For more details see how the Duplicate Categories for Magento 2 extension works.

Guide for Duplicate Categories for Magento 2

Duplicate categories in a few seconds to save time and make catalog management more efficient.

- Quickly duplicate main categories and subcategories
- Copy category assignments for products
- Change duplicated categories
- Multistore support

Categories Management

To duplicate categories, navigate to **Catalog** \rightarrow **Categories** and choose the category you want to duplicate.

You will find a 'Duplicate Category' button. Click it.

	Schedule Design Update			\odot

Duplicate Options

You can adjust a duplicated category before saving it.

Duplicate Category "Bags"

Select Parent Category - choose the parent category to place a duplicated one.

Copy Product Relations - set to Yes to copy all product relations from the original category.

Include Subcategories - enable the option to duplicate all subcategories as well.

Copy Categories Rules - choose *Yes* to copy the rules to include products in a particular category. The feature is relevant for the Magento Enterprise edition.

amasty

Copy Child Categories Rules - you can duplicate category rules for child categories too.

Search and Replace

You can make replacements in the following fields of the duplicate category: name, description, meta keywords, meta description. Words from the 'Search For' fields will be replaced with the content from the 'Replace With' field.

If you don't need to make any replacements, leave these fields empty.

Search and Replace				
Leave empty if you do not need to search and replace.				
	Search For:	Replace With:		
	Shirt	T-shirt		
	Laptops	Cheap laptops		

If the settings are ready, hit the **Duplicate** button. Confirm the duplication.

When the duplication is complete, you may update a new category (e.g. rename it, change the content and so on).

Find out how to install the Duplicate Categories extension via Composer.
