For more details see how the [Login by Attributes for Magento 2](#) extension works.

# Guide for Login by Attributes for Magento 2

Simplify the login process in your store with Login by Attributes for Magento 2 extension.

- Provide login by phone number/ VAT ID/ Username
- Adapt login attributes to your business needs
- Improve customer experience with an easy-to-remember login
- Easily increase number of registered users

Magento 2 Login by Attributes extension is compatible with [Hyvä themes](#). You can find the **amasty/module-customer-login-attributes-hyva-compatibility** package for installing in composer suggest (Note: the compatibility is available as part of an active product subscription or Support Subscription).

## Configure General Settings

To configure general extension settings please go to **Stores → Configuration → Customer Login Attributes**.

## Login Settings

Customer Login Attributes

Login Settings

Login Attribute Selector

[store view]

Magento Default (email)

Login by username (username)

Login with phone number (phone)

Selected attributes will be used by customers to login. Only Login Attributes and Email may apply. Note that it is a good practice to make Login Attributes visible and editable at "Create New Customer Account" and "Edit Account Information" forms. Also, it may be a good idea to modify the template that is used to restore password so it reminds customers of their login attributes.

**Login Attribute Selector** - Selected attributes will be used by customers to login. Only Login Attributes and Email may apply. Note that it is a good practice to make Login Attributes visible and editable at “Create New Customer Account” and “Edit Account Information” forms.

Attribute Configuration

**Default Label/Attribute Code** - Specify an attribute label and a code. The code will be used only for internal needs.

**Store View** - Select the store view for which the attribute will be available.

**Type** - choose between two input types of login option depending on your specific needs:

- **Text Field** option is suitable for username, Id or any other text login;
- **Phone Number** option provides customers with login by the phone.

**Values Required** - If the option is set to 'Yes' customers won't be able to leave this attribute field blank while getting registered.

**Input Validation** - Specify the type of input validation.

Please note that the correct phone number validation in the international format requires installation of the [library](#) along with the module. In case phone number validation fails to work correctly, make sure that the library version is 8.12.0 or later.

## Attribute Configuration

Select pages on which the attribute will be displayed. Specify login attribute display order.

### Attribute Configuration

Show on the Customers Grid ☐ No

Attribute names and attribute values will not be counted as Keywords for "Search by keyword" feature

Show on the Orders Grid ☐ No

Show on the Order View page ☐ No

In the Account Information block at the Backend

Show on the Account Information page ☒ Yes

Show on the Registration page ☒ Yes

Show on the Shipping page ☐ No

Let customers register during checkout using this attribute as a login option.

This functionality is available only with the Amasty [One Step Checkout extension](#)

Sorting Order

The order to display field on frontend

Placeholder

Give your customers a hint on how login attribute should look like. For example, a phone number in the international format.
