visible on checkout below the date field.
Show For Selected Customer Groups Only [store view]	No ▼
Show For Selected Shipping Methods Only [store view]	No ▼

Date Format - The module offers a wide variety of dates formats. Choose which one suits your store best.

Is Required - You can require customers to fulfill the delivery info or leave it up to their choice.

Set Default Value - Set this option to '*Yes*' to specify the preselected delivery date on the frontend.

Default Value - Specify the value of the preselected delivery date. If you set '*0*' - the closest possible delivery date will be preselected, '*1*' - the next date after the order is created, '*2*' - the second day after the order is created, and etc.

Include into - It's possible to include delivery date information into any available order document.

amasty

Display On - Delivery info can be displayed on different backend pages.

Field Note [store view]	Choose the suitable delivery date

Visible on checkout below the date field.

Show For Selected Customer Groups Only [store view]	Yes ▾

Customer Groups [store view]	NOT LOGGED IN
	General
	Wholesale
	Retailer

Show For Selected Shipping Methods Only [store view]	Yes ▾

Shipping Methods [store view]	**Flat Rate**
	Fixed
	Best Way
	Table Rate

Field Note - Create a message for a customer, that will be displayed in the line for the time interval before a customer selects the actual hours.

Show for Selected Customer Groups Only - You can offer the option of choosing the delivery date only to certain groups only. If this option is set to '*Yes*', the **Customer Groups** section will appear, otherwise, it will stay hidden.
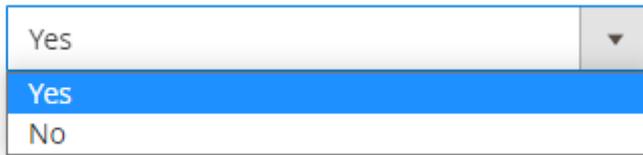

Show for Selected Shipping Methods Only option works in analogy with customer group settings.

Delivery Date Edit Section

The Delivery Date Edit Section allows enabling users to edit their orders after placing them, in other words - rescheduling the delivery date if certain conditions are met.
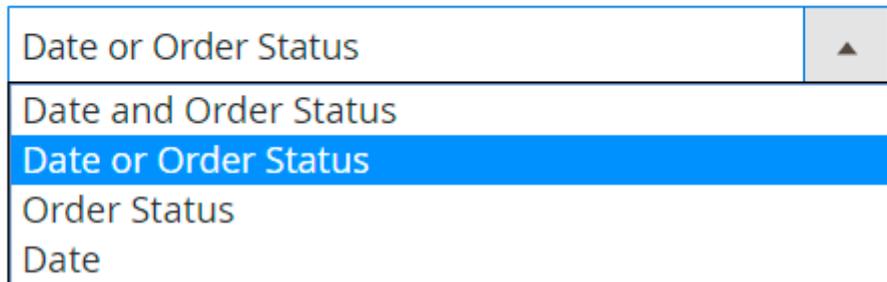

Delivery Date Edit

Allow reschedule Delivery Date [store view]	Yes ▼
	Yes
	No

Rule activation and Order status - Thus, an order status could be rescheduled if you specify certain order statuses, e.g. 'Pending', 'Pending Payment' or 'Payment Review'.
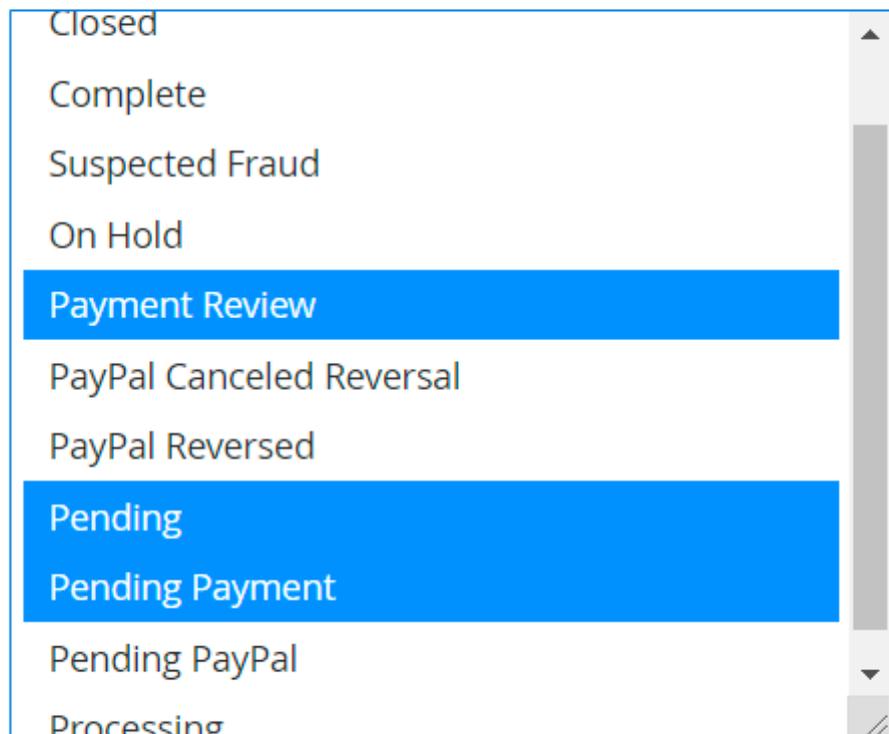

Rule activation [store view]	Date or Order Status ▲
	Date and Order Status
	Date or Order Status
	Order Status
	Date

Define rule which allow/disallow delivery date editing by customer

Order status can be rescheduled [store view]	Closed ▲
	Complete
	Suspected Fraud
	On Hold
	Payment Review
	PayPal Canceled Reversal
	PayPal Reversed
	Pending
	Pending Payment
	Pending PayPal
	Processing ▼

Lockdown period - The lockdown period is a time interval before the order delivery date. When the

lockdown period is running - customers cannot edit the delivery date.

Delivery Time and Comments Section

Delivery Time and **Comments** fields have the same options as the Delivery Date field set.

Delivery Time

Enable Delivery Time

    Table Rate

Time Interval Offset for Same Day Delivery
[store view]

60

Minutes. Time between the current time and the first time that can be selected.

Disable Current Time Interval
[store view]

Yes

Disable time interval if current time with offset are included into this time interval.

There are two features that regulate delivery hours specifically.

Time Interval Offset for Same Day Delivery - Specify time offset relative to current delivery time. A period (in minutes) that's stands between the current time and the first delivery time, available for a customer's choice.

Disable Current Time Interval - It's possible to disable the time interval. Before doing that, please make sure that the current time with offset are included in this time interval.

Comments Field

Enable Comments Field [store view]	Yes ▼
Is Required [store view]	No ▼
Limit for Comment [store view]	0

In symbols. Set zero if it is not needed.

Include Into [global]	Print Copy of Order Confirmation Order Confirmation E-mail Invoice E-mail Shipment E-mail Invoice PDF Shipment PDF (Packing Slip)

Field Note [store view]	Choose the suitable delivery time

Visible on checkout below the date field.

Show For Selected Customer Groups Only [store view]	No ▼
Show For Selected Shipping Methods Only [store view]	No ▼

Enable Comments Field - You can restrict or allow customer comments, for instance, for the delivery person. We recommend enabling this option to make sure that you do your best for the clients.

Is Required - you can require comments or make them optional.

Limit for Comment - define the maximum number of symbols for the comment.

amasty

Reminder

With the reminder option you can inform customers about the upcoming delivery. Specify particular time (in hours) before the delivery to send the reminder.

Enable - Turn on/off the reminder option.

Recipient Email Address - specify email addresses to which you'd like to send reminders.

Notification Email Sender - Choose the default e-mail sender for the short notice. It can be the Owner, Sales Representative, Customer Support Manager, etc..

Notification Email Template - Select the e-mail template for the notice before delivery. If you need to create an appropriate template first, please go to **Marketing → Communications → Email Templates**.

Manage Exceptions: Working Days and Holidays

The module provides you with nearly unlimited opportunities for a time-table configuration. You can specify date intervals that should be excluded from your delivery schedule for various reasons.

You can exclude from your timetable:

- Working Days
- Any vacation dates, e.g. national holidays
- Date intervals like December 24 – January 7

All the exceptions you create are visible on the grid. To view the grid or create a new holiday interval, please go to **Sales → Delivery Date → Exceptions: Working Days and Holidays**

Please, click 'Add New Exception' button to define a new exception from the regular sked. For this example, we will edit a previously created entry.

Edit Exception

Day type Holiday ▾

Day 4 ▾

Month July ▾

Year Each year ▾

Description Independence Day

Stores - The extension supports multi-stores, it means that you can set delivery date exceptions separately for each store.

Day Type - Specify whether it is a holiday or working day.

Day - Specify the holiday date.

Month - The extension offers two options: you can either choose a specific month or use the exception for each month.

Year - Specify the year option. It is possible to set up a particular year or set '*Each Year*' if the holiday always happens on the same date.

Description - Add the description to the exception.

Exceptions: Date Intervals

Creating a date interval is the easiest way to cross several days in a row out of your timetable. All the existing intervals are displayed on the grid. Please go to **Sales → Delivery Date → Exceptions: Date Intervals** to view the current intervals and create new ones.

Add New Interval

Exceptions: Date Intervals

Store	From Day	From Month	From Year	To Day	To Month	To Year	Description	Action
All Store Views	20	December	Each year	26	December	2017	Custom delivery	Edit
All Store Views	7	November	Each year	9	November	Each year	National holiday	Edit
All Store Views	18	June	2017	26	June	2017	Staff on vacation, no delivery	Edit

You can also edit intervals as we do for this example.

Edit Date Interval

From Month — March ▾

From Year — 2020 ▾

To Day — 10 ▾

To Month — March ▾

To Year — 2020 ▾

Description — Spring holidays

The options '*Each Month*' and '*Each Year*' come in handy if you would like to set particular days off or take a break regularly on the same dates.

Stores - You can set delivery date exceptions separately for each store.

From Day/Month/Year - Set up the exact date from which the rule should apply. In this example, the starting day will be the 18th of June 2017.

To Day/Month/Year - define the ending date, till which the rule should work. We've set the ending date to the 26th of June 2017.

Description - Add a reason for the exception; it will be displayed only on the backend.

Time Intervals

You can create several delivery time slots and let a customer choose the most suitable interval. To do so, please go to **Sales → Delivery Date → Time intervals**.

Here are the fields you need to fill in when creating/editing an interval.

Edit Time Interval

← Back   Delete   Reset   Save and Continue Edit   **Save**
