For more details see how the [Extended Product Grid with Editor for Magento 2](#) extension works.

Guide for Extended Product Grid with Editor for Magento 2

Get the advanced product grid in your Magento 2 store: add columns, edit data right in the cells, and even manage the product inventory in one handy extension. Moreover, you can create templates to save the desired grid layouts and switch between them according to your needs. Also, the module provides flexible settings to utilize its potential in the most convenient way.

- Edit product data right on the grid
- Activate additional product attributes
- Add product grid templates
- Manage product inventory by adding or deducting items
- Customize filters to easily find information
- Compatibility with Magento Enterprise splitted databases

Please, mind that all the changes made from the grid are applied to the selected store view only.

General Settings

To configure general extension settings please go to **Stores → Configuration → Product Grid**

In the General Settings section you will find three options to configure. They are:

- Editing Mode;
- Additional Grid Columns;
- Quantity Based Availability.

Now, let's find out their functionality and choose mass action to add to Magento 2 product grid.

Editing Mode

Editing Settings

Editing Mode [global]	<div>Multi Cell</div> <div>Single Cell</div> <div>Multi Cell</div>
Crop Decimal Digits [global]	<div>No</div>

When enabled, decimal digits in the grid are cropped to 2 decimal places and rounded.

Editing Mode — allows you to choose how you will edit the product grid:

- **Single Cell** — saves your modifications for each cell independently;
- **Multi Cell** — lets you configure multiple cells and then save them in bulk.

Crop Decimal Digits - set to Yes if you want to have all the decimal digits in the grid cropped to 2 decimal places and rounded.

If this feature is enabled, a number like 25.5678 will be displayed as 25.57 in the grid. It applies to all decimal digits in the grid, except those that have already been processed, such as prices.

The **Crop Decimal Digits** feature is available as a part of an active product subscription or support subscription.

Additional Grid Columns Settings

Additional Grid Columns Settings

⌵ Related products, Up-sells, Cross-sells Columns

Products Qty
[global]

Specify the number of related, cross-sell, and up-sell products to display on the grid's cell

Canceled

On Hold

Define order statuses that should be included in the 'Qty Sold' field.

Related products, Up-sells, Cross-sells Columns

Products Qty — specify the number of related products, up-sells, cross-sells to be displayed on the grid.

'Qty Sold' Column

'Qty Sold' Date From — specify the date to count the 'Qty Sold' from.

'Qty Sold' Date To — specify the date to count the 'Qty Sold' to.

'Qty Sold' Order Statuses — select order statuses to include orders in the 'Qty Sold' column.

Quantity Based Availability

Quantity Based Availability

Quantity Based Availability
[global]

Yes

When set to yes, availability will automatically change to 'In stock' when quantity is positive and to 'Out of stock' when quantity is zero or negative. When set to 'No', availability status will not be updated automatically.

Show Quantity as Integer
[global]

Yes

Quantity Based Availability — when set to 'Yes', availability will automatically change to 'In stock' when quantity is positive and to 'Out of stock' when quantity is zero or negative. When set to 'No', availability status will not be updated automatically.

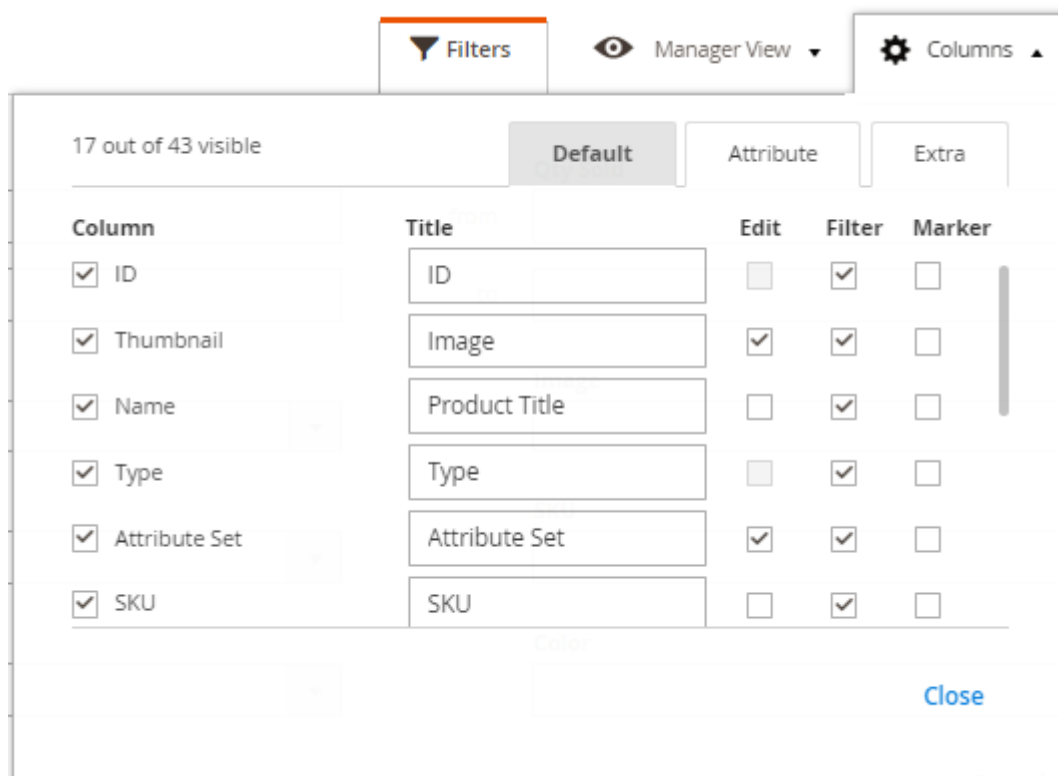

Show Quantity as Integer - select the necessary quantity display.

After configuring the extension's general settings we can proceed to the product grid.

Custom Columns Selection

Navigate to your product grid that is located in **Products → Catalog**. From here you can add columns to Magento 2 product grid for further usage.

- Click the **Columns** button to open the dropdown menu and configure columns;
- Select the **Default** tab;
- Tick the default columns that should be displayed;
- **Mark** them with a color to make it noticeable.

In the **Default** group you can show/hide the following columns: **ID, Thumbnail, Name, Type, Attribute Set, SKU, Price, Quantity, Special Price, Visibility, Status, Websites, Cost, Salable Quantity, Action.**

*The editing of the **Attribute Set** column is available as a part of an active product subscription or support subscription.*

Now you can add/update product images and product videos right from the grid. Enable editing of the **Thumbnail** column and then just click the icon in the grid and then, in a modal window, choose the thumbnail from the existing product images or upload a new one.

Add Video

1274x1580 px, 119 KB

Base Small Thumbnail

1080x1340 px, 141 KB

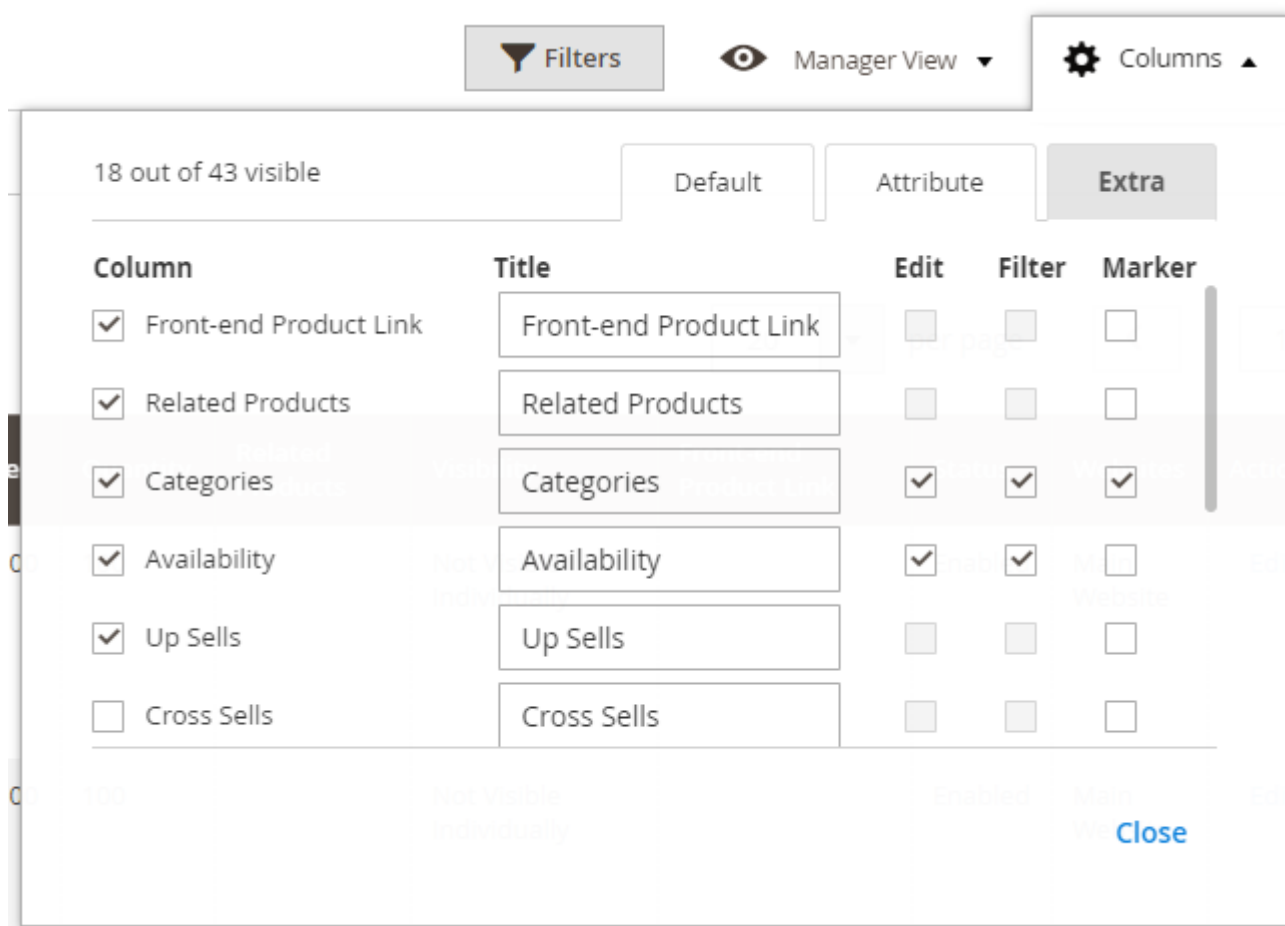

1274x1580 px, 90 KB

Browse to find or drag image here

Moreover, you can add custom columns to the product grid.

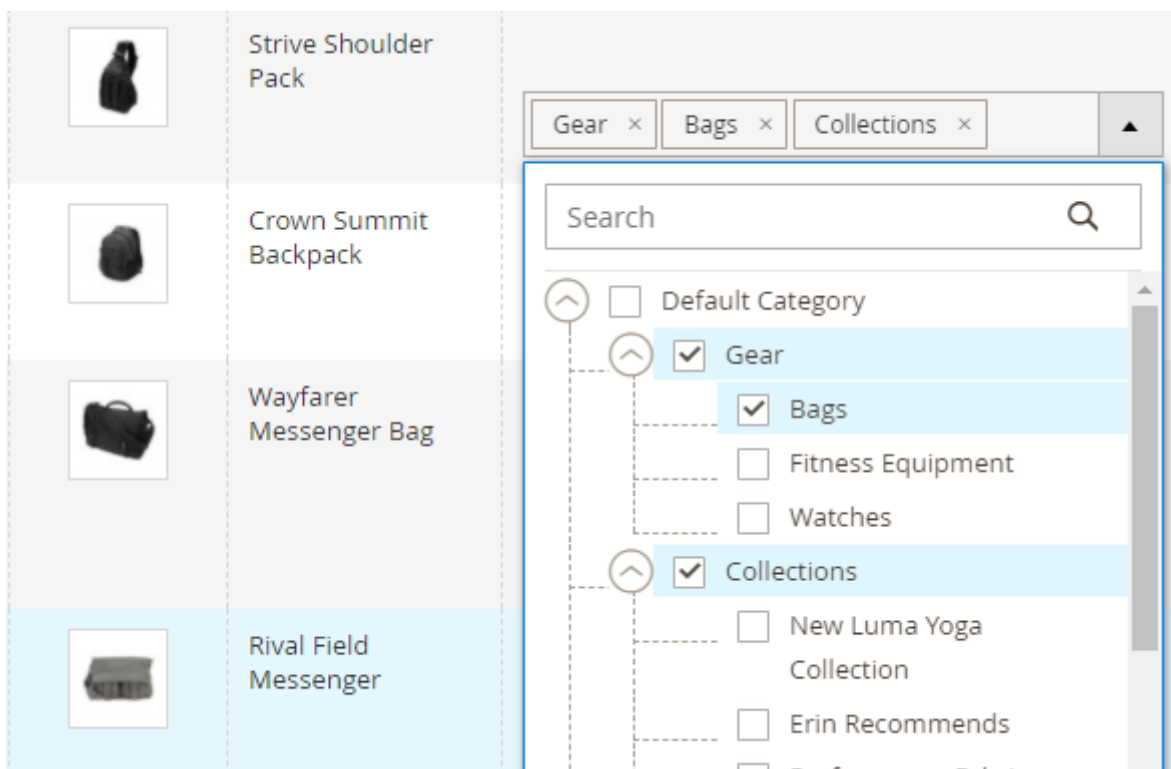

- Select the **Extra** tab;
- Tick the columns that you want to display.

The **Extra** group includes: **Categories, Tier Price, Availability, Creation Date, Last Modified Date, Related Products, Qty Sold, Front-end Product Link, Up Sells, Cross Sells, Low Stock, Backorders.**

Also, in this dropdown menu you can make columns editable right from the grid. Tick columns under the **Edit** text. Hit the **Save** button to proceed.

Now you can easily update and assign the categories of the products right from the grid. Just click on the category of any needed product in the grid and tick required checkboxes in a dropdown

Keep in mind, that a **Categories** column is *non-sortable*.

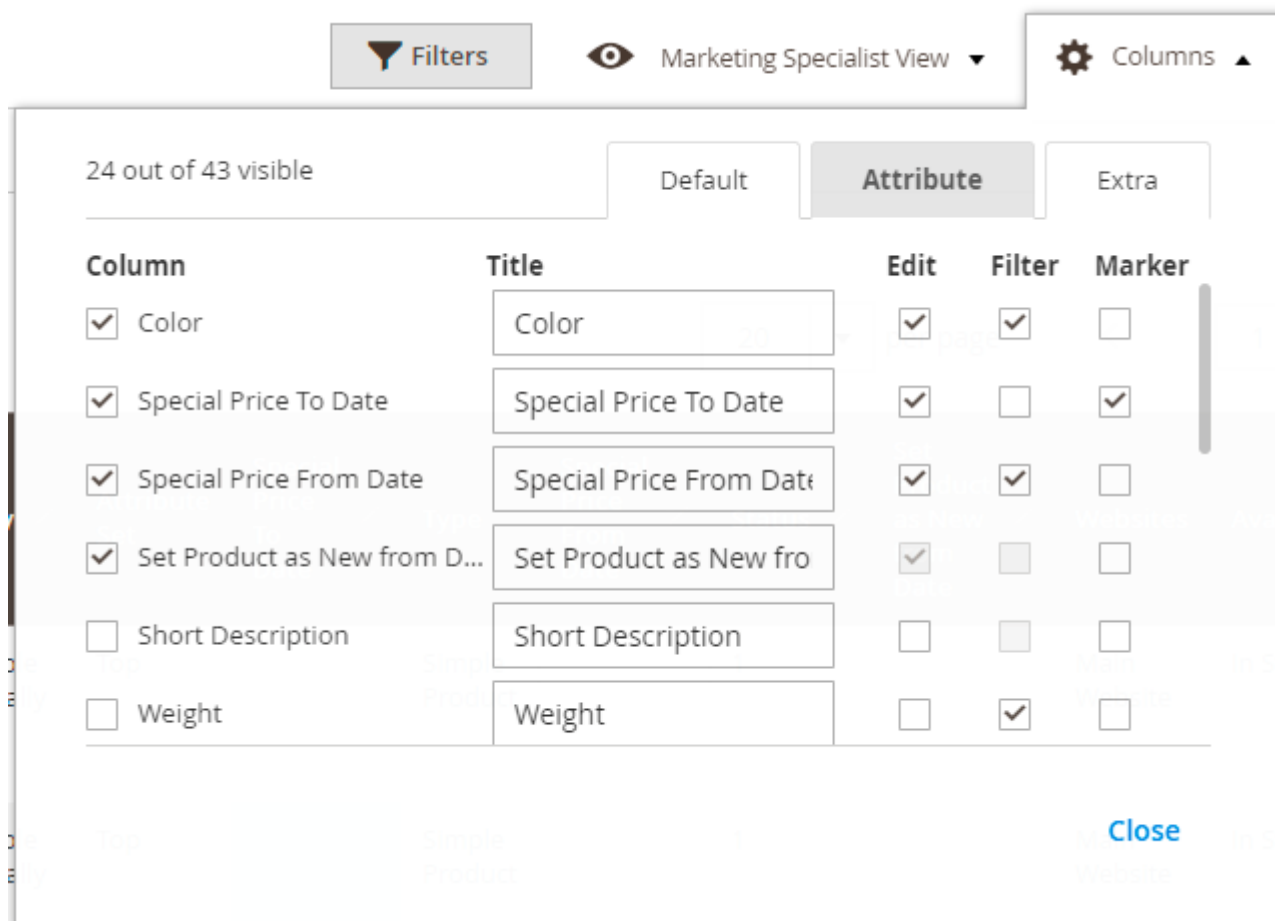

Editable columns will be marked with the special icon with a notepad.

You can drag-and-drop columns by holding their titles with a pointer and moving them left or right.

Additional Product Attributes

With the module, you can add extra product attributes to the grid.

- Click the **Columns** button to open the dropdown menu and configure columns;
- Select the **Attribute** tab;
- Tick attributes that should be displayed.

It is possible to enable the following columns: **Special Price From Date, Special Price To Date, Short Description, Weight, Manufacturer, Meta Title, Meta Keywords, Meta Description, Color, Set Product as New from Date, Set Product as New to Date, Country of Manufacture, New Layout, Allow Gift Message, Tax Class, URL Key.**

In the same dropdown menu you can tick columns and attributes to be available for filters. Flag them under the **Filter** text. Hit the **Save** button to proceed.

Moreover, you can make any product attribute accessible from the **Attribute** tab of the **Columns** menu.

Add to Column Options

Select "Yes" to add this attribute to the list of column options in the product grid.

Use in Filter Options

Select "Yes" to add this attribute to the list of filter options in the product grid.

Please go to **Stores → Product** and choose an attribute you want to add to the grid. Then, in the **Properties** tab expand the **Advanced Attribute Properties** section. Here you need to enable the **Add to Column** option. Also, to make an attribute available for filtering enable the **Use in Filter**

option.

After the grid is configured, it is displayed like this:

Using filters, you can find products from particular category or items that are not assigned to any. Also, it is possible to sort products by the image, e.g. you can find the ones without thumbnails.

Please note that with an active product subscription or support subscription, you also can:

- search while using the **Categories** filter

Categories

Bags ✕

☐ Pants

Default Category / Men / Bottoms

☐ Pants

Default Category / Women / Bottoms

☐ Pants

Default Category / Promotions

Done

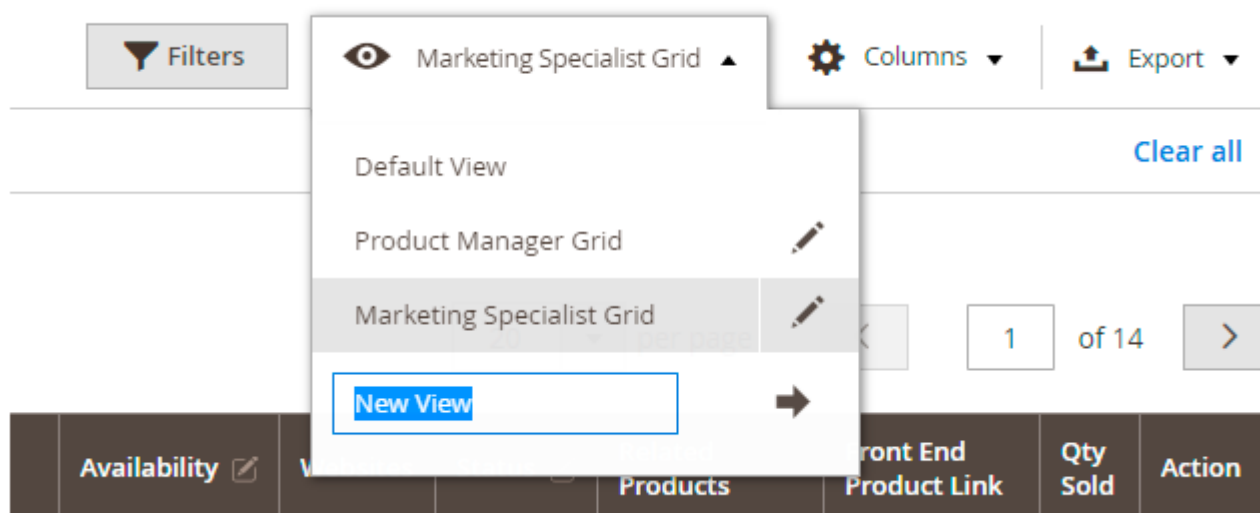

- use the **Quantity per Source** and **Salable Quantity** filters

The screenshot shows the 'Filters' tab in the Amasty Product Grid configuration. It features two filter groups: 'Salable Quantity' and 'Quantity Per Source'. Each group has 'from' and 'to' input fields. In the 'Salable Quantity' group, the 'from' field is set to 0 and the 'to' field is set to 75. In the 'Quantity Per Source' group, the 'from' field is set to 0 and the 'to' field is set to 75. Above the filters, there are tabs for 'Filters', 'Manager View', 'Columns', and 'Export'.

Creating and Managing Templates

When you finished configuring the grid's columns, product attributes, and filters, you can save the current stat of the grid as a template.

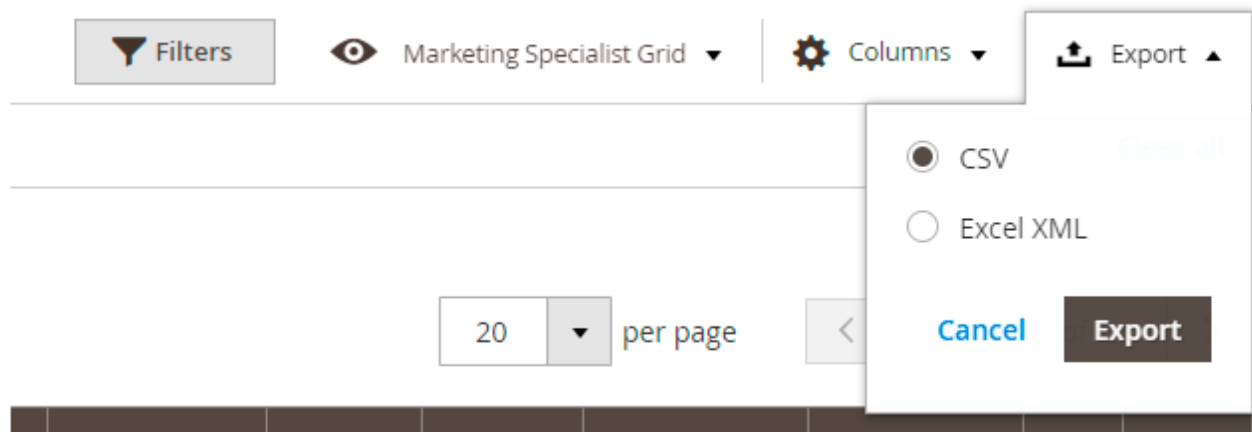

- Hit the **Default View** button;
- Choose the **Save View As** option to create a template;
- Then, you can switch between the created templates from this menu.

You may also export data placed on the particular grid view using a separate tab.

Allowed formats:

- CSV
- Excel XML

Editing Product Information on the Grid

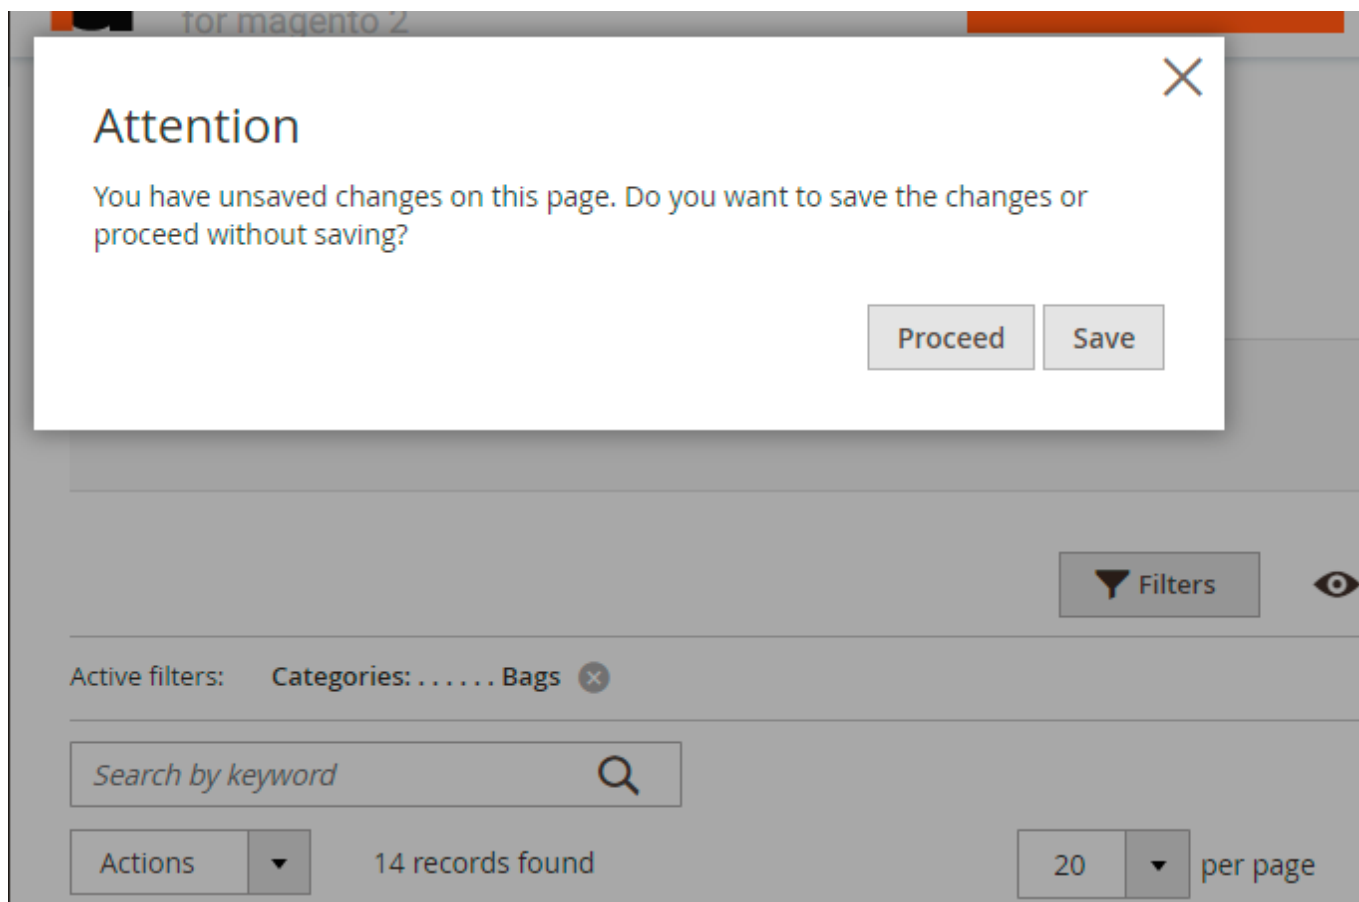

Using the Extended Product Grid with Editor for Magento 2 extension you can modify products data right on the grid. See previous steps to make columns editable.

You can edit data in columns that are marked with a special symbol. Just click the required cell to edit data. Make changes in all cells and hit the **Save Edits** button to apply changes. Note, that the module verifies the data you filled in. Data in the unsuitable formats will not be saved and you will be notified and asked to fill the field in correctly.

<input type="checkbox"/>	ID	Thumbnail	Name	Price	Quantity	Color
<input type="checkbox"/>	1		Joust Duffle Bag	\$34.00	0	Black
<input type="checkbox"/>	3		Crown Summit Backpack	\$38.00	100	Black
<input type="checkbox"/>	4		Wayfarer Messenger Bag	\$45.00	97	Black

When you use the 'Single cell' editing mode please click any spot outside the field to save the data.

If you forget to save changes and continue catalog management, the extension will display a reminder popup to prevent data loss.

Quantity Management

You are able to modify product quantity on the grid:

- Make the 'Quantity' column editable;
- Specify the necessary quantity;
- Alternatively, you can add or deduct product quantity (e.g. you can write "+100" or "-100" and the extension will make calculations automatically after you click the 'Save' button);
- Save changes.

<input type="checkbox"/>	ID	Thumbnail	Name	Price	Quantity
<input type="checkbox"/>	1		Joust Duffle Bag	\$34.00	45+25
<input type="checkbox"/>	3		Crown Summit Backpack	\$38.00	100+150
<input type="checkbox"/>	4		Wayfarer Messenger Bag	\$45.00	97-12

Additionally, the extension supports multi-source management. If the Qty column is editable and you have more than one source, you can edit the quantity for each source separately in the appeared popup.

Bulk Update Use Case

Modify any product info in bulk using **Mass Product Actions**. The combination of two extension will help you to find the necessary products and update them in a split second.

How it works:

For example, you want to add +10\$ to the prices for all red women blouses in your store (prices are different for blouses, but anyway you want to rise each price by 10\$). Let's see how you can do it:

Step 1. Configure the necessary grid view and activate filters. In our case, we need category, attribute set and color filters.

<

	ID	Thumbnail	Name	Type	Attribute Set	SKU	Categories	Price	Quantity
<input type="checkbox"/>	1282		Riona Full Zip Jacket-M-Red	Simple Product	Top	WJ05-M-Red	Women/Tops/Jackets	\$60.00	100
<input type="checkbox"/>	1727		Nona Fitness Tank-S-Red	Simple Product	Top	WT04-S-Red	Women/Tops/Bras & Tanks Collections/Performance Fabrics Default Category	\$39.00	100
<input type="checkbox"/>	1448		Layla Tee-XL-Red	Simple Product	Top	WS04-XL-Red	Women/Tops/Tees Promotions/Tees Collections/New Luma Yoga Collection Collections/Eco Friendly Default Category	\$29.00	100

Step 2. Tick all or select the products that you need.

Step 3. Expand the Actions dropdown and apply 'Update Price'. Add +10\$ to the each blouse price.

The screenshot displays the Amasty Extended Product Grid interface. At the top, there is a search bar with the placeholder text "Search by keyword" and a magnifying glass icon. Below the search bar, the "Actions" dropdown menu is open, showing a list of actions: "Remove Category", "Replace Category", "Update Cost", "Update Price" (highlighted), "Update Special Price", "Update All Types of Prices", "Update Advanced Prices", "Modify Special Price using Price", "Modify Price using Cost", and "Modify Special Price using Cost". To the right of the dropdown, it says "88 records found (20 selected)". Below this, there is a table with columns: "Attribute Set", "SKU", "Categories", "Price", and "Quantity". The table contains three rows of product data. At the bottom of the table, there is a "By" dropdown menu, a text input field containing "+10", and an "Apply" button. The table data is as follows:

Attribute Set	SKU	Categories	Price	Quantity
Top	WJ05-M-Red	Women/Tops/Jackets	\$60.00	100
Top	WT04-S-Red	Women/Tops/Bras & Tanks Collections/Performance Fabrics Default Category	\$39.00	100
Top	WS04-XL-Red	Women/Tops/Tees Promotions/Tees Collections/New Luma Yoga Collection Collections/Eco Friendly Default Category	\$29.00	100

Step 4. Check the result!

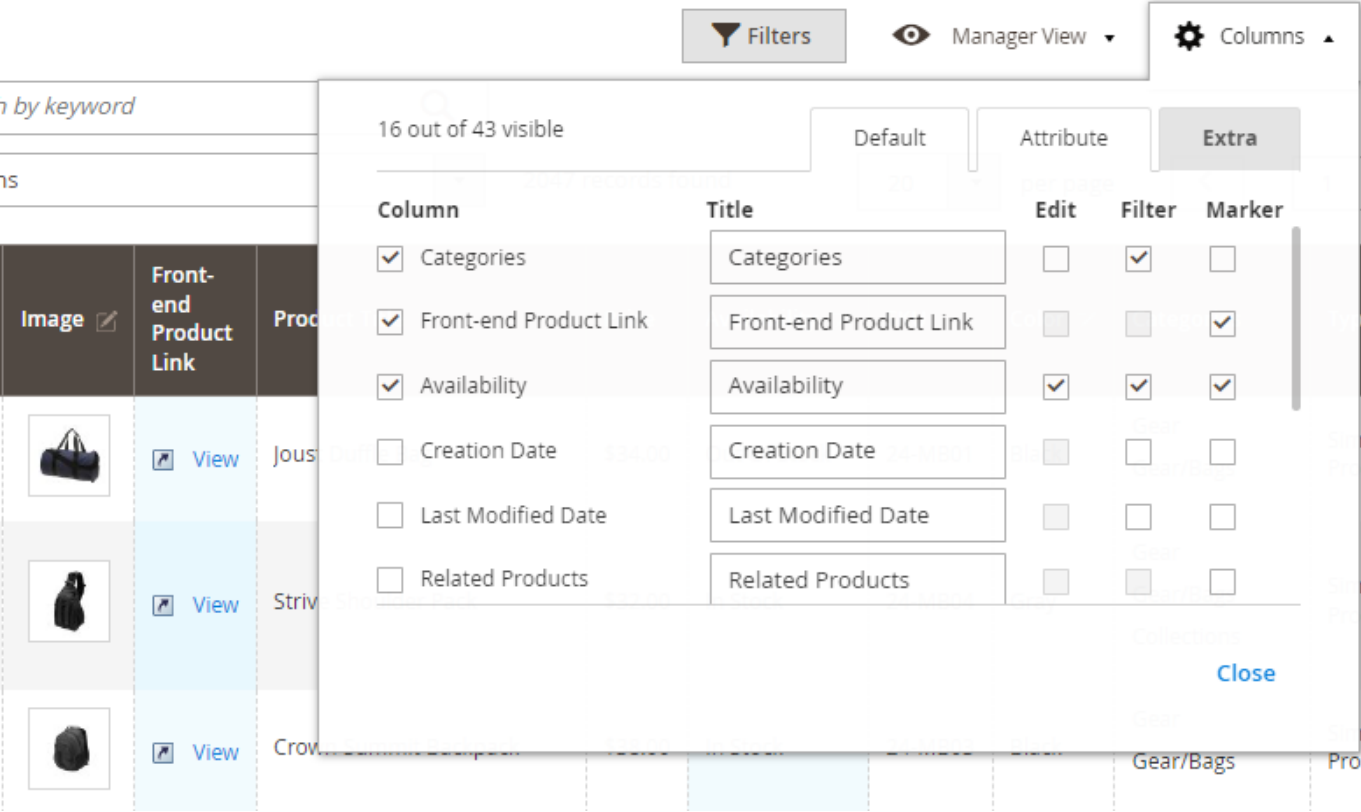

Find out more about about the available actions [in this guide](#).

Frontend Product Links

The extension allows you to add quick product frontend links to check all the changes right in the store and product pages.

To add frontend links do the following:

- Click the **Columns** button;
- Navigate to the **Extra** tab;
- Flag the **Front End Product Link** column.

Now, you will have direct product links on the grid.

Find out how to install the **Extended Product Grid with Editor** extension for Magento 2 via [Composer](#).
