For more details see how the [Generate and Import Coupons for Magento 2](#) extension works.

Guide for Generate and Import Coupons for Magento 2

Reduce time spent on coupon management by generating and importing an unlimited number of promo codes in a couple of clicks. Easily track coupon usage statistics and export codes for your affiliates.

- Generate and import multiple coupons per cart price rule
- View end export detailed coupon usage reports
- Provide coupons via URLs
- Use handy coupon templates for accurate codes generation
- Offer deals on Groupon and other deal hosting services

Create a cart price rule

To create a shopping cart price rule please go to admin panel → **Marketing** → **Cart Price Rules** and click the 'Add New Rule' button.

After filling in the 'Rule information', the 'Conditions' and the 'Actions' tabs, click 'Save' or 'Save and Continue' button and several new tabs will be added.

Import Coupons

Delete Existing Coupons ▼

CSV File No file selected.
CSV File Structure: Coupon Code *, Created, Uses, Times Used
Each coupon code on a new line
* - mandatory

Delete Existing Coupons - If you would like to delete previously generated or imported coupons during current import, please set this option to 'Yes'.

CSV File - To import coupon codes choose the CSV file with codes and then click the **'Import'** button. Place each code on a new line.

[Please click](#)

here

to download an example of a CSV file with coupons.

Generate Coupons by Template

Specify settings in this tab to automatically generate coupons according to your custom template.

Generate Coupons by Template

Coupon Qty *

Delete Existing Coupons

Template *
L - letter, D - digit
e.g. PROMO_LLDDD results in PROMO_DF627

Coupon Quantity - Specify the number of coupons you want to generate.

Delete Existing Coupons - In case you need to remove all previously created promo codes during the autogeneration process, enable this option.

Template - Specify custom template for coupons generation.

Below you'll see the example of auto generated Magento 2 coupon codes according to the specified template. You can **export** created promo codes to CSV or XML files right from the grid.

Generate Coupons

You can also automatically generate coupons according to specific settings.

Generate Coupons

Coupon Qty *

Delete Existing Coupons ▼

Code Length *
Excluding prefix, suffix and separators.

Code Format * ▼

Code Prefix

Code Suffix

Dash Every X Characters
If empty no separation.

Coupons Quantity - Indicate the number of coupons you want to generate.

Delete Existing Coupons - Enable the option in case you want to delete all previously created coupons during new coupons generation process.

Code Length - Specify the number of characters for promo coupons.

Code Format - Choose one of 3 options for a code format:

- Alphanumeric (letters+numbers);
- Alphabetical (letters only);
- Numeric (numbers only);

Code Prefix - Set an additional code prefix that will be used before the generated code.

Code Suffix - Specify a custom code suffix used after each generated promo code.

Dash Every X Characters - This option lets you separate your promo code with a dash. Specify an interval for dash separation.

See the example of promo coupons generated according to settings specified above.

Share Coupons via URLs or Banners

To give codes via URLs/banners please add a code of the kind:

?coupon_code=XYZ-987 to the URL of any page on your site. Please replace 'XYZ-987' with the actual coupon code.

E.g. Let's say you have a page

```
http://yourwebsite.com/any-landing-page.html
```

After you add the coupon it will look like this:

```
http://yourwebsite.com/any-landing-page.html?coupon_code=XYZ-987.
```

You can use such coupon links for banners, so customers will get discounts right after clicking on a banner (for instance, in a shopping cart).
