For more details see how the Amasty Improved Sorting for Magento 2 extension works.

Guide for Improved Sorting for Magento 2

An effective tool for customer care. Improve the usability of your store catalog with user-friendly search options. The module allows your potential customers to browse catalog or categories by any parameters they need: best-sellers, most viewed, top-rated, new and in a wishlist.

- Offer suitable sorting options
- Enable users to view products by Best Sellers, Top Rated, Most Viewed and etc.
- Focus on better performing products
- Set out-of-stock products and items with no image to display at the end
- Change sorting order if you need
- Add featured products blocks to any page
- Compatibility with **Live Search** for Enterprise and Cloud Editions (after installing the amasty/module-sorting-live-search package)

Magento 2 Improved Sorting extension is compatible with **Hyvä themes**. You can find the 'amasty/module-sorting-hyva-compatibility' package for installing in composer suggest (Note: the compatibility is available as part of an active product subscription or Support Subscription). The extension is fully compatible with **Magento Elasticsearch**. See how to install and configure the Elasticsearch engine here.

In **Improved Sorting FAQ** you can find answers to the most popular questions about the extension functionality.

Steps to configure Improved Sorting

General Settings

To configure the module, go to Stores \rightarrow Configuration \rightarrow Amasty Extensions \rightarrow Improved Sorting.

6

General

Disable Sorting By	Best Sellers	
[global]	Revenue	
	Top Rated	
	Stock Quantity	
	Most Viewed	
	Price	
	Biggest Saving	
	Reviews Count	
	Now in Wishlists	
	Product Name	
	Position	
	New Arrivals	
	Price: low to high	
	Price: high to low	
		11

Disable Sorting By - exclude any of the sorting options if needed.

Sorting Order [website]	Best Sellers
	Most Viewed
	Price
	Biggest Saving
	Reviews Count
	Now in Wishlists
	Product Name
	Position
	New Arrivals
	Price: low to high
	Price: high to low
	Revenue
	Top Rated
	Stock Quantity

Sorting Order - Drag and drop sorting options in the order you want them to appear in the improved sorting drop-down for the customers.

Sort Attributes Descending by Default [store view]	Position Product Name Price Best Sellers Revenue Most Viewed Now in Wishlists Reviews Count Top Rated New
	Biggest Saving Stock Quantity

Please select the attributes to have **descending sorting for them by default**. Not selected attributes will have ascending sorting.

Show Products with- out Images Last	Yes	•
[store view]	If it is not important, select `No` to optimize server resources usage.	
Show `Out of Stock` Products	Yes	•
Last [store view]	If it is not important, select `No` to optimize server resources usage.	
Use qty to deter- mine if the product	Yes	•
is `Out of Stock` [store view]	Products with the qty < 1 will be shown last regardless of the stock label.	
Qty Sorting Range Step	10	
[store view]	This field requires a positive integer number. Products will be divided into ranges and sorted according to the specified quantity range step. The lower the value in this setting, the more frequently the cache will be flushed.	d
Show Product Range Qty on Frontend	Yes	•
[store view] [store view] Enable this setting to display a product available quantity on product and listing page example, when using sorting by "Stock Quantity". Please note that enabling this func- have a significant impact on site performance.		y may
Enable debug mode [store view]	No	•

Show Products without Images Last - show or hide products without images to effectively manage your products offering.

Show 'Out of Stock' Products Last - choose the variant to optimize the position of the 'Out of Stock' products.

Starting **from Magento 2.4.6**, out of stock products **are always displayed last** on the search page, regardless of whether this setting is enabled or not.

Use qty to determine if the product is `Out of Stock`- enable this option to put products on the 'out of stock' list automatically. Products with the qty < 1 will be shown last regardless of the stock label.

Qty Sorting Range Step - this field requires a positive integer number. Products will be divided into ranges and sorted according to the specified quantity range step. For example, if the value is set to 10, it indicates that the product quantity will be divided into ranges of 10. Consequently, on the storefront, the product will be shown with the message: "Less than {X} in stock. So, the quantity will be rounded to the nearest multiple of 10, with an indication that less than this quantity is available in stock. If you set it to 1 in the settings, the exact quantity will be displayed. Please note that the lower the value in this setting, the more frequently the cache will be flushed.

To ensure proper sorting by Stock Quantity, please run a reindex after saving the entered range in the settings.

<u>a</u>masty

Show Product Range Qty on Frontend - enable this setting to display a product available quantity on product and listing pages, for example, when using sorting by "Stock Quantity". Please note that enabling this functionality may have a significant impact on site performance.

The extension takes child product quantities into account when sorting configurable products based on their quantity.

Sorting by Default

To specify the default sorting for search and category pages, expand the **Sorting by Default** tab.

Sorting by Default

Disable Custom Sorting When Using Relevance or Position [store view]

No	•

Default Sorting on Search Pages

First Sort by [store view]	Relevance	•
Then by [store view]	Best Sellers	•
Then by [store view]	Price	•

Default Sorting on Category Pages

First Sort by [store view]	Top Rated	•
	Synced with Configuration -> Catalog -> Catalog -> Storefror Product Listing Sort by	it ->
Then by [store view]	Reviews Count	•
Then by [store view]	Price	•

Disable Custom Sorting When Using Relevance or Position - set to **Yes** if you want to disable Amasty custom sortings after applying the **Relevance** sort order (on search pages) or the **Position** sort order (in categories). This helps maintain the pinned positions from Adobe Visual Merchandiser by preventing conflicts with custom sorting.

Please note that this setting is available as part of an active product or support subscription for the **Enterprise** and **Cloud** versions of the extension and refers to the compatibility with **Live Search**.

Therefore, installing the **amasty/module-sorting-live-search** package is required.

Set the main sorting algorithm in the **First Sort by** field at first, and then 2 additional ones in the **Then by** fields according to your needs. As additional algorithms, you can also select sorting options that are not available on the frontend. Due to the feature, you can sort products in the most efficient way and thus increase sales.

Please consider that sorting by the attribute from the first **Then by** field is applied for products with the same values of the main selected sorting method.

Configure Sorting Options

Using the *Improved Sorting for Magento 2* extension, you can choose various additional attributes like 'Most Viewed', 'Bestsellers', etc. Note that even text attributes can be used for sorting. Please keep in mind that by using sorting by text, MySQL can process numerical entries (e.g. 20, 67, 1548, etc.) like text entries. In such cases, entry '67' will be considered as a bigger value one, compared to entry '200'

Newest	
Label [store view]	New Arrivals Rename sorting option to match your own vision.
Attribute Code for the Newest Sorting [store view]	Set Product as New from Date
	Leave empty to use product creation date. If you indicate a custom attribute, make sure `Used in Product Listing` for the attribute is set to `Yes`.

Newest - displays products in the order they were added to the website. If you would like to manage product order for this option by yourself, please, select a product attribute with the help of which you can specify the dates you need.

In cases when a product is configurable, the feature sorts by the value of the configurable product, not simple ones.

Label - specify a name of the sorting option you would like to be displayed on the frontend.

Attribute Code for the Newest Sorting - Leave empty to use product creation date. If you indicate a custom attribute, make sure `Used in Product Listing` for the attribute is set to `Yes`.

If you apply a custom attribute, the feature will sort by this custom attribute ONLY.

6

Bestsellers

Label [store view]	Bestsellers	
	Rename sorting option to match your own vision.	
Bestsellers Period (days)	90	
[global]	Leave empty for life-time statistics.	
Multi-Store Bestsellers	Yes	•
Sorting [global]	If enabled, sorting will take into account sales from all store views of the website.	
Custom Bestsellers	bestseller	•
Attribute [store view]	Use to artificially move some products up in the real best sellers list. Leave empty show real data.	to
Exclude Orders Status	Canceled	
[global]	Closed	
	Complete	
	Suspected Fraud	-
	On Hold	11

Products from orders with selected states will not be used in the Bestsellers.

Bestsellers - displays best-selling products according to the statistics.

Bestsellers Period (days) - sorting option will be counted for the period, indicated here. So if you indicate '15' here, sales for the last 15 days will be counted and the order of products for bestseller sorting option will be defined based on the count. Leave empty for lifetime statistics.

Multi-Store Bestsellers Sorting - if enabled, sorting will take into account sales from all store views of the website.

The field is validated by numbers. If you change the value, the index becomes invalid, that's why reindex is required.

Custom Bestsellers Attribute - select the custom bestseller attribute to move products up in the bestsellers list manually.

Exclude Orders Status - products with specified order statuses will not be used in Bestsellers.

Most viewed	
Label [store view]	Popular
	Rename sorting option to match your own vision.
Most Viewed Period (days) [global]	15
	Leave empty for life-time statistics.
Custom Most Viewed Attribute [store view]	Special Price 🔹
	Use to artificially move some products up in the real most viewed list. Leave empty to show real data.

Most viewed - displays the products according to the number of views. This sorting option will be counted for the period, indicated the **Most Viewed Period (days)**. Don't forget to rename the sorting option to match your own vision.

Custom Most Viewed Attribute - use to artificially move some products up in the real most viewed list. Leave empty to show real data.

For the correct operation of the Most Viewed sorting Magento Reports should be enabled. Please navigate to: Stores \rightarrow Configuration \rightarrow General \rightarrow Reports, than check that Enable Reports and Enable Product View Report settings are set to 'Yes'.

MASTY DEMO CONFIG	~	Dashboard	
NERAL	^	General Options	
ieneral		Enable Reports	Yes
Veb		[global]	If disabled, all report events will be disabled
irreno/Setun		Enable "Product View" Report [global]	Yes
urrency Setup			If enabled, will collect statistic of viewed product pages
tore Email Addresses		Enable "Send Product Link To Friend" Report	Yes
Contacts		[global]	If enabled, will collect statistic of product links sen to friend
Reports		Enable "Add Product To Compare List" Report	Yes
ontent Management		[global]	lf enabled, will collect statistic of products added t Compare List
		Enable "Product Added To Cart" Report	Yes 💌
ew Relic Reporting		[global]	If enabled, will collect statistic of products added t Cart

TALOG	~	[global]	If enabled, will collect statistic of products added t WishList
		Enable "Share WishList" Report	Yes
CURITY	~	Pland	If enabled, will collect statistic of shared WishLists

'Biggest Saving' - displays products with the biggest discount on the top of the list. You can use percentage or absolute values to show the difference between regular and special price. For example, you have products A & B. A costs \$100; there is a 10% discount on this product, so special price \$90.

Sorting [store view]

.

Product B costs \$10, with a discount of 50% special price is \$5. If the 'Biggest Saving' list is sorted by percentage, product B (50% off) would be listed above the product A. If you choose to make sorting by absolute price values, product A will go before product B on the list.

Now in Wishlists	
Label [store view]	Now in Wishlists
	Rename sorting option to match your own vision.
Added to wishlist Period (days) [global]	15
	Leave empty for life-time statistics.

Now in Wishlists - sorting option displays products that were added by other customers to their wishlists. Put down the frontend name of the option in the 'Label' field and specify the data update period below.

Top Rated

Label [store view]	Rename sorting option to match your own vision.
Use Yotpo Reviews instead of Magento Reviews [store view]	No

Top rated - this option shows high rated products at the top. In the **'Label'** field put down the name of the option that is displayed on the frontend.

'Use Yotpo Reviews instead of Magento Reviews' - Set "Yes" if you want to replace Magento reviews with Yotpo reviews.

Reviews Count			
	Label	Most Reviewed]
	[store new]	Rename sorting option to match your own vision.	1
Price: high to low			
Price: low to high			

Reviews count - the option sort products by the number of reviews. Fill in the 'Label' field with a frontend name.

Price: high to low or low to high - this option sorts items by price differentiation. You can also customize the title of the option.

Stock Quantity			\odot
	Label [store view]	Products Quantity	
		Rename sorting option to match your own vision.	_

Stock Quantity - this option sorts items by stock quantity. In fact, this is the Saleable Quantity, i.e., the available quantity of the product for purchase. You can also customize the title of the option.

The 'Sorting by Stock Quantity' functionality works on **Magento version 2.4.3 and higher**. It is available as a part of an active product subscription or support subscription.

How will the quantity of products be calculated for this sorting option?

- Quantity is derived from the difference between the product qty set in the admin panel and the Out-of-Stock Threshold value. This considers both the global Magento setting and the specific setting for each simple product on their product pages.
- For products that are out of stock, the quantity will be 0.
- For MSI, the formula also accounts for reservations made in the admin panel, subtracting the Out-of-Stock Threshold value and the Reservation qty (which represents purchased items awaiting order processing).
- When calculating the quantity of composite products, only simple products with a result > 0
 after deducting Min qty and Reservation qty are included. Furthermore, the total quantity for
 composite products includes the sum of all child products.
- Bundles are not supported for this sorting option; they will be listed with a quantity of 0 at the bottom. Other product types like simple, configurable, grouped, virtual, and downloadable

products are supported.

To let customers apply all sorting options to product lists generated by layered navigation, see **Improved Layered Navigation for Magento 2**.

Advanced

Use the **Advanced** tab functionality to set the **initial** sorting algorithm on catalog pages before frontend sorting is applied (only if it is necessary).

Advanced

Global Sorting [store view]		
	WARNING: adding attribute code to this field will sort products on catalog pages (including search results) based on this attribute first regardless of the selected sorting method. In order to utilize Amasty Improved Sorting options, please use the following values: bestsellers - Best Sellers rating_summary - Top Rated most_viewed - Most Viewed saving - Biggest Saving reviews_count - Reviews Count wished - Now in Wishlists new - New Arrivals	1
Global Sorting Direction	DESC	•

Global Sorting - Add attribute code to this field whether you want to sort products on catalog pages (including search results) based on this attribute **first regardless of the selected sorting method**. This feature will be useful if you need to group products displayed to customers before frontend sorting is applied.

You can add the code of any product attribute to this field. To utilize Amasty Improved Sorting options, please use the following values:

- bestsellers Best Sellers
- rating_summary Top Rated
- most_viewed Most Viewed
- saving Biggest Saving
- reviews_count Reviews Count
- wished Now in Wishlists
- new New Arrivals

Global Sorting will work for attributes even if the **Used for Sorting in Product Listing** setting for these attributes is set to **No**.

Global Sorting Direction - Please select the direction of global sorting (ascending or descending) that fits your needs more.

Specify the Name of the attribute set and the category to **Base On**. Hit the **Save** button.

How Does It Work?

Let's see how the feature with custom attributes works.

For example, your Best Sellers default option shows the real bestsellers first.

But you want to display a Savvy Shoulder Tote first so that it could be sold out faster. So, you create a custom **bestseller** attribute and assign it to Bags attribute set.

Select the attribute code of a custom attribute in the general settings:

Bestsellers	
Label	Best Sellers
[store view]	Rename sorting option to match your own vision.
Bestsellers Period (days)	15
[global]	Leave empty for life-time statistics.
Custom Bestsellers Attribute [store view]	bestseller Use to artificially move some products up in the real best sellers list. Leave empty to show real data.

Now find the necessary product and specify the value to improve its position.

Savvy Should	er	Tote			C	λ 1	admin 🔻
Store View: All Store Vi	ews	• 🕜	← Back	Add Attribu	ıte	Save	•
Enable Product [website]		Yes					
Attribute Set		Bag		•			
Product Name [store view]	*	Savvy Shoulder Tote					
SKU [global]	*	24-WB05					
Price [global]	*	\$ 32.00					
		Advanced Pricing					
bestseller [global]		\$ 30.00					

Save the changes. Thus, the extension will display the products according to the value of this attribute. If the value is not specified, the products will be shown according to the real bestseller data.

Check the result on the frontend.

New sorting options on category page

To create and manage categories, please go to **Catalog** \rightarrow **Categories**.

The new product sorting options are available on 'Display Settings' tab of the category page.

Display Mode - choose the mode of the block: **Products Only**, **Static Block Only** or **Static Block and Products**.

Available Product Listing Sort By - specify which sorting options to use.

Default Product Listing Sort By - choose the automatic algorithm to sort the products.

Manage Widgets

Let your customers know about your new, top-rated, most viewed products with the help of Featured Products Block. To manage Featured Products widget, go to **Content** \rightarrow **Widgets**.

Widgets

Add Widget

New sorting options on front end

The new sorting options and widgets are added to standard Magento ones on the front end and enable your customers to find the right products faster. Also **Ratings and reviews** of other people can be really helpful for your customers.

Compatibility with Yotpo Reviews. As well as with the Magento default reviews, you can use a 'Reviews Count' feature with popular Yotpo Reviews extension. Easily collect customer reviews and

then display them on site pages to help buyers with purchase decisions. Moreover, analyzing customers' feedback data you can continually optimize your web store to provide better customer experience and increase your store conversion.

Here, you can see all the existing cron tasks and their statuses. Run cron tasks and generate their schedule by clicking the 'Run Cron' button. Also, delete tasks in bulk, apply filtering and sorting options when it is needed.

Index management

To manage indexers and see their current status, please, go to System → Index Management

To manage sorting indexer modes for sorting options like 'Bestsellers', 'Most Viewed' and 'Wishlists', click the **'Actions'** button.

If the sorting is disabled by any value (see 'General Settings' - 'Disabled sorting by'), the status is 'Reindex Required' but reindex doesn't perform.

'Update by Save' mode means that the index is refreshed automatically once per day at 3 a.m.

'Update by Schedule' means that the index refreshes according to your cron and reindex performs when the index becomes invalid.

Index Management

Actions . records	found (3 selected)		
Actions			
Update on Save Update by Schedule	Description	Mode	Status
Amasty Improved Sorting - Bestsellers	Index Bestsellers. 'Update on Save' - to execute once a day by cron	UPDATE ON SAVE	REINDEX REQUIRED

Catalog Product Rule	Indexed product/rule association	UPDATE ON SAVE	READY

Find out how to install the **Improved Sorting** extension for Magento 2 via Composer.

PWA for Improved Sorting (Add-On)

The extension also works smoothly on mobile devices due to a ready-made PWA solution, due to which store admin can significantly improve mobile shopping experience.

The feature can be enabled only after purchasing the **PWA for Product Improved Sorting Add-On**. Also, you need to install PWA Studio first.

In order to correctly install a PWA add-on, please install the **corresponding GraphQL system package** first. For the correct name of it, please check the *composer.json file* of the main module. *For example,* the GraphQL system package name of the PWA add-on for the Blog Pro extension would be the following: **amasty/blog-graphql**

{
"name": "amasty/blog",
"description": "Amasty Blog Pro",
"require": {
"php": ">=7.3.0",
"amasty/base": ">=1.13.4",
"amasty/email-unsubscribe": "*",
"amasty/cron-schedule-list": "*",
<pre>"magento/framework": ">=102.0.0",</pre>
"magento/module-catalog": "*"
},
"suggest": {
<u>"amasty/blog-page-builder". "Install blog-page-builder module to activate PageBuilder and Blog Pro integration."</u> ,
"amasty/blog-graphql": "Install blog-graphql module to activate Graphql and Blog Pro integration.",
- "amasty/module-blog-mftf-3". "Install module-blog-mftf-3 module to be able to run Blog Pro MFTF tests for Magento 2.4.0+ version.",
"amasty/module-blog-pro-to-builder": "Install Amasty_BlogProToBuilder module to activate the integration with Custom Reports Builder exten
},
"type": "magento2-module",
"version": "2.10.4",
"license": [
"Commercial"
],
"autoload": {
"files": [
"registration.php"

If the add-on is installed, Venia theme will display category pages in the following way:

	VENIAQ 🖸
Home / Dr	resses
	Dresses
	12 Results
FILT	
Items	Best Sellers
	Top Rated
	Most Viewed 🗸
	Price
J	Biggest Saving
Angelina Dress	Reviews Count ss
\$98.00	Now in Wishlists
	Product Name
	Position

Find out more about Magento PWA integration here.

Trobleshooting

Problem: The 'inventory_reservation' table remains uncleared after running the 'inventory_cleanup_reservations' cron job.

Solution:

Use the following SQL query to remove configurable products from the table:

```
DELETE FROM inventory_reservation
```

```
Last update: 2025/07/10 14:45
```

```
WHERE sku IN
  ( SELECT i.sku
    FROM inventory_reservation i
    INNER JOIN catalog_product_entity p on p.sku = i.sku
    WHERE p.type_id = 'configurable'
);
```

Additional packages (provided in composer suggestions)

To make additional functionality available, please install the suggested packages you may need.

Available with no additional fees:

- **amasty/improved-sorting-graphql** Install amasty/rma-graphql to activate Graphql and RMA integration.
- **amasty/yotpo** Install amasty/yotpo module to activate Yotpo Reviews and Sorting integration.
- **amasty/module-mage-2.4.5-fix** Install module-mage-2.4.5-fix to fix bugs with Product Collection Changes that were added in 2.4.5.

Available as a part of an active product **subscription** or support subscription:

- **amasty/module-sorting-hyva-compatibility** Install module-sorting-hyva-compatibility module to activate the integration with Hyva Theme.
- amasty/module-sorting-by-qty Install this package in order to use Product Salable Qty sorting.
- **amasty/module-improved-sorting-subscription-functionality** This package provides the possibility of sorting Bestsellers sales across multiple stores.

For Enterprise and Cloud editions:

• **amasty/module-sorting-live-search** - Install module-sorting-live-search module to activate LiveSearch and Improved Sorting integration.
